# The Group

Jaquar Global Headquarters  
A Net Zero Building, spread over 48,000 sq. mtrs.

## **Jaquar** GROUP

Conceived back in 1960, Jaquar Group was built on the platform of highest quality standards, aesthetics and with the intent of exceeding customer expectation. Today, Jaquar Group caters to premium and luxury bathroom segments with Jaquar and Artize brands respectively for residential and commercial sectors across the globe as a one stop destination for all bathroom products.

### **A Premium Bath Brand**

A leading global super brand known for its excellence in innovation and technology. The highest build standards combine with the most beautifully designed aesthetics to provide world-class products for tough conditions. With a superb blend of ergonomic shapes, contemporary styles and meticulous finish, Jaquar continues to enthrall millions of hearts across the world with its wide range of concepts and products.

## **A** **Artize**

### **A Luxury Bath Brand**

It pays a tribute to the fine traditions of exquisite craftsmanship and precision where design, technology and talent combine to deliver a masterpiece. Artize products are crafted for luxurious bath spaces. Perfect harmony is the very essence of Artize either together as coordinates or even as individual pieces. Artize exquisite craftsmanship is so stunning that they can inspire the design principles of not just your bath spaces but of your entire living spaces.

Masters of Innovation

Parichay Mehra

Lisa Bosi

Michael Foley

Jaquar's designs are the perfect synthesis of form and function.

At Jaquar, product designs meet global parameters of ergonomics, finish, material, safety, environmental impact and functionality. Jaquar products, designed by globally renowned designers, dominate millions of hearts across the world.

With a strong Research and Development Department that employs cutting-edge processes and equipment, our designers have the best of what modern technology has to offer. Such innovations, combined with the best brains in the industry and stringent quality checks of international standards, ensure an end product that is high in both, functionality and aesthetic appeal.

Danelon Meroni

Jaquar Group has been awarded quite a few accreditations. Some of them are mentioned below:

# Built on the highest quality standards

Jaquar is known the world over for its excellence in innovation and technology, continuous research and development, and being a leading, trusted bath brand.

Jaquar has been built on the platform of the highest quality standards, aesthetics, and the intent of providing world-class products. A one-stop solution for all bathing needs, Jaquar has high-performing faucets, showers, sanitaryware and wellness products in its coordinated portfolio.

## Key Highlights

- World-class brands, products and ranges for residential and commercial purposes
- One of the fastest growing bathing companies in the world
- Presence across 35+ countries in Europe, Middle East, Asia-Pacific and Africa
- 5 state-of-the-art manufacturing facilities spread over 250,000 sq. mts. with most modern machines and processes
- Delivers over 1.7 million bathrooms every year
- Produces over 24 million bath fittings annually
- Half a million happy new customers joining Jaquar family every year
- Over 8017 committed workforce across the globe

## Production Process

Be it mould-making, casting, grinding, polishing, electroplating, and finally, testing and assembly, Jaquar has the complete manufacturing process under one roof in a fully integrated plant. The factory is also constantly online with the marketing team, and engages in demand forecasting, using market information plus trends to predict demand.

## R&D

With a presence across 35 countries, Jaquar is a firm believer in maintaining good quality and fine design. This requires a strong Research and Development (R&D) Department. Jaquar has recently introduced an award-winning, cleverly concealed washbasin faucet and a soon-to-be-released state-of-the-art shower mixer that uses a customer's pre-fed data to prepare the temperature of bath water and the type of shower settings requested, beforehand.

Made for Tough Conditions

Jaquar uses the most modern and advanced global technological processes. Its in-house R&D and testing laboratories comprehensively analyse each functional aspect of every product to ensure absolute quality.

The result? Products that conform to not only the highest global standards, but are also capable of withstanding the rigours of tough usage conditions.

Go Green

## Technology that saves water!

As a major global manufacturer of bathing products, we at Jaquar are well aware of our responsibilities. Conservation of precious water as a natural resource has long been the primary goal of our sustainability efforts to help preserve the living planet for our future generations. Go Green is a philosophy embraced by Jaquar as a tenet of its design and production system to save water.

### Flow Restrictors

This is a revolutionary technology that lets your faucets and showers save up to 80% of water without compromising on the flow. Jaquar Flow Restrictors adjust the flow in both low and high pressure conditions and offer the same voluminous flow every time.

### Air Showers

Jaquar's Air Showers have a built-in air mixer that mixes air and water in a manner that makes shower drops lighter but voluminous. This revolutionary technology helps Jaquar Air Showers save up to 30% of water without compromising on the showering experience. Choose from a wide range of Hand and Overhead Jaquar Air Showers with single and multi-flow options.

