GODI

Bathroom Collections

NATURAL BEAUTY, IMAGINATIVE SHAPES, A RICH HISTORY

GODI Bathroom Collections feature the highest quality of European style bathroom furniture that include vanities, storage, seating and accessories.

Inspired by the famous Spanish Architect Antoni Gaudí, our products embody his artistic spirit, organic curving shapes and natural materials. His iconic Barcelona projects such as Casa Milà and Park Güell have inspired some of our signature collections.

Our team of designers focus on function, durability and styles to meet your design personality; from traditional, modern, neoclassical to the avant garde.

Our sustainable products are expertly built with superior craftsmanship using the highest grades of materials to enhance the function and artistry of our products so you can experience the most effective bathroom environments and simply...Live Beautifully!

PRODUCT EXCELLENCE

GODI Bathroom Collections are made with the highest grades of materials to enhance the function and artistry of our products so you can experience the most effective bathroom environments and simply...

LIVE
BEAUTIFULLY

100% SELECTED SOLID WOOD PRODUCTS

Our products are made entirely of natural select hardwood sustainably sourced and certified by the Rainforest Alliance and the Forestry Stewardship Council (FSC).

Only the highest grades of select Ash, Oak and Walnut are imported from North America, as well as Malaysian Oak (Rubberwood) from South-East Asia.

Hardwood meets the international moisture standards for furniture manufacturing of 8-10% after drying to ensure it does not crack or become exposed to mold. We select wood that has the highest performance valuations with the perfect combination of hardness, density and elasticity ratings.

HIGH-PERFORMANCE WATER-RESISTANT FINISHES

For outstanding performance, each product is finished with an advanced water-resistant coating low in Volatile Organic Compounds (VOCs) that gained its EU Ecolabel.

For protection against humidity and staining, a multi-layer finishing process coats the interior and exterior of each vanity. Each premium coat is ultra smooth providing flawless coverage that dries into a tough, hard-wearing finish that will not fade or discolour. It also protects against rust.

FINE PRECISION COUNTERTOPS

Our marble, quartz, granite and jade countertops are fabricated with double thick edge profiles, premium treatments like round, bevel and ogee edges and some with built-in backsplashes enhancing the striking design and appearance of each stone.

Our sophisticated state-of-the-art technology allows us to embed Swarovski Element inlays into stone. All stone surfaces are protected with a leading stone sealer.

QUALITY HARDWARE

BLUM or HETTICH HINGES, PUSH-OPEN + SOFT-CLOSE SYSTEMS.

Austrian BLUM and German HETTICH are leading brands in engineered drawers and runner systems. They combine intelligent technology, design and top performance to ensure the smooth functionality of GODI Bathroom drawers and cabinets.

Quality hinges offer smart mounting and adjustment techniques while electromechanically assisted push-open and soft-closing drawers effortlessly and silently offer a cushioned close or open no matter how hard you close doors or push to open.

SPECIALITY MATERIALS

SWAROVSKI ELEMENT HANDLES AND INLAYS, STAINLESS STEEL TRIMMINGS AND METAL LEAFING DETAILS.

Swarovski Elements is the world's largest supplier and producer of crystals of the finest quality, consistency and brilliance. By using state-of-the-art technology Swarovski Elements are inlaid on selected products like drawer handles, vanity cabinets and stone countertops.

MANUFACTURING EXCELLENCE

**MODERN ADVANCED PRODUCTION EQUIPMENT COMBINED WITH
TRADITIONAL HAND CARVED CRAFTSMANSHIP**

GODI Bathroom manufacturing sits on a 32 acre facility. Our production techniques observe strict controls on all manufacturing steps; from research and development, material selection; to production; to finishing and assembling; to assure the quality and consistency of our products.

Thanks to our our advanced production equipment, master wood carvers, top-of-the-line materials and quality controls GODI Bathroom products exceed certifications and national standards in Europe, North America, UK and Asia.

SUSTAINABLE PRACTICES

GODI Bathroom is committed to sustainability and uses eco-friendly practices and materials to enhance our working environments and the world around us.

MATERIAL MANAGEMENT

Precise calculation is taken to ensure full use of raw materials and decrease in waste management. For instance small wood leftovers are used to create foot or leg samples for the base. A series of evaluation modes and financial incentives are offered to employees as bonuses for meeting resource goals.

RECYCLABLE & LOW VOC MATERIALS

Our zero-emission wood bases and stone countertops are made of natural materials and are completely recyclable. Vanities undergo a multi-stage finishing process with a Valspar finish low in Volatile Organic Compounds (VOCs) that earned the European Eco-label.

