

Basic but with a strong personality pure in form but organic in its overall development. Modern yet classic with an absolute absence of sharp edges. A masterpiece by antoniolupi, a project that has marked a beginning, indeed that of a new way of conceiving the bathtub. Introduced in 2004, Baia, is still today one of the absolute protagonists of the range and one of the best selling models. Clean and elegant design harmony and minimalism marked by the use of Cristalplant or enriched by unique shades and unrepeatability trace when made of stone. Thin borders guaranteed by the use of solid surface significantly increase with natural stone. The ethereal presence and the candor of Baia in the artificial version give way to solid and concrete luxury of stone. The smaller version guarantees lightness to the composition and breaks the continuity of the volume.