### Pressmatic Faucets

Faucets with technology that allows only a fixed quantity (750 ml) of water to flow with every press of its knob. This mechanism not only prevents water wastage during each use, but also provides ease of operation. Jaquar Pressmatic Faucets are recommended for bathrooms of high traffic locations like restaurants, clubs, hotels, colleges, hospitals, airports, etc.

### Sensor Faucets

Faucets with technology that allows water to flow only when you need it and shuts it as soon as you move your hands away, resulting in zero wastage of water. There's no better way to save water than turning it off when you don't need it. Eg., while washing hands with soap, you can save water when lathering. Use Jaquar Sensor Faucets in high traffic areas like restaurants, clubs, hotels, colleges, hospitals, airports, etc.

### Dual Flush

Flushes that use more water than needed are the biggest water wastage culprits in every home. Jaquar's Dual Flushing Systems enable you to use either a combination of 3/6 ltrs. of water or 2/4 ltrs. of water, depending on your water closet. Jaquar's beta valve is designed to save 50-60% of water every day.

Flow rate options available:  
1.4, 2.5, 4.0, 6.0, 8.0, 13 LPM

Flow Restrictor

Flow Restrictor

70% Water + 30% Air = 100% Rejuvenation

### Three stages of washing hands with Sensor Faucets

Wetting your hands

Making lather with soap

Rinsing your hands

### Water consumption chart

	Time consumption in seconds			Water Consumption (A+B+C Stage)	SAVING
	A	B	C		
Single Lever Basin Mixer	5	12	7	4.31 L	BASE*
Sensor Faucet	5	Not in use	7	1.8 L	59%
Pressmatic Faucet	8	Not in use	8	3.01 L	31%

\*Base calculation is taken on Florentine basin mixer at 1 bar pressure

## Faucets

Jaquar Faucets provide a great experience with their high quality and superior performance. Jaquar's in-house, award winning design team is well integrated in its approach and helps to produce 60,000 faucets per day. Our state-of-the-art manufacturing units are backed by a world-class testing lab. That's why Jaquar Faucets conform to the highest quality and regulatory standards. Jaquar's passion for perfection reflects in the 10 years of warranty it extends on its faucets. The faucets comprise of 17 ranges to suit various design needs, besides a complete range of faucets with single-lever, quarter-turn and multi-turn operation.

# Faucet Technology

## Cartridges

The heart of every faucet, the cartridge is responsible for controlling water supply

- Jaquar cartridges are 5 lacs cycle tested to give a longer and trouble free operating life of up to 20 years (considering 60-70 operations per day)
- Wide angle of lever provides ultra comfort and flawless, smooth operation
- Our cartridge spindle is made of brass instead of plastic, to avoid breakage
- Works smoothly even at high temperatures (85 degrees) and in various pressure conditions (0.5 -5 bar)
- Recognised and approved by national bodies NSF-USA, ASME-USA, WRAS-UK, ACS-FRANCE

## Aerators

Devices that mix air with water to give a soft and splash-free flow

- Our integrated honeycomb structured aerator, provides lime build up protection
- Integrated anti-clogging dome screen of the aerator filters sediments and dust particles

## Chrome Finish

Upper shiny protection layer provides a mirror finish to every faucet

- High plating thickness (Nickel: 10 microns and Chrome: 0.3 microns) provides tolerance to extreme climate and water conditions
- 450+ hours of salt spray test ensures our finishes are highly durable and corrosion resistant for a much longer duration

Soft Water Flow

Operates Smoothly

Higher Longevity

Higher Durability

## Sanitaryware

Jaquar Sanitaryware provides you with a wide range of designs and features to enhance your bathroom décor perfectly. Our wide range of washbasins, offering Wall Hung, Over Counter, Under Counter and Counter-top installation are well coordinated with Jaquar's exquisite range of taps. What's more, our water closets with single piece, coupled and wall mounted options, fit into your coordinated design and installation parameters perfectly. Their user-friendly, as well as two push-button activated dual-flush technology provide you the choice of using 3 ltr. or 6 ltr. flush options.

