

SANITARYWARE

Public washrooms in places such as motorway service stations, railway stations and sports stadiums require a high level of protection against vandalism. This range of WCs, urinals and associated products is designed to fulfil this requirement. Stainless steel products provide durability but with innovative design. Well-maintained toilets and washrooms do not just convey a good image – they demonstrate cleanliness to visitors, be it in a favourite restaurant, exhibition centre or place of work.

PRODUCT FEATURES

- Easy to clean, hygienic
- Robust and resistant to vandalism
- Minimum of 1.2mm thick stainless steel used
- Wide range of designs
- Easy to install
- Compatible with wall installation mounting frames
- WC models for disabled access
- Anti-slip floor design used in shower trays and squat pans

Campus 6/4 or 4/2.6 litre flush wall hung P trap WC - Bolt fix

For fitting through a duct wall, manufactured from grade 1.4301 (304) stainless steel, material thickness 1.5mm for the pan and shroud - satin polish finish. The WC incorporates a stainless steel P trap 102mm o/d. A separate mounting plate and 3 bolts are provided for mounting the WC through a duct wall. The Campus WC has a pressed seating area that does not require a separate seat in vandal prone installations. However, a seat and lid can be fitted. Complies with BS EN 997 for 4 litre flushing. Not suitable for installation frames.

Also Available...

Home Office recommended model with a unique anti-ligature flushing rim which through manufacturing methods and design can guarantee a gap of no more than 1.9mm and can be secured to the floor as well as the wall of the building.

HDTX599

Universal prison unit

We can manufacture a range of prison units from grade 304 stainless steel - satin polish finish. Material thickness 2.0mm, all welded construction. Suitable for installation with a duct wall ensuring all pipework is concealed. The WC can be positioned on the right hand side, the left hand side or central to the unit. A centre water outlet can be provided which needs to be connected to a pre-mixed water supply. The WC has been approved to BS EN 997 for 6 litre flushing performance.

Other options:

Options available include standard body (390mm) and wide body (500mm), bolt fix or push fit, manual or electronic water controls, integrated cistern or direct flushing valve. The units can incorporate an access panel if required and the basin and WC waste can be connected for a single outlet, however we can manufacture to your specific requirements.

Please ask us for details.

URINALS

SANITARYWARE

IMAGE	ITEM NUMBER	TYPE/MODEL
-------	-------------	------------

Centinel wall hung urinal

Manufactured from 1.2mm thick grade austenitic stainless steel polished to a satin polish finish. Each urinal is supplied complete with 50mm waste, sparge pipes, sparge pipe cover, interconnecting pipework, plastic cistern and downpipe. The waste outlet is positioned centrally in the length of the urinal. The recommended height for fixing the cisterns is 750-950mm, from the underside of the cistern to the top return of the urinal. All urinals are screw fixed to the wall through fixing holes in the top flange together with separate wall mounted brackets which support the base of the unit.

With concealed sparge pipe, black plastic cistern and downpipe.

G20117N	1200x300x555mm (9 litre cistern)
G20123N	1500x300x555mm (9 litre cistern)

 	<p>Water-free urinal</p> <p>A design of urinal trough, purpose made to maximise the flow to the waterless waste fitting and reduce standing fluids ensuring that the product is clean and odour free. Fitted with the unique waterless waste diaphragm, urinal troughs are ideal for locations such as stadiums, pubs, nightclubs, public toilets and factories where there is a high frequency of use.</p> <p>The waterless waste fitting is based on a simple principle of a silicone diaphragm that allows urine to pass through the fitting but stops odours entering back into the washroom. The urinal does not need any liquids, gels, scented pads or components to be replaced on a monthly basis for the product to continue to work. The silicone diaphragm insert needs to be replaced at least twice a year, depending upon usage. The urinal trough is made from 1.5mm grade 304 stainless steel and is secured with wall brackets and top edge fixings. The plastic waste fitting is 38mm without the need for a conventional bottle trap.</p> <p>L or R after the code refers to the handing of the waste outlet when facing the unit.</p> <p>G20125L/R 1200x300x578mm G20126L/R 1800x300x578mm</p>	
---	--	--

Before / After use

How it works

The waste systems used in our stainless steel water-free urinals contain a silicone diaphragm that allows urine to pass through the waste, then creates a seal to stop odours entering the washroom.

The cartridge containing the silicone membrane is locked in to the waste using the maintenance key, the cartridge will only require changing twice a year even in the most heavily used washrooms.

Cadet glass fibre reinforced plastic (GRP) waterfree urinal

Glass fibre reinforced plastic is more resilient than ceramic, benefits from a long life cycle and provides a high level of security against vandalism. The centrepiece of the water-free urinals is the odour trap: This odour trap works with the aid of a special blocking fluid. The blocking fluid needs replacing after approximately 5000-7500 uses. Urinal supplied complete with mounting brackets, maintenance tools, 300ml Urilock and a Uricloth.

Crew glass fibre reinforced plastic (GRP) waterfree urinal

The Crew trough is ideally suited for places where large numbers of people congregate. The Crew is available in three different lengths (1200, 1800 and 2400mm) and helps to ensure that both the waiting times in toilet queues are kept to a minimum during busy periods and that the water costs are reduced. Glass fibre reinforced plastic is more resilient than ceramic, benefits from a long life cycle and provides a high level of security against vandalism. The centrepiece of the water-free urinals is the odour trap: This odour trap works with the aid of a special blocking fluid. The blocking fluid needs replacing after approximately 15000-20000 uses. Urinal supplied complete with mounting brackets, maintenance tools, 300ml Urilock and a Uricloth.

How it works

The waterless Uridan® urinals are more hygienic than conventional flushing systems. The centrepiece of the Uridan® urinals is the odour trap: This odour trap works with the aid of Urilock®, a special blocking fluid. Urilock® consists of plant-based substances and is biodegradable. The heavier urine flows directly down the drain, whilst the lighter Urilock® stays on the surface and blocks out odours. Just one Uridan® urinal saves up to 200,000 litres of water per year.
