

C - PROLUX

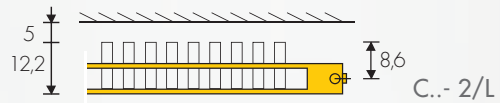

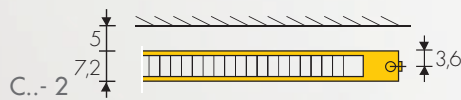

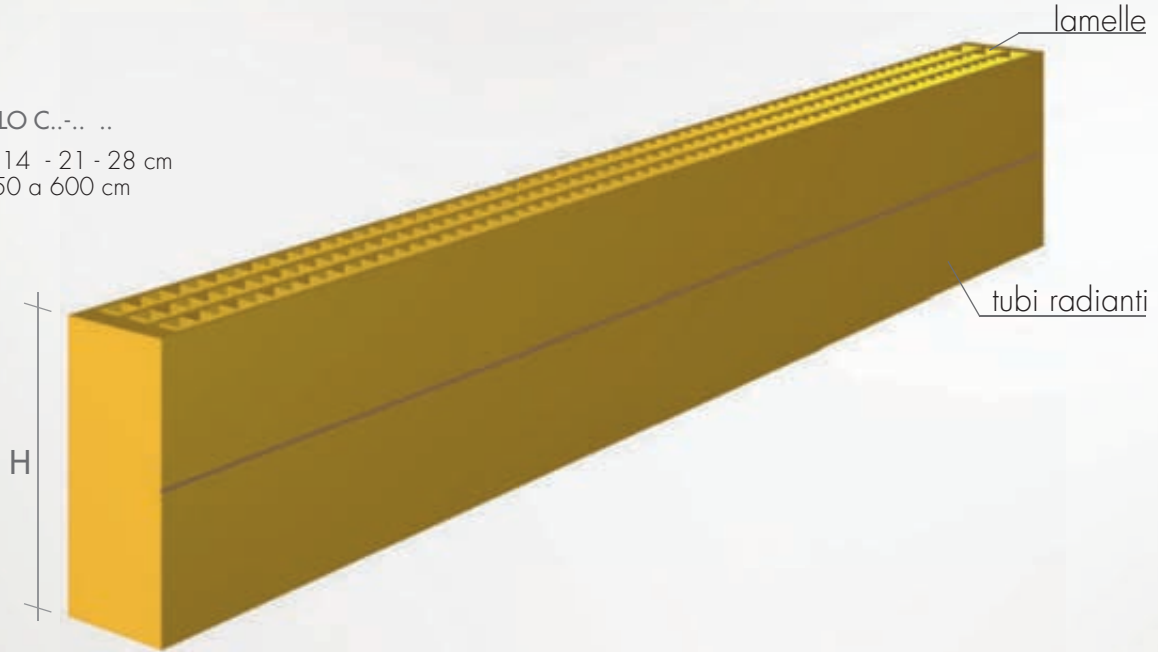

Basso, molto basso, gradevole, con un fronte piatto che ne annulla la presenza, pratico per gli impieghi più vari. È il convettore C-PROLUX, particolarmente utile dove occorre un calorifero di altezze molto contenute (es. davanti a vetrate o in spazi molto ristretti).

Bas, et même très bas, agréable à voir, avec sa face avant plate qui en annule la présence, pratique pour les utilisations les plus diverses. C'est le convecteur C-PROLUX, tout particulièrement utile là où on a besoin d'un radiateur de hauteur réduite (ex. devant des parois vitrées ou dans des espaces très restreints).

Low, very low, attractive, with a flat front with a minimal presence, practical for the most various usages. The C-PROLUX model is particularly useful wherever a radiator with low height is required (e.g. in front of glassed surfaces or small spaces).