## Features

### Anti-Germ Glazing

Anti-Bacterial Glaze is a powerful Fluoro-Polymer coating of 20 to 100 nanometer thickness. It is applied on Jaquar WCs and Wash Basins through a special process and provides the following benefits:

- It forms a strong hydrophobic shield which prevents the build-up of bacteria and germs
- Ideal for world's humid weather conditions
- Renders the surface durable and highly repellent to dirt, oils and liquids
- Facilitates easy removal of hard water deposits

### Clean and Odour-free WCs

The interior portion of the traps of water closets are glazed

- Ensures the trap does not collect dirt or give out odour
- Prevents dirt from sticking inside the trap
- Facilitates easy flushing and waste removal
- Ensures clean and odour-free bathroom

### Easy Installation

- Flatness of parts getting fixed to the wall
- No gaps between the wall, floor and the fitting portions of the sanitaryware
- Perfect fitting for a perfect look
- Elongated rag bolts roles are elliptical in shape, hence it is easy to install

### Soft Closing Detachable UF Seat Cover

- Load bearing capacity of over 150 kg (seat cover and bushes)
- Shape and texture of the seats unaffected by temperature variations
- Does not absorb room temperature therefore the seats are neither too hot nor too cold to touch
- Surface is resistant to stains and strong dyes
- Does not deform or peel-off with use
- Special buffer oil is used in the hinges for lasting functionality
- Soft-close action to eliminate noise of falling of the cover. This is guaranteed for 2 years
- Adjustable speed of falling of the cover within a range of 1 to 15 seconds that leads to silent operations

### 10 Years Warranty

### After Sales Service

Large service network for complete peace of mind. Jaquar also offers preventive maintenance services for hassle free bathrooms.

### Uniform Standard

Uniform grades of product available for retail and project. No differentiation in terms of product quality, design and colour.

### Stringent quality parameters:

- Load Bearing Test 400 kgs for WC & 100 kgs for WB
- Autoclave Test for Craze Resistance
- Chemical Resistance Test to negate the possibility of stains
- Spectro Photometer Test for colour stability
- Flushing Tests: (a) 100 Ball Test (b) Ink Test

### FLR-CHR-5659

Florentine Thermostatic Bath & Shower Mixer, Deck Mounted

### EKO-CHR-33673LWR

Eko Thermostatic Shower Valve with 115 mm Long Bend pipe on Lower Side, Wall Mounted

**Features:**

- Cartridges made of high performance thermostatic polymer materials that meet the global standards for high and low pressure
- Option of pre-setting the cartridge at a specific temperature (as desired)
- High technology thermoplastic polymer minimises lime-scale build up
- One of the best in terms of temperature regulation and safety in accordance with various standards: NF EN 1111 (marquee NF077), A, SSE1016 & NHSD08
- Standard temperature range: 15°C to 60°C (59 -104 degree F)

**Benefits:**

- Jaquar's first thermostat that works even in low pressure (Suitable for indian conditions)
- Temperature remains constant for the complete duration of your shower
- No temperature variation, even if there is sudden drop in pressure (if someone uses hot water in the kitchen or if someone flushes a toilet)
- In case of a failure of cold water supply, the thermostat will completely shut off the hot water, preventing scalding from hot water
- Provision of re-starting the shower-no need to adjust the temperature time and again
- Child lock prevents children from increasing the temperature by mistake

## Features

### No-Bacteria Zone

Anti Bacterial Glaze is a powerful Fluoro-Polymer coating of 20 to 100 nanometer thickness. It is applied on Jaquar WCs and Washbasins through a special process and provides the following benefits:

- It forms a strong hydrophobic shield which prevents the build-up of bacteria and germs
- Ideal for India's humid weather conditions
- Renders the surface durable and highly repellent to dirt, oils and liquids
- Facilitates easy removal of hard water deposits

### Clean and Odour-free WCs

The interior portion of the traps of water closets are glazed

- Ensures the trap does not collect dirt or give out odour
- Prevents dirt from sticking inside the trap
- Facilitates easy flushing and waste removal
- Ensures clean and odour-free bathroom

- Warranty

### Easy Installation

- Flatness of parts getting fixed to the wall
- No gaps between the wall, floor and the fitting portions of the sanitaryware
- Perfect fitting for a perfect look

### Soft Closing Seats

- Load bearing capacity of over 150 kg (seat cover and bushes)
- Shape and texture of the seats unaffected by temperature variations
- Does not absorb room temperature therefore the seats are neither too hot nor too cold to touch
- Surface is resistant to stains and strong dyes
- Does not deform or peel-off with use
- Special buffer oil is used in the hinges for lasting functionality
- Soft-close action to eliminate noise of falling of the cover. This is guaranteed for 2 years
- Adjustable speed of falling of the cover within a range of 1 to 15 seconds

### Stringent quality parameters

- Load Bearing Test 400 kgs for WC & 100 kgs for WB
- Autoclave Test for Craze resistance
- Chemical resistance test to negate the possibility of stains
- Spectro Photometer Test for colour stability
- Flushing tests: (a) 100 ball test (b) Ink test

Metropole Dual Flow In-wall Flush Valve,  
40 mm Size for Western Commode with  
Rectangular Dual Flush Plate

## I-Flush

### FLV-CHR-1075

In-wall I-flushing system, 20 mm with dual flush push button actuation & control stop cock