Our certifications include:

ISO 9001:2000 certifies our products comply with the International Standards in Quality Management Systems.

cUPC certifies that our products comply with product standards within the National Plumbing Code of Canada and American National Standards.

Conformité Européene complies with the essential requirements, performance levels and harmonized standards within the European Union.

Rainforest Alliance seal guarantees that our wood is sourced from certified forests by the organization. These forests are managed according to rigorous Environmental, Social and Economic criteria designed to conserve wildlife; safeguard soils and waterways; protect workers, their families and local communities; and increase livelihoods.

Forest Stewardship Council trademark guarantees that our products come from responsible sources that support forest conservation, offer social benefits, and enable the market to provide an incentive for better forest management.

H-01
64" VESSEL SINK VANITY

ADMC DANCING ROOM COLLECTION

Our signature collection takes inspiration from the swift and graceful lines of a dancer. We've embraced distinct curves with practical storage space and specialty details of bevel mirrored panels and delicate hand-turned legs like dancers on their toes! Crafted from solid hardwood and finished for a monochromatic look these statement pieces will earn a standing ovation in any home.

NOBLE COLLECTION

With exaggerated curves, lush upholstery and hand carved floral patterns the Noble Collection embodies the influence of French furniture designs during the Victorian era. We've paired opulent high-gloss or metal leafing finishes with crystal knobs mixed with modern sensibility for a luxe bath experience.

GM10-42
47" SINGLE VANITY

CARE & MAINTENANCE

To ensure durability of our products we recommend following basic precautions and caring instructions. Damages due to improper care will void the warranty and may result in refusal for return or exchange.

To maintain wooden product quality, avoid exposing the cabinets under direct sunlight. Keep away from hot or constant moist atmospheres. Maintain well-ventilated conditions and approximate humidity levels of 40-50% at all times. Our products are kiln dried to a standard furniture grade moisture content and are designed to withstand normal seasonal moisture variations found within your home, but extreme temperature or humidity level fluctuations may result in wood shrinkage or swelling. To balance the humidity levels in your home a humidifier or a dehumidifier may be required.

Wiping the surfaces dry after each use is highly recommended. Continuous and prolonged exposure to moisture may damage or discolor the wood.

Dust regularly using a clean, soft lint-free cotton cloth or gentle dust-collecting tool. For cleaning use damp soft cloth. If more thorough cleaning is required, use mild soapy water or professional wood cabinet cleaning product, wipe off thoroughly after cleaning with damp cloth and then dry immediately using another soft, clean cloth.

The following products are to be avoided at all times as damage may occur: harsh detergents, strong soaps, abrasive, acidic, ammonia, bleach, solvent, petroleum or silicone-based cleaning, waxing or polishing products.

The wood surfaces should never come in direct contact with any coarse materials that may scratch and discolor the surface. Any work performed on wood involving any type of physical or mechanical action should always be performed in the direction of the grain to prevent possible scratching.

Every 6-12 month polish wood surfaces with non-wax or silicone-free professional wood polishing products following the manufacturer's instructions provided.

To maintain stone surfaces: Dust surfaces frequently with a clean, soft cloth. Use professional natural stone cleaning products to clean and help reinforce protection of stone countertops and sinks. Don't overuse recommended amounts of any cleaning product; rinse the surface thoroughly after cleaning, and dry with a soft cloth. Abrasive, acidic and other chemical substance should be avoided as they can remove the surface sealant or in extreme cases damage the stone.

All our natural stone surfaces are pre-sealed to help increase water and oil resistance. But use and ongoing maintenance greatly affect sealer durability. As a result, heavily used surfaces should be resealed annually for optimal protection. Use only professional natural stone sealing products carefully following the manufacturer's instructions provided.

WARRANTY

GODI Bathroom Collections by Dezign market carry a 2 Year Limited Warranty to the original purchaser that they will be free from defects in material and workmanship under normal domestic use. Full Warranty details can be found on godibathroom.com

FINISHES + CHARACTERISTICS: GODI Bathroom Collections by Dezign Market are made with natural materials like wood and stone. Natural characteristics of these materials, like pits, fissures, veining and inclusions in the stone, as well as variations in grain character, knots, blemishes, markings or any inconsistencies in the colour or wood finish attained by surface absorption of stain are considered naturally occurring variations. They are not in the control of manufacturer, nor considered reflection of poor quality or defects under the warranty, unless they compromise the integrity of the product.

