

HotSpring[®]

Every day made better™

Highlife[®] Collection

Every Day Made Better

A Hot Spring® spa is your personal retreat. It is a well of inspiration from which you can draw at any time – helping you be at your best. Set aside time each day to refocus, refresh and connect with what matters most.

Better Self

Warm water, buoyancy, and massaging jets can provide a unique sense of personal well-being. It is a special place for you, where the rigours of everyday life are on pause. It prepares you for the day ahead and helps you unwind and sleep better at night. Here, you discover your best self.

Better Relationships

Spa time with others helps you discover deeper connections and have more meaningful conversations. This is where you can open up and strengthen your bonds. The benefits flow well beyond just your time in the water, it fills your life with moments that fuel your best relationships.

Better World

In your Hot Spring spa, you slow down to enjoy the natural world sometimes missed in the day-to-day rush. Rediscover a starry summer night, a harvest moon, or falling autumn leaves. Time spent outside, immersed in the warm water of your Hot Spring spa, changes your view of the world. You reconnect with what is important and rediscover how much beauty was in front of you all along.

What Makes a Hot Spring Spa Better?

Over four decades, Hot Spring Spas earned its reputation as a leading brand and has sold well over one million hot tubs. We believe our products can enhance your life. Making that true is what defines Hot Spring Spas. Our mission is to provide you with *The Absolute Best Hot Tub Ownership Experience™* with unparalleled massage, innovations that take the worry out of water care, and energy-saving features that keep operating costs low. With a Hot Spring spa, you can relax and see your days, your nights and yourself in a whole new light.

Wellness Awaits You

With a Hot Spring spa at home, the restorative benefits of hydrotherapy are yours whenever you desire. As a daily ritual, your hot tub can become the foundation of a wellness lifestyle, helping you feel better—physically, mentally and emotionally.

The Highlife Collection

You take every opportunity to do what is best for you and your family. With that in mind, we designed the Highlife® Collection with advanced engineering, stunning looks and luxury appointments for your ultimate enjoyment.

The Pinnacle of Design

When done right, great design enhances your experience. Each model in the Highlife Collection represents the culmination of our more than 40 years of design and engineering advancements with a beauty, form and function you will only find from Hot Spring®.

Leading the Way

Our mission is to provide you with *The Absolute Best Hot Tub Ownership Experience™*. Over the decades, Hot Spring has led the way in hot tub innovation with a host of patents and proprietary features that all focus on delivering that experience.

Highlife Collection spas are designed ready to use the optional FreshWater® Salt System, a breakthrough innovation that takes the worry out of water care. When

combined with 100% no-bypass filtration and Tri-X™ filters, standard on every model, you have our best spa water possible.

Other standouts include exclusive Moto-Massage® DX jets, the Energy Smart™ System with No-Fault™ heater, multi-layered full-foam insulation, wireless touchscreen remote and durable, low-maintenance siding in six designer finishes.

These features and more are detailed in the pages that follow. Once you discover what makes a Hot Spring spa better, you will have fun choosing from nine models that range in size, seating options, and colour combinations. With all this, the Highlife Collection represents the best of the best from the world's number 1 selling hot tub brand.

Worry-Free Water Care

FreshWater Salt System ready for our best spa water possible with less effort

100% Water Filtration

Exclusive no-bypass filtration system and long-lasting Tri-X filters help keep water crystal clear

Unique Massage

One-of-a-kind Moto-Massage DX moving jets provide two powerful water streams that sweep up and down your back

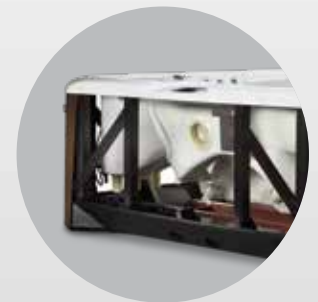

Super Energy Efficient

Full-foam insulation and Energy Smart system for low operating costs

Easy Operation

Wireless remote control operates spa functions from anywhere in the spa and up to 9 metres away

Built for Years of Use

Polymer support structure and base pan for durability and long life

Visually Stunning

The Highlife® Collection takes beauty to a new level with a distinctive colour palette and distinct styling. Unique cabinet design and thoughtfully sculpted shells create a look that is more like furniture than a hot tub. A waterfall-like detail on the corners cascades from the shell to the base, integrating the surfaces. It all works together to create a beautiful focal point in your space.