### The I-Flush advantages

- Installs directly in 20 mm (3/4") pipeline
- Saves money and water
- Saves the space needed for a flush tank
- Makes repeated flushing possible, unlike In-wall cisterns which take time to fill up after flushing
- No need to wait if waste is not cleared in one flush
- Makes flushing less noisy than cisterns
- In-built control/regulator valve
- Easy maintenance - the control stopcock can be shut with the help of a control key provided on the plate. The cartridge can be accessed by simply removing the front actuation plate
- Aesthetic appeal - slim wall plate imparts a clean look to the bathroom
- Works even at a pressure as low as 1.5 bar
- In I-Flush from duct bend to product's inlet, the pipeline used is 20 mm, resulting in savings

## Flushing Systems

In order to bring you the latest and the most advanced bath products, Jaquar, a complete bathroom solutions provider presents a design revolution—the superbly designed high quality flush plates manufactured by Jaquar.

Besides modern designs that offer a sleek look to bath spaces and outstanding features like water-saving, easy access maintenance and anti-condensation, Jaquar In-wall Cisterns ensure that your bathrooms look spacious, clean and hygienic at all times.

#### Features:

**Saves Water:** Impressive Dual Flush with a provision of 3/6 ltr flush (Can be adjusted to 2/4 ltrs)

**Less Noise:** Technically advanced, silent flush valve and fast-filling hydraulic float valve minimises the flushing sound during usage

**Perfect Pan Cleaning:** Heavy and even water discharge during every flush at every water pressure

**No Damage from Condensation:** Has anti-condensation lining wrapping the tank and supply bend to protect damage from masonry condensation

**Easy to install and maintain:** Jaquar's floor standing frames with In-wall Cisterns not only provide the benefits of easy, quick and perfect installation but also allow you to choose contemporary wall mounted sanitaryware of your choice for the bathroom.

#### Features:

**Easy Installation:** Easy and hassle free installation as no chiselling of wall is required

**Load Bearing Capacity:** Wall hung WC can be bolted simply and securely to the frame, which can take a load of up to 400 kg.

**Wide Compatibility of WC:** Accommodates different types of wall hung WCs as holes are provided at different heights

**Perfect Easy Alignment:** Fixed inlet and outlet distance (135 mm from centre to centre) means perfect installation of WC, and pre-defined space for cistern results in perfect flushing every time

**Adjustable Height:** Adjustable legs (0-200 mm) to allow for variation in heights of WC, as required

## Cistern

### WHC-WHT-184BTL

## Showers

Jaquar showers are designed to deliver a range of experiences, to let you have a shower of your choice every time. Our overhead, hand and body showers complement a wide range of shower systems, catering to your unique showering habits, design and installation requirements.

Our advanced showers are designed to deliver great precision and consistent water distribution to each individual nozzle. Jaquar showers give you a choice of up to 5 different flows matching your mood. Whichever flow you choose, you will be assured of an ultimate experience every time.

## Features

### Advanced Rubit Technology

A feature that keeps showers clean and increases their longevity. Since the spray jets on the showers are made from elastic silicon, they ensure that no lime scale deposits stick to the shower face. Even if they do, they can be easily rubbed off by hand or flannel.

### Click Position System

All Jaquar multi-function showers feature the convenient click mechanism. You can feel and hear the click while changing the function of the shower sprays.

### Thermo Insulation

Jaquar's insulated shower systems prevent scalding by not heating up the shower body.

### Jaquar Booster Technology

Jaquar Booster Technology creates the sensation of a full shower regardless of the water pressure.

Discover a beautiful new showering experience that's softer, smoother, fuller. Jaquar Maze Showers deliver an unmatched showering experience even in low water pressure conditions and a softer, cozier feel in high water pressure conditions. Maze showers' contemporary, minimalistic, one-of-its-kind design incorporates the shower nozzles in groups of concentric lines, imparting it an aesthetic that completes the look of the modern bathroom.

Maze Showers are easy to maintain and are built to endure varying water pressure conditions with a Jaquar-patented inverted riveting technology for leak-proof showering.

## Rain Showers

### OHS-CHR-1741

LED Single Function 234 mm dia Round Shape Overhead Shower

### OHS-CHR-1743

LED Single Function 250X250 mm Square Shape Overhead Shower

A light emitting shower which transforms the stream of water into beautiful waterfall of light.

- **Hydro Power:** Powerful electric energy for LED, which is generated by water power. Does not require any battery or electrical power supply.
- **LED:** The sensitive shower light changes its colour with change in temperature.
  - Water glows Red when temperature is above 42°C
  - Water glows Purple when temperature is between 32-42°C
  - Water glows Blue when temperature is less than 32°C
- **Rain:** Immersing your body in a heavenly rain, experience nature's downpour.

