

# LAS VEGAS

The most non-conformist people are in luck because at Ape Ceramica we have developed the Las Vegas Collection just for them.

These ceramics are designed to break the rules, to enjoy the style of simple, nice and sober carpets in any room of your home either on the walls or floors, thanks to the functionality of ceramics.

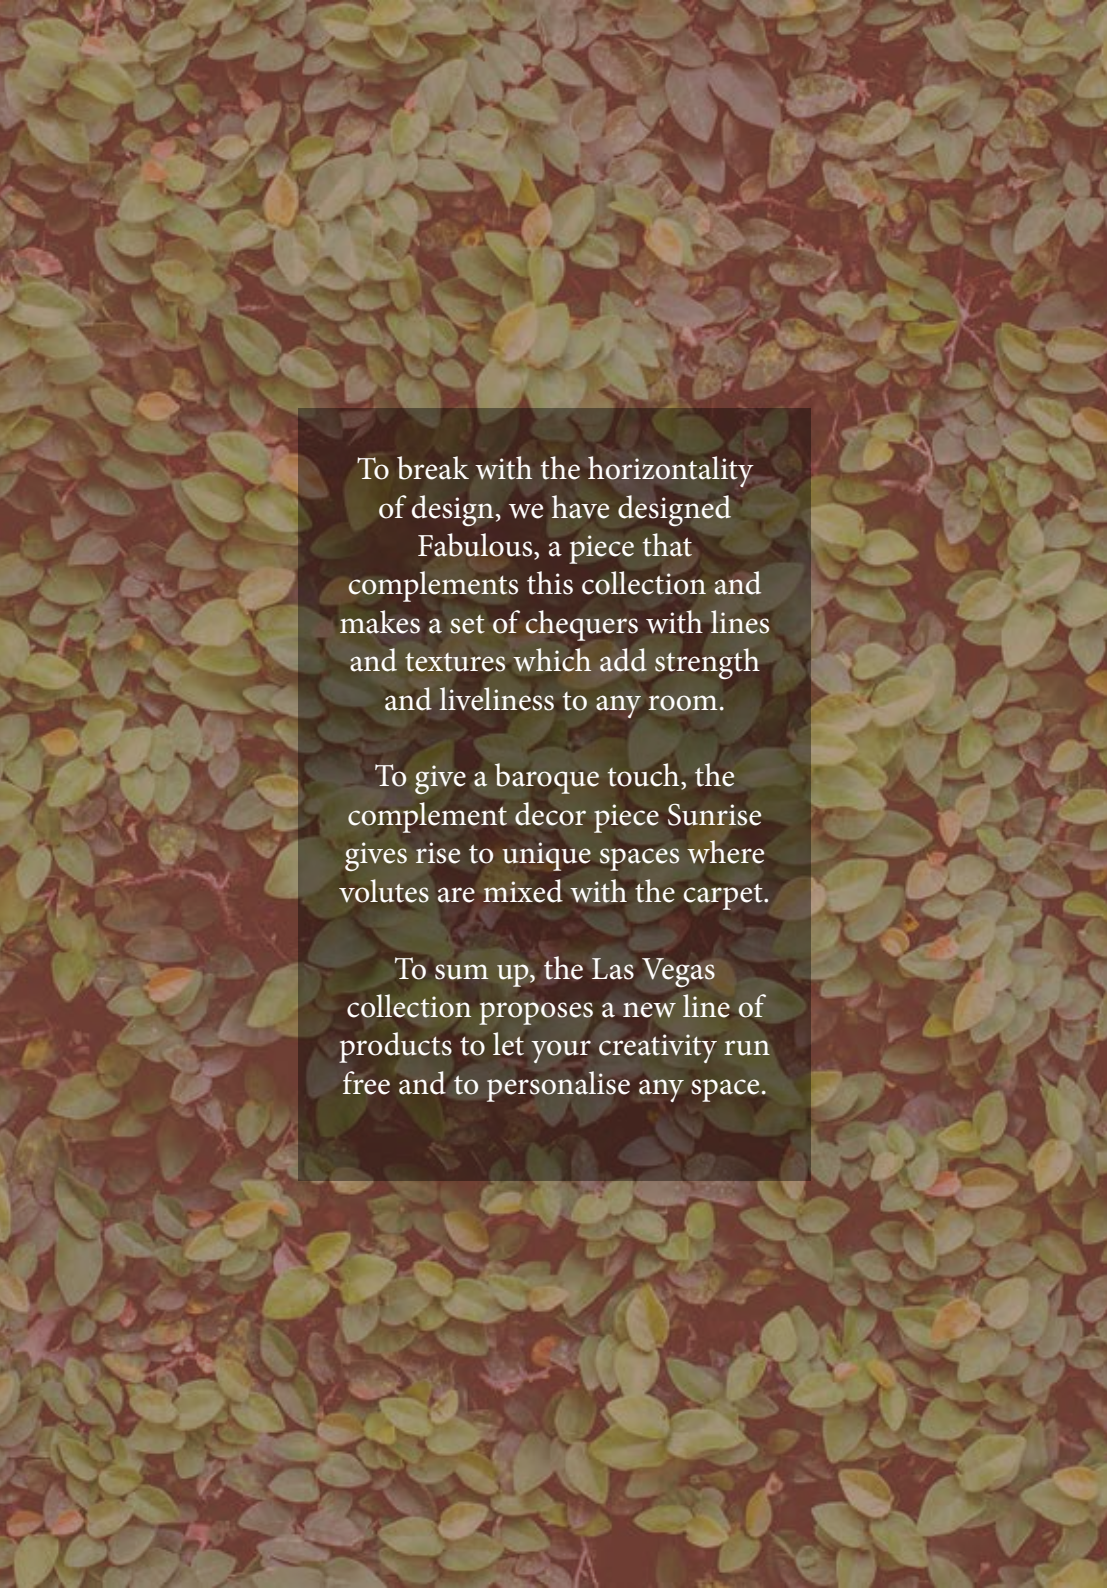

Las Vegas is produced with cutting edge ceramic inkjet machines which make a finish on the pieces by mixing bright and matt effects and textures.

Las Vegas marks a before and after in the design and finish of ceramic tiles.