Six cabinet finishes include textures and tones influenced by wood, metal and stone. Combine these with a variety of designer-selected shell colour combinations and you can create a look that is just right for you, from traditional to cutting-edge contemporary.

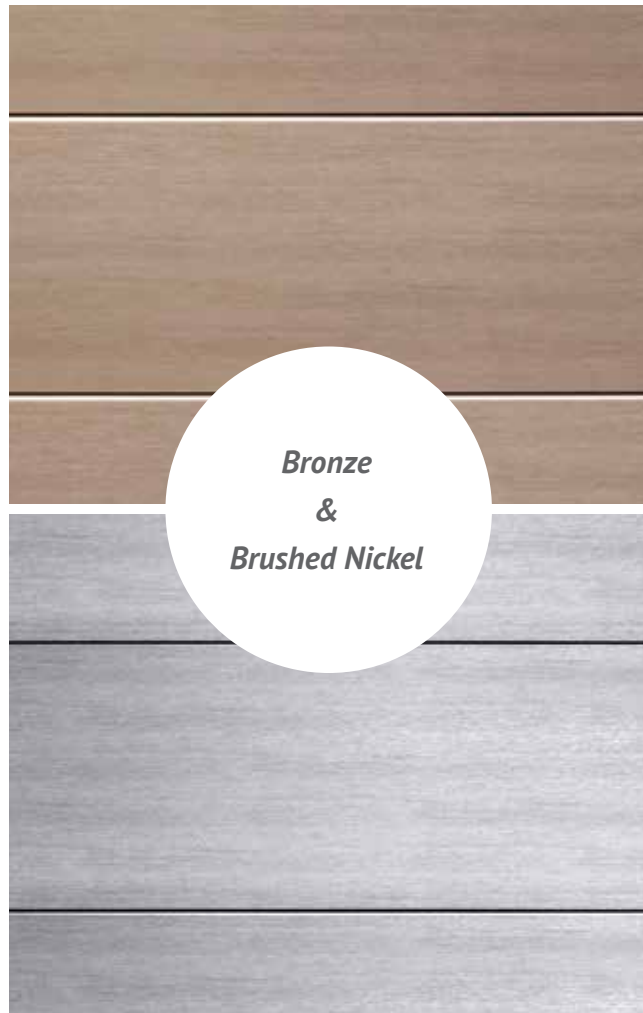

Grandee™ shown with Platinum shell and Shale cabinet

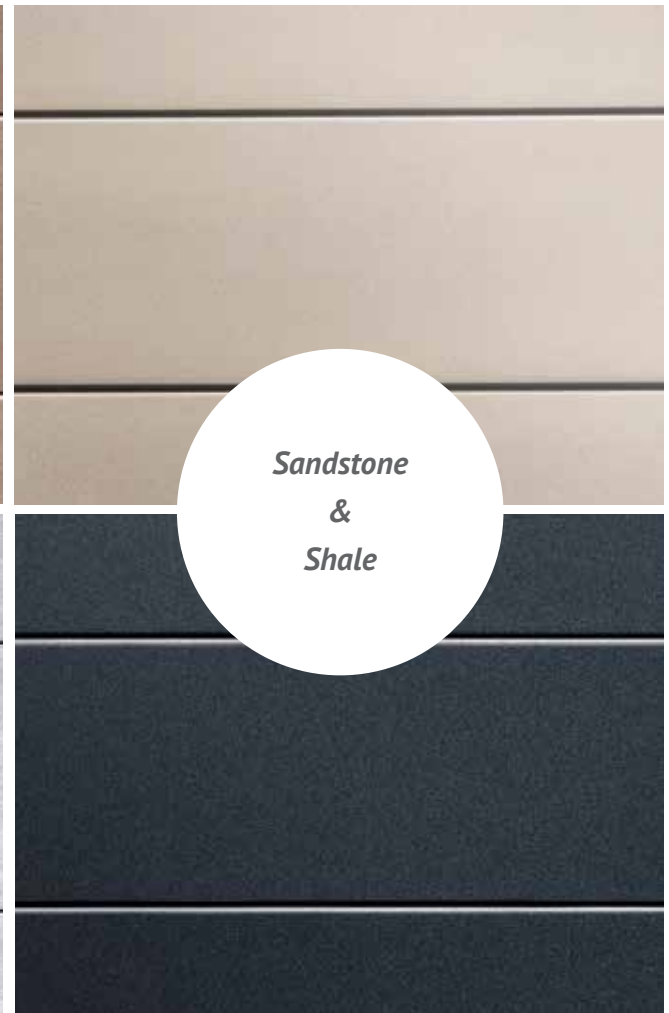

Walnut & Driftwood

With their subtle grain pattern and natural colour tones, these two wood-pattern options complement a wide range of home and patio styles.

Bronze & Brushed Nickel

A metallic sheen in the Brushed Nickel comes to life when sunlight reflects on its textured finish. A satin finish on the Bronze siding creates an exciting garden focal point.

Sandstone & Shale

The embossed textures and subtle colour flecks on these options are suggestive of stone. Both are a perfect complement to natural hardscape environments.

Water Care Like No Other

Your time is too valuable to spend it fussing with hot tub chemicals. The FreshWater® Salt System is a breakthrough innovation that takes the guesswork out of keeping water clean, so you can spend more time enjoying your spa.

Simple and Intuitive

Water is sanitised with a titanium cartridge that automatically generates chlorine from salt. Simply set the chlorine output level with the touch of a button.

The system operates through the hot tub's main control panel. Easy-to-read, on-screen messages take out the guesswork by showing you how everything is working and what adjustments might be needed.

Natural-Feeling, Longer-Lasting Water

Forget about harsh odours, itchy skin and irritated eyes because chemical usage is reduced. Water is softer and feels natural.

And it conserves water too. When properly maintained, water life is extended, reducing the need to drain and refill your spa for up to 12 months – that is up to three times longer than other systems.*

Easy Spa Ownership

The titanium cartridge lasts up to 4 months and requires no maintenance. When it is time to replace it, you can do it in seconds without tools and without draining the water.

The FreshWater Salt System will change the way you use your hot tub by taking the worry out of water care. With water that is always hot and ready to use, you will spend less time maintaining your spa and more time using it.

The maintenance-free cartridge can be replaced in seconds, without tools.

*One 3-pack of cartridges provides up to a year's worth of water care.**

**Many factors affect the life of spa water, such as bather load and water chemistry. When spa water is properly maintained considering these factors, a 3-pack of cartridges will keep water clean and clear for up to a full year.*