## Shower Enclosure

## Features:

Jaquar's Ready-to-Fit Shower Enclosures are a must for every bathroom to minimise the dangers of slipping and falling.

- Readily available in standard sizes
  - Separates dry and wet areas and optimises bath spaces
  - Easy Clean (Anti Limescale Treatment)
  - Brass Hardware
  - Made of toughened safety glass and high-quality hinges
  - Choose from Frameless, Semi-framed and Framed enclosures
  - One-stop solution (Design – Installation – Maintenance)
  - Available at leading sanitaryware stores
  - 5 Years Warranty on Hardware
- 

## Glass:

Tempered glass: Option of 6 mm, 8 mm and 10 mm

Advantages of tempering/toughening glass:

1. 4-5 times stronger than normal float glass
2. Breaks into small pieces/dices minimising risk of injury
3. Can resist thermal stress as edge strength is higher

Tempering done at Jaquar's own fully automatic state of the art tempering unit

- Tempering for shower enclosure glasses only
  - 90% of an enclosure is glass, so glass must conform to the highest safety standards as it is used in the bathroom
- 

## Quality checks:

- Fragmentation test: to check breakage pattern of glass
  - Zebra test: no waviness
  - Ball drop test (impact resistance): to check strength at point of impact
  - Visual defects: to check bubbles, scratches, chipping at edges and other visible defects
  - Free fall test: to check overall strength of glass, by throwing the glass freely on a plain surface
- 

## Standards:

- These standards ensure that the glass passes stringent quality parameters
  - Ensures consistency
  - Enhances life of the product conforms to both European and Indian standards
- 

## Reference: India

- IS 2553 (part 1: 1990)
  - IS 14900: 2000
  - IS 2835: 1987
- 

## Reference: Europe

- En 14450: 2000
  - Adheres to European toughening norms
- 

## Hardware:

Frameless Range

- Hinges
    - Minimalist and sleek design to make entire enclosure look aesthetically appealing
    - Made of brass with nickel and chrome plating
    - Automatic closing up to 300
    - Tested for 5 lakh cycles
    - Rust proof screws
    - Screw caps
    - Protective film on the hardware to prevent scratches etc.
    - Designed to carry loads of up to 25 kg (per hinge)
    - Gasket
    - Food grade plastic
-

- **Glass Connectors:**

- Minimalist and sleek design to match the hinges
  - Made of brass with nickel and chrome plating
- 

- **Stabilisers:**

- SS 304 grade
  - Mirror finish to match chrome finish of the hinges and connectors
  - 19 mm dia.
- 

- **Towel Bars:**

- Longest towel rod (405 mmx205 mm) to hang 2 towels
  - Brass with nickel and chrome finish
  - 19 mm dia.
  - No visible screws
- 

**Plastic Parts:**

Semi-Framed and Frameless Range:

- Made of food grade plastic
  - Finish
    - Sleek to match with hardware
    - Transparent look complementing glass
    - Enhances aesthetic appeal of enclosure
  - Concealed magnet ensuring longer life
  - 5-year warranty for complete peace of mind
- 

- **Replacement even if it turns yellowish**

---

- **Profiles instead of wall connectors**

- Aluminium profiles with powder coating
  - Aluminium is first cut to size, then chemically treated and then powder coated so that there is no chance of rusting
  - Adjustment of 15 mm so as to cover undulations in the wall
- 

- **Hinges**

- Rise and fall mechanism: door rises 6 – 8 mm above the floor while opening thus preventing any chance of breakage
- 

**Sliding Range:**

- Top hung channel – gives free walk way
- Wall profiles: sleek with 15 mm adjustment
- Rollers: ball bearing encapsulated in brass
- 5-year warranty on rollers

2001 x 2200	2000	BSD-CHR-SDR2022X

Dimensions can be customized

## Shower Panel

Jaquar's Shower Panels make showering much more convenient, since they are almost like shower stalls which fit even in a small bathroom.