It is presented in four different colours with up to nine different designs. The tones of each piece are registered in very select ranges. They are very interesting products to personalise any interior space.

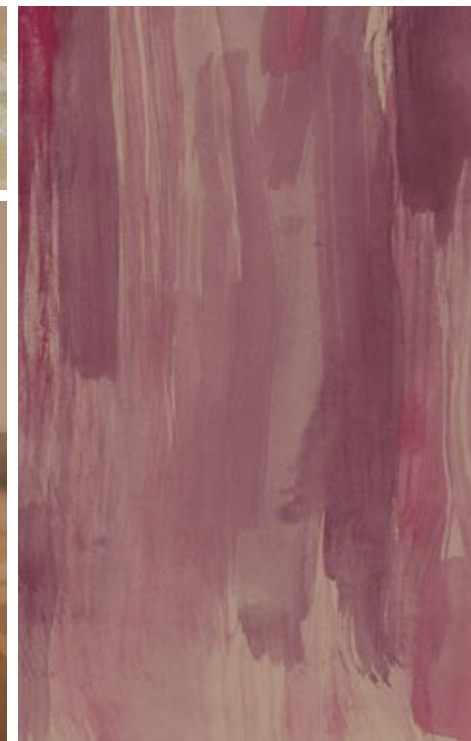

To break with the horizontality of design, we have designed Fabulous, a piece that complements this collection and makes a set of chequers with lines and textures which add strength and liveliness to any room.

To give a baroque touch, the complement decor piece Sunrise gives rise to unique spaces where volutes are mixed with the carpet.

To sum up, the Las Vegas collection proposes a new line of products to let your creativity run free and to personalise any space.