Salt system

Simpler, Cleaner & Better

Vanguard™ shown with Alpine White shell and Brushed Nickel cabinet

Best Spa Water Possible

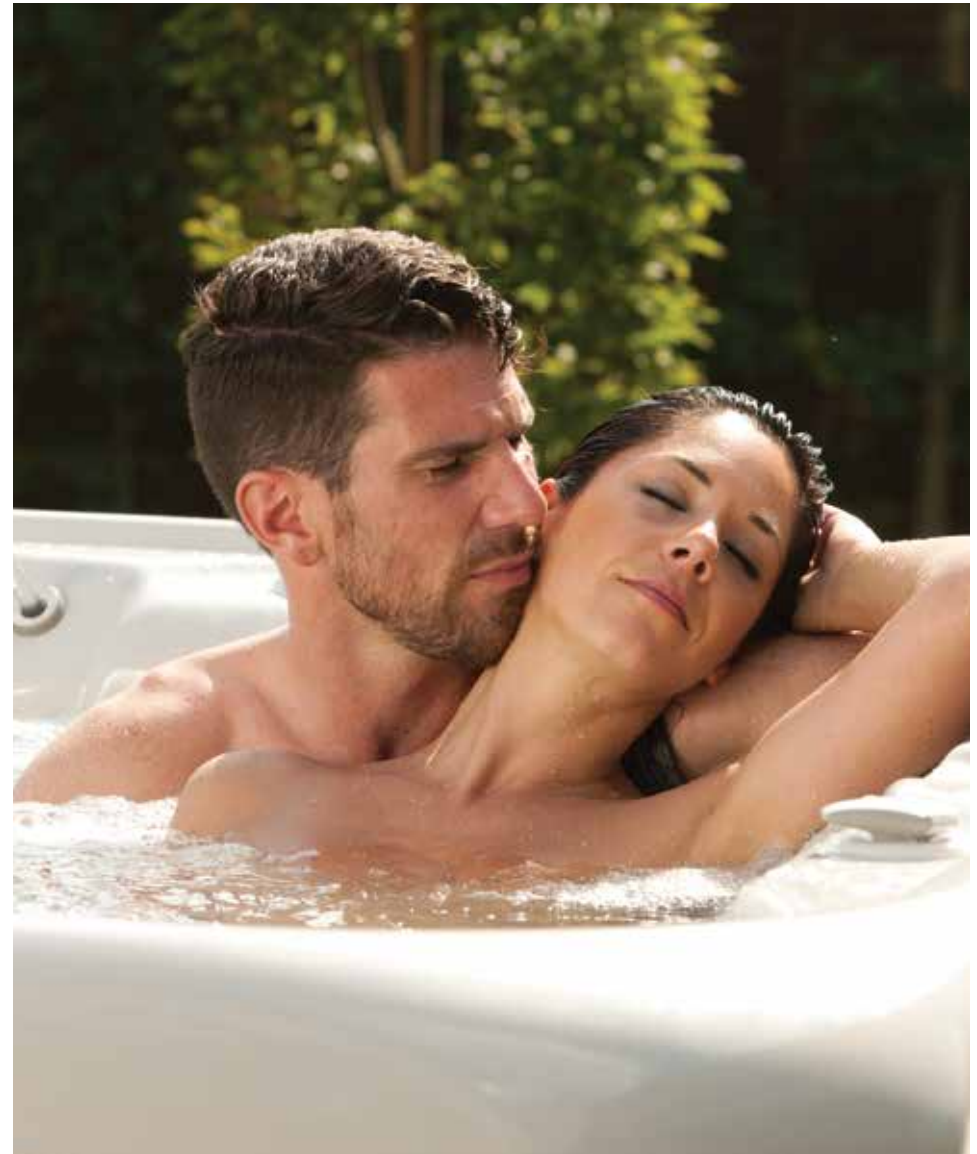

Clear, clean water is essential for a great spa experience. Every spa in the Highlife Collection includes our best water care technologies and is built ready to use our proprietary FreshWater® Salt System to help ensure your water is at its best.

100% No-Bypass Filtration

All the water in your Highlife® Collection spa is filtered all the time. In other spas, water bypasses the filters when the jets are on – which is when you need filtered water the most. Depending on spa size, each model includes up to five filters and enables all the water to pass through the filters, even when the jets are running.

Tri-X™ Filters

These reusable filters use exclusive three-dimensional technology to filter significantly more water than standard paper filters, which makes them an important part of our 100% no-bypass filtration system. This design gives them more effective filtration area compared to any paper filter of the same size, so they do not need to be cleaned as often. When you do want to clean them, just put them in the dishwasher for convenience.

A Back Massage Like No Other

More than 30 years ago, we patented the very first moving hydrotherapy jet. Today, there is still nothing like our Moto-Massage® DX jet. Exclusive to the Highlife® Collection, two powerful streams of water move up and down the entire length of your back in a sweeping motion, melting tension and soreness.

Four Precision™ jets positioned above every Moto-Massage DX jet massage your neck and shoulders. Together, these jets work in harmony for an unparalleled hydrotherapy experience.

Comfort that fits you

A great massage starts with comfortable seats. Ergonomically designed shells are shaped to fit the body's natural contours and position you to relieve pressure and stress. Combined with a spacious foot well and integrated pillows you can truly relax in comfort.

Massage That Makes Your Day

Each spa includes up to seven unique jet types and at least one Moto-Massage DX jet. But what makes Hot Spring® spas special is our 40-plus years of hydrotherapy expertise. The result is a distinctive jetting experience with the right amount of pressure and massage targeted for different muscle groups.

