

HANSAPRISMA

PROVIDING AN ALL-ROUND GOOD
FEELING.

Shower renovation set with short
HANSAVIVA wall bar set

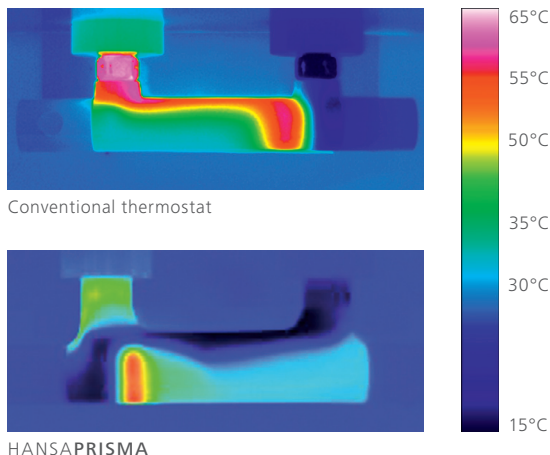

GUARANTEED TO BE VERY COMFORTABLE.

A thermostat enhances every bathroom furnishing. This particularly applies to **HANSAPRISMA**. Thanks to a function that sets standards in its class, the **HANSAPRISMA** range simultaneously makes having a bath and shower significantly safer and noticeably more comfortable. The all-round great feeling starts off with **THERMO COOL**: A special flow system for the hot water inside the thermostat ensures that the outer metal casing hardly heats up. You can therefore touch **HANSAPRISMA** at any time without having to worry.

And the water is also always maintained at a pleasant temperature: A safety lock that is preset to 38°C provides reliable scalding protection. However, if hotter water is required, you can release the lock by pressing a button to increase the temperature further.

A retrofittable temperature lock, for example, provides complete safety for children or the elderly. This solution fully locks the button.

Important for use in public facilities: The **HANSAPRISMA** exposed thermostat is suitable for thermal disinfection providing a measure to prevent the formation of legionella bacteria (at least 3 min. at min. water temperature of 70°C at the spout opening).

The thermal imaging camera shows: Compared to a conventional thermostat in this price segment (top image), heat development on the casing of the HANSAPRISMA thermostat (bottom image) is reduced considerably thanks to the short flow of hot water.

Consumes up to 60% less water and energy.

Extremely quiet. Fitting complies with the strict conditions under noise protection class 1.

Thermostat is suitable for thermal disinfection, which is particularly important for public or large-scale facilities.

Scalding protection. Our thermostats offer maximum safety.

THERMO COOL. Improved safety - the housing of the fittings conducts minimal heat.

Suitable for instantaneous water heaters (shower above 20 kW or bathtub above 24 kW) with relevant limited functionality.

The principle of „safety and comfort“ applies to all areas including the operation of HANSAPRISMA. The diverter is integrated in the handle and is easy to use with an ergonomically designed push button. On the bath mixer, you can switch from the bathtub spout to the hand shower, and on both versions of the shower system you can switch from the hand shower to the overhead shower. This operating system prevents unexpected surges of water from above or the horizontal hand shower.

The push button on the practical renovation sets is a water rate economy button. It fully releases the flow rate that can be reduced to meet individual requirements.

HANSAPRISMA is a modern classic that is particularly well combined with the timeless range of HANSA|HOME fittings. Perfect to be combined with a shower from the HANSAVIVA range that is designed with safety and comfort in mind, just like the thermostat. The excellent quality of HANSAPRISMA shower systems is illustrated in many ways –especially in the generous HANSAVIVA overhead showers: The round (diameter of 202 mm) and square version (250 x 250 mm) are both made of solid metal.

Innovative HANSA laminar technology ensures that you can enjoy a shower without any problems. Pure water without any additional air, smoothly flows through the closed HANSAPROTEC systems ensuring that unpleasant swirling and disturbing noises are not generated. This also helps you to save energy and your water consumption is impressively low, at a rate of 7 l/min (recommended minimum flow rate) to max. 12 l/min.

The limescale protection studs are very practical and permanently prevent limescale deposits from forming on the spray openings on the shower.

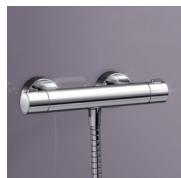

Quality across the board: HANSAPRISMA is appealing as well as satisfying. The highly functional qualities are reflected in the elegant design and eccentric connections that are hidden as standard.

AN ASSET TO EVERY BATHROOM.

HANSAPRISMA.

HANSAPRISMA meets the highest standards of comfort and safety for the bathroom. With its classic premium design and a varied product range, HANSAPRISMA provides options to equip new bathrooms and renovate them.