**Advantages:**

- **Maximisation of bathroom space:** Since they are designed to be mounted on the wall, not much floor space is required to accommodate the unit
- **Versatility:** Instead of using a single shower head, many shower panels are available with multiple water outputs
- **Economical:** Jaquar panels are available in a wide range of prices, styles, colours, sizes and designs to suit different needs

Jaquar shower panels are an easy way to increase the functionality of your existing shower area, as they can neatly fit on to the wall via their wall bars

### Infinity JPL-BLK-G0842JAX

#### Specifications:

Size 1500 x 200 mm

Infinity Shower Panel (Black mirror finish)

- 2 Jets
- Head Shower
- Hand Shower
- Spout
- Shampoo Shelf
- Minimum Water Pressure 2 bar

### Blak

#### JPC-BLK-JA011

#### Specifications:

Size 1500 x 200 mm

- Stainless steel structure
- 3 adjustable vertical jets (Square)
- Integrated shower head (8" Square)
- Thermostatic mixer with diverter
- Hand shower with flexible hose
- Button Spout
- Connecting Hose
- Minimum Water Pressure 2 bar

### Curve

JPC-SLM-JA021

#### Specifications:

Size 1500 x 230 mm

- Anodized Aluminium structure
- 3 adjustable vertical jets(Round)
- Integrated shower head (8" Round)
- Thermostatic mixer with diverter
- Hand shower with flexible hose
- Button Spout Connecting Hose
- Minimum Water Pressure 2 bar

### Infinity White

JPL-WHT-G0843JAX

#### Specifications:

Size 1500 x 200 mm

Shower Panels Infinity Mdl G084-3ja (White)

- 2 Jets
- Head Shower
- Hand Shower
- Spout
- Shampoo Shelf
- Minimum Water Pressure 2 bar

### Shinny

#### JPL-SSF-ST8896

Chrome Plated With Stainless Steel Finish

##### Specifications:

Size: 1600 x 230 mm

- Body material chrome plated stainless steel
- Movable ABS top shower
- Brass waterfall
- Movable ABS body massage jets
- Chrome plated ABS hand shower
- Brass spout
- Brass faucet body with thermostat mixer
- Multifunction water diverter for top shower, waterfall, hand shower, body jets, spout
- 40cm stainless steel braided hose
- 1.5cm stainless steel double locked flexible hoses
- Minimum Water Pressure 2 bar

### Selfy

#### JPL-SSF-ST88158B

Anti Finger Print With Stainless Steel Finish

##### Specifications:

Size 1600 x 200 mm

- Body material anti fingerprint stainless steel
- Inbuilt ABS Top shower with 60 nozzles + waterfall
- Movable ABS body massage jets
- Chrome plated ABS hand shower
- Brass spout
- Embedded shelf
- Brass faucet body with thermostat mixer
- Multifunction water diverter for top shower, waterfall, hand shower, body jets, spout
- 40cm stainless steel braided hose
- 1.5cm stainless steel double locked flexible hoses
- Minimum Water Pressure 2 bar

### Glassy - White JPL-WHT-ST86113

White Tempered Glass With Special Surface

#### Specifications:

Size 1400 x 250 mm

- Body material: Tempered glass with glass special surface + PVC back
- Moveable ABS top shower
- Moveable ABS body massage jets
- Chrome plated abs hand shower
- Brass spout
- Glass platform
- Brass faucet body with thermostatic mixer
- Multifunction water diverter for top shower, hand shower, body jets, spout
- 40 cm Stainless steel braided hose
- 1.5m stainless steel double locked flexible hoses
- Minimum Water Pressure 2 bar
- Minimum Water Pressure 2 bar

### Glassy - Black JPL-BLK-ST86112

Black Tempered Glass With Special Surface

#### Specifications:

Size 1400 x 250 mm

- Body material: Tempered glass with special surface + PVC back
- Moveable ABS top shower
- Inbuilt ABS body top shower
- Chrome plated ABS hand shower
- Brass spout
- Glass platform
- Brass faucet body with thermostatic mixer
- Multifunction water diverter for top shower, hand shower, body jets, spout
- 40 cm Stainless steel braided hose
- 1.5m stainless steel double locked flexible hoses
- Minimum Water Pressure 2 bar

- 1 Thermostatic diverter which ensures anti scalding during showering
- 2 Jaquar shower panels are made of steel or a P mmA body finish
- 3 Contains 3 adjustable vertical jets for massaging the neck, waist and thighs
- 4 Jaquar shower panels are pre-fitted with overhead and hand showers and are easy to install

## Whirlpool

Jaquar proudly presents its own range of whirlpools. Created by specialist designers from Europe and made in Jaquar's state-of-the-art manufacturing facilities. Jaquar Whirlpools bring wellness into your home with great style and panache. Their jets project water in a flowing, circular motion, which offers a wide array of health benefits, including relaxation, improved blood circulation and sore muscle and joint relief. Whatever you desire, whether hot or cold water massages, long relaxing soaks or even chromotherapy, a Jaquar Whirlpool gives you all these and more. Easy-to-use manual or remote functions flawlessly switch water modes for your benefit.

---

### Advantages:

**Hydromassage:** A gentle jet stream massage bath that stimulates from the surface of the skin onwards. The deep tissue massage stimulates blood vessels and nerve endings and relaxes your body's entire muscular system.