Personalised Control

Every jetted seat in a Highlife Collection spa lets you personalise your massage. With a simple turn of the jet face, the Comfort Control™ system dials in your ideal mix of air and water for a powerful massage or just a soft touch. Use the SmartJet™ system to direct flow to specific groups of jets, or to all of them at the same time.

Envoy™ shown with Alpine White shell and Walnut cabinet

Super Energy Efficient

Your spa will be there – hot and ready – when you need it. Our comprehensive EnergySmart™ system, uses a series of innovations to keep spa water at your desired temperature while keeping energy costs to a minimum.

High-Density Foam Insulation

The same material found in commercial freezers is applied in multiple layers of varying density. This exclusive technique helps eliminate gaps and voids in the foam to maximise energy efficiency.

Hot Spring® Spa Covers

We manufacture our own spa covers to ensure a tight seal that locks in heat. The dense foam cover features child safety locks and is UL-listed to ASTM standards for safety. Highlife® Collection spas feature an energy-saving hinge seal, which prevents heat from escaping at the centre of the spa cover.

No-Fault Heater

A titanium housing and heater element maximises heat transfer to the water and deliver unmatched corrosion resistance. In fact, our patented No-Fault™ heater is warranted for five years, regardless of water chemistry.

SilentFlo 5000™ Circulation

A dedicated pump continuously circulates spa water, 24 hours a day, and uses less energy than a 40-watt light bulb. This eliminates the need to rely on high-powered jet pumps to circulate water, reducing energy costs and wear.

Insulated Base Pan

Structural ribbing on the bottom of the spa increases energy efficiency by creating insulating air space and minimising contact with cold ground.

Energy Costs

Actual energy costs depend on spa model; how often you use it, the set temperature, outside temperature and the cost of electricity where you live. The table below estimates energy cost of a mid-sized Highlife Collection spa in heavy use. All models are certified to stringent California Energy Commission (CEC) standards and APSP 14, the US energy efficiency standard for portable spas.

Monthly Cost Estimates - Kilowatt Hours x Rate per Kilowatt Hour

Temp = approx annual mean ambient temp in degrees Celsius kWh = approx average kilowatt hours per month to operate spa*
Rate = approx average rate charged per Kilowatt hour in Euros** Cost = approx average monthly energy cost to operate spa*

City	Temp	kWh	Rate	Cost
London	11°	202	€0.2122	€46
Madrid	15°	171	€0.2403	€44
Paris	12°	194	€0.1765	€37
Helsinki	6°	242	€0.1734	€45
Oslo	7°	234	€0.1867	€47
Stockholm	7°	234	€0.2015	€51

* Based on a medium-sized Highlife Collection spa set at 39 °C used 6 times per week, 15 minutes with the jets on, 15 minutes with the jets off during each use. Testing conducted by an independent third party certified laboratory in a Controlled Environmental Chamber at multiple ambient temperatures using continuous Data Acquisition monitoring of watts, temperature and humidity, with all equipment rigorously calibrated to ensure data accuracy. Individual energy consumption will vary depending on water set temperature, actual consumer usage patterns, and actual environmental ambient conditions.

** Based on the rates as indicated by <https://ec.europa.eu/eurostat>, 2019. Rates are subject to change - check with your local electricity provider for the current rate in your area.

Legendary Quality

Dedication to quality has helped Hot Spring® Spas lead the industry for more than 40 years. The Highlife® Collection is the culmination of that legacy and represents our pinnacle of design and luxury. Underneath the beautiful exterior is a sturdy, polymeric substructure and base pan for durability and long life. It will never rust or rot.

The sides of the base pan are elevated to create a barrier to the elements. It also gives the spa its unique floating effect, which is made extra special with under-cabinet accent lighting.