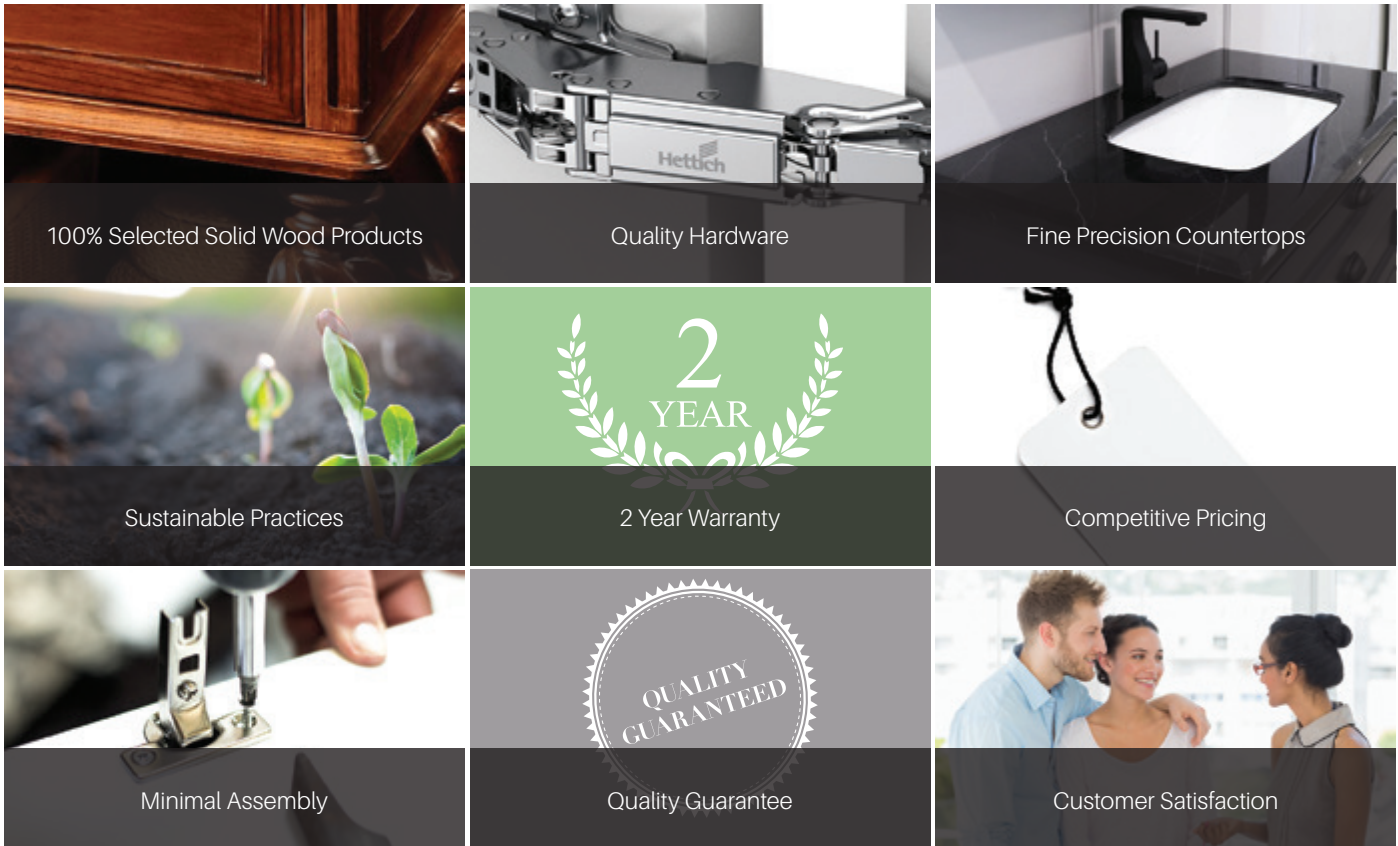

GENERAL DISCLAIMER

Images and data contained in this price book are to be considered indicative. Dezin Market assumes no responsibility for minor variations in color or texture of products delivered in relationship to this publication.

All stated sizes are nominal and subject to a tolerance of $\pm 5\%$. Always check the updated specification sheets available for each product on GODIBATHROOM.COM

Dezin Market reserves the right at its own discretion and without prior notice, modify, alter, change or improve the design or specifications of, or discontinue the sale or manufacturing of any product in our range.