**Air Massage:** An infinite number of air bubbles provide a caressing sensation on the skin and allow the water's soothing warmth to penetrate deeper into the body's tissue. This sensational feeling, akin to weightlessness, is accompanied by a deep experience of healing warmth.

**Chromotherapy:** The use of various coloured lights offers additional therapeutic benefits when used in conjunction with the whirlpools massage. These include:

Green: has harmonious effects on the digestive system

Yellow: radiates sun-like warmth on the body

Blue: is calming and soothing and lets you float away in to your dreams

Red: infuses energy and vitality, giving lost strength to the entire system

---

### Features

The unbeatable product features are:

- Brilliant surface of sanitary acrylic
- Antibac® hygienic surface
- High break strength
- Excellent design possibilities
- Low specific weight
- Repairable
- Warm surface
- Increased chemical resistance
- Long life in use
- Easyglide® layer
- Recyclable

---

### Bathtub Layers:

Special transparent acrylic top layer has a high chemical resistance to: cleaning agents, perfumed foams, household detergents, body care products special transparent acrylic top layer prevents surface defects, crazing/cracking, decoloration and color fading.

Special polymer for better mechanical resistance to impact and temperature Polyurethane layer is recyclable and uses ecological material with high insulation that retains the temperature for a longer period than FRP.

---

### The PMMA Advantage

The carrier layer consists of an easily thermo-formable and high impact ABS and the top layer is in impact-modified acrylic (PMMA).

In order to maintain the colour stability of the finished product after extended external use, the PMMA layer is homogenously matched in the colour of the carrier layer. Due to the reinforcement with 20mm of plywood at the bottom, the tub doesn't develop cracks at the bottom when filled with hot water.

---

### Air Suction Valve

There is an additional pipeline in the water circuit which is connected to all the water jets. This pipeline is connected to a pump with a heating coil which sucks atmospheric air, heats it and distributes it to each and every water jet to boost the jet pressure.

---

### Safety Vacuum Breaker

This is one of the important safety features installed in Jaquar whirlpools. In case of blockage in the suction point the motor switches off automatically.

### **No Bacteria Formation. Fresh Water Everytime**

The water pipes connect via V-shaped housings, creating a bow which ensures the complete drainage of water. Unpleasant odours and, even worse, bacteria are thus avoided.

---

### **Environment Friendly**

The pipes are made from special Food Grade PVC. These pipes have an anti bacterial coating on the inner side so that even if some drops of water stay behind after the tub is drained, there won't be any bacteria formation in the water droplets.

---

### **3 Tier Test**

Each and every Jaquar whirlpool goes through a functional test with hot water after which it is tested on a European test machine for earthing resistance, insulation test and a high voltage test.

---

### **Easy To Use**

The digital/manual control activates all the hydromassage functions, to regulate Airpool intensity. All electronic parts can be installed and removed on site, thus making after-sales, what it should ideally be - a service !

---

### **Water Jets**

The effectiveness of the hydromassage is enhanced by the exclusive performance of the Glass patented "JET CLEAN" nozzles. They have orientable nozzles with partial closing system. The water flow can be adjusted in intensity and direction to suit personal needs, in order to gently massage delicate areas with capillary fragility and give a more energetic massage to areas that need more vascular stimulation

---

### **Airpool Jet**

The airpool jets are made of plastic and provide a gentle and delicate massage on your spine, which increases the sensation of warmth in the body and has beneficial effects on the back. When immersed in water, the body builds up a protective layer which insulates the body. The air bubbles open the insulation layer releasing oxygen, and stimulating blood circulation. It optimises the transfer of warmth and the feeling of wellbeing.

Free standing one-piece bathtub

Pop-up drain

## Spas

Spas are a wonderful way to relax and restore equilibrium. Jaquar's spa models are technological marvels whose 'well being circuits' comprise of various seats and a common footrest in the centre. Each seat is strategically fitted with different types of massage jets in various positions, oriented to massage different parts of the body. By moving from one seat to the other, one can enjoy a complete and satisfying massage that stimulates and relaxes all parts of the body. Cushioned headrests, ergonomic seats and a host of high performance features make this the ultimate home spa experience.

#### Advantages:

- **More economy**

An array of energy efficient technologies make our spas more economical to run and easier to enjoy more often without worrying about power consumption.

- **Cleaner, healthier water**

Unlike swimming pools, Jaquar Spas don't use harsh chemicals that can be harmful for the skin. Our spas feature advanced water treatment technologies to ensure the cleanest, clearest water.

- **A superior experience**

Jaquar Spas have superior hydrotherapy performance and features that are usually reserved for the world's most expensive spas.