Envoy™ shown with Alpine White shell and Walnut cabinet

Soothing Sights & Sounds

Water Dances

Enhance your hot tub experience with the sights and sounds of the exclusive BellaFontana™ water feature. Three colourful backlit arcs of water converge to create this elegant fountain that you will enjoy from inside or outside your spa. *Included on most Highlife Collection models.*

Light Your Night

Create subtle lighting on an otherwise dark night, or a medley of colour for your next outdoor gathering. Our multi-zone Luminescence™ lighting system lets you easily select custom lighting to suit your mood.

Advanced Controls, Simple Operation

Get lost in conversation, not timers or temperature settings. With advanced and intuitive controls, Highlife Collection spas are easy to operate.

Set It and Forget It

The IQ 2020™ spa control system makes your Highlife® Collection spa simple to operate, with no programming required. To heat your spa, simply decide what water temperature you like, then set it and forget it. In the event of a power outage, the spa automatically resumes normal operation once power is restored.

Simple Operation

Highlife Collection spas feature a unique wireless touchscreen spa control that operates spa functions from anywhere, up to 9 metres away. The large waterproof, colour LCD touchscreen serves up intuitive icons and menus that are easy to read by day or night.

Your Favourite Settings

Store your favourite light and jet settings then quickly recreate your customised setup with the simple press of a button.

Two-Way Communication

Take the guesswork out of spa ownership. Your control panel provides you with easy-to-read messages that advise you of how your spa is operating.

Quick Clean

Perfect for a quick post-soak refresh, or when adding chemicals to the water, our convenient clean cycle circulates spa water for ten minutes.

Ready, Set, Soak

Be confident that your Hot Spring® spa is hot and ready before you even step outside. The On/Ready indicator lights, in the Hot Spring logo can be seen even with the cover on. These lights also serve as a helpful diagnostic tool letting you know when your spa needs attention.

Enhance Your Hot Tub Experience

Wireless entertainment adds another layer of enjoyment to your spa experience. You can add these dealer-installed options at any time.

Bluetooth Technology

Stream music and video from an online source or use your own library. The choice is yours with our easy-to-use system featuring Bluetooth® wireless technology.

High-Quality Sound

The sound system features a powerful amplifier and optional subwoofer for increased volume and richer bass tones. Marine-grade speakers can be installed in the bar top. Enjoy audio from inside or outside the spa with these durable pop-up speakers.

High-Definition Hot Tubbing

Entertainment makes a big splash with an optional 22 inch high-definition display. Watch the game or your favourite shows. HDMI and USB connectors accommodate a variety of streaming and cable devices. This monitor pairs with the wireless audio system.

Warm or Cool - It is Your Choice

On a cool, crisp night, there is nothing like relaxing in your spa with soothing warm water swirling around you. On a hot and sunny day, however, a cool, refreshing dip can be just as nice. With the CoolZone® Hot Tub Cooling System, your hot tub can heat and cool the water – something that is not possible with most hot tubs. As a result, you and your family will be able to use your hot tub more often throughout the year.

Spend More Time in Your Spa

Your hot tub is an investment, and it is important that you get the maximum usage and enjoyment from it. The CoolZone system increases your options by providing a greater temperature range than traditional spas.

Your Hot Tub Just Got Cooler

With the CoolZone system, your hot tub can provide you with more than just a warm, relaxing soak. Your Hot Spring® spa can also offer a fresh, revitalising dip on a hot day after working in the garden. It becomes a cool place for the kids to splash and play* during the day and a warm-water retreat for you to unwind later that night. For serious athletes, the option to bring the temperature of the water way down can mean soothing relief for muscles after an intense workout.** The possibilities are endless.

Energy-Efficient Flexibility

Similar to the way air conditioning cools your home, the CoolZone system can cool spa water to as low as 16°C. And when you are ready to warm things up again, it works with your spa's heater and can efficiently raise the temperature in just a few hours while keeping your energy costs low.**

The CoolZone system also helps improve energy efficiency during normal hot tub operation, because it can reduce the amount of time the standard No-Fault™ heater runs in order to keep the water hot. Depending on the ambient temperature where you live, this increased efficiency has the potential to add up to real savings over time.

Is It Right for Me?

The CoolZone system from Hot Spring is an excellent option for:

- Hot tubbers living in hot climates
- Grandparents and families with small children
- Athletes looking for cold therapy

The CoolZone system is a dealer-installed option on all HighLife® Collection spas. Contact your Hot Spring dealer for installation requirements and information.

*Never leave children unattended around water.

**Depending on ambient temperature and other factors. Ask your Hot Spring dealer for details

Easy Access for Daily Use

You will enjoy your spa more often with the added convenience provided by these Hot Spring® Accessories™. These products are specifically designed for your Highlife® Collection hot tub, so you can get the most out of your hot water experience. Do not compromise your warranty or your investment by choosing other brands. Insist on genuine Hot Spring Accessories.

Open Sesame

Our patented cover removal systems make opening and closing the spa cover easy. By eliminating the need to drag the cover on and off the spa, and keeping it from ever touching the ground, these systems can help extend the life of your cover. There are four systems available to meet your needs.

CoverCradle

Let the CoverCradle™ do the heavy lifting for you! For the ultimate in ease, this robust system offers an ultra-smooth gliding mechanism and the support of dual pneumatic springs to support a cover of any size. Requires 61 cm minimum clearance.

CoverCradle II

The CoverCradle II is a lighter version of the original CoverCradle. Cover removal is made easier with the single pneumatic spring. Requires 61 cm minimum clearance.

UpRite

Ideal for tight spaces and recessed spa installations, the UpRite™ system also provides an element of privacy by holding your folded cover in a vertical position. Requires 18 cm minimum clearance.

Lift'n Glide

The Lift'n Glide™ is simple to operate: lift the cover, glide it back and enjoy. Requires 36 cm minimum clearance.

**Actual clearance may vary depending on spa model and location*

Step Up

Entering and exiting your hot tub is easy with custom-designed Hot Spring steps that complements your Highlife Collection spa.

Polymer

Durable and lightweight, this step provides a stable entry point into your hot tub. The Polymer step is offered in multiple colours and are eco-friendly—made with 100% recyclable material.

Complementary Spa Side Elements

With these thoughtful spa additions, you can outfit your spa with everything needed for a great experience.

Spa Side Umbrella

Bring shade to your spa with the 360° rotatable spa side umbrella. Constructed from powder-coated aluminium and zinc-plated steel, this umbrella is rust-resistant with a base plate under the spa cabinet for stability. The 3 metres diameter canopy is available in Crème or Navy Blue.

Spa Side Towel Tree

Keep your towel within reach with this easy-to-assemble towel tree, constructed from powder-coated aluminium with a bronze finish that provides a stylish and convenient addition to your hot tub.

Spa Side Handrail

This handrail's base plate slips securely under the spa cabinet for stability, and conveniently swings over the top of your spa – making it easy to reach when entering or exiting. It also features a battery powered LED light for added convenience and safety at night.

The Absolute Best Hot Tub Ownership Experience™

We are passionate about making the world's best hot tubs and delivering an unparalleled ownership experience. Our hot tubs are consistently recognised for outstanding quality and value. Hot Spring® spas are made by Watkins Wellness®, an experienced team with an average employee tenure of a decade. This dedication and experience means unsurpassed quality, confidence and reliability for you and your family, and many years of enjoyment in your Hot Spring spa.

Your Hot Tub Connection

We are the only hot tub brand to have sold more than one million spas—that means there are more Hot Spring spas in gardens than any other brand. In fact, some families are second or third-generation owners! We are the brand of choice, sold in more than 70 countries.

WatkinsWellness®

Feel good. Live well.™

Watkins Wellness, the leader in hot tub and aquatic fitness products, is part of MASCO Corporation, a Fortune 500 company whose family of quality home products includes:

We have earned SpaSearch Certification for providing a superior ownership experience every year since the award's inception in 2005.

The Best Hot Tub Retailers

When you choose a Hot Spring spa, you choose leading-edge innovation in spa features and design, as well as trained professionals. Our skilled local retailers deliver unmatched customer care before, during and long after your purchase. We have the most extensive network of genuine, passionate and helpful retailers in the industry.

A Brand You Can Trust

For more than 40 years, we have built our reputation on quality, but you do not have to take our word for it. Hear from real Hot Spring owners, people just like you at HotSpring.co.uk/Reviews.