- **Guaranteed to last longer**

Every Jaquar Spa is hand crafted using industry leading techniques and materials, which is why we can guarantee the spa shell for 10 years.

- **Easier to maintain**

Jaquar Spas give you the ultimate in easy care spa ownership without needing to spend much time on maintenance, or have a degree in chemistry to enjoy crystal clear water.

#### Features:

##### Technologies that save energy and money

To let you enjoy using them without worrying about the power bill, Jaquar Spas come with a whole range of energy efficient technologies.

---

##### Cabinet Insulations

Jaquar Spas have insulation in the perimeter of their cabinets to maintain the warmth of the water, and the spa's plumbing and equipment, further reducing your energy costs. The insulation system has two features that make it superior to the traditional 'foam on shell' spa insulation system. By insulating the cabinet instead of the shell, Jaquar Spas not only retain heat from the pumps and equipment, but also insulate the plumbing that otherwise would lose heat to the environment. This results in less overall heat loss and lower running costs. What's more, the insulation reduces the noise of the spa pumps so you will also enjoy a quieter, more tranquil spa experience.

---

##### Intelligent Thermal Regulation

Allows the spa to tune itself to its environment, day-to-day and season-to-season, thus reducing your heating costs by up to 20%.

Thermal performance and heat retention is what distinguishes one spa from another. Jaquar's control system adapts and tunes itself to the thermal properties of your spa pool, in its environment, day-to-day and season-to-season, to reduce 'on demand' heating. The control system of a Jaquar Spa actually 'learns' how your spa is used. By reducing the temperature drop required before the heater switches on, it provides more consistent spa water temperatures and lowers daily operating costs.

---

##### Smart Meter Ready

Even if your electricity provider does not currently offer smart meters, they soon will. A smart meter allows your electricity supplier to charge higher prices in periods of high demand, but rewards consumers who shift their consumption to low demand periods such as overnight. Using Power Save software, Jaquar spas can be designed to do the filtering and heating when power costs are at their lowest. Best of all, the control is in your hands. You can tailor the operation of your Jaquar Spa to take advantage of smart meter technology and reduce your running costs.

#### Purezone Micro Filtration

The top priority of an effective water treatment system is to remove waterborne contaminants. Conventional filters only trap particles up to 50 microns in size.

#### A luxurious spa experience

Jaquar Spas have superior hydrotherapy performance and features that are seen in the world's most expensive spas

#### Hydroflow jets

A Jaquar Spa's hydroflow jets are designed to maximise jet pressure and provide a world-class hydrotherapy experience. We choose from a multitude of directional, spinning and fixed jets to create a different massage action in each seat. Some seats give a broad massage using wide sweep rotational jets, whilst others provide a pinpoint, Shiatsu-style massage.

#### Ergonomic design

Jaquar Spas are designed to maximise your comfort. Jets are positioned to massage tired muscles. The controls are within easy reach. And relaxation comes automatically.

#### Easy to operate

Jaquar Spa control systems are intuitive and easy to operate and offer maximum flexibility and control. The top side panel controls most functions with one touch of a button. More advanced controls can be accessed through the simple English menu functions.

#### Two lounge seats

To avoid arguments over who gets the spa's lounge (usually the most comfortable and most coveted seat in the spa), most Jaquar spas have two luxurious hydrotherapy loungers.

#### Individual pressure control

To ensure complete satisfaction for all, each seat in your Jaquar Spa can be controlled with the seat's pressure control dial. In addition, most jets can be individually controlled, directing pressure to where you need it most.

#### Dynamic lighting options

Flood lighting, jet lights, backlit drink holders and water features, waterline illumination and access lighting can all be added to your Jaquar Spa to enhance your experience. Lighting programs can be controlled using the spa's topside controller.

#### Neck therapy collar

Optional on most Jaquar models, the neck therapy collar incorporates jets specially designed to eliminate stress and tension carried in the neck and shoulder area. Opt for the neck therapy collar to soothe away the stresses of your day.

Our contemporary colour palette is hand selected from the latest Australasian home design fashions. Created to please those with the most discerning tastes looking for intelligent colour solutions

Neon

206X169X82 - (3 Seater)

The Neon offers the maximum amount of hydrotherapy within a compact spa. If you are short of space but still require maximum therapeutic benefit, then Neon is the correct choice.

Specifications:

Size	206 x 169 x 82 cm
Dry Weight	300kg
Filled Weight	1200kg
Water Capacity	900 litres
Intuitive Spa Controller	SV2
Programmable Circulation Pump	350W
Jet Pump(s)	2.5x1 hp
Variable Speed Air Blower	1000W
Variable Output Heater	3kW max
Electrical Requirements Max	15 amps

Jets

Hydrozone

590X230X130 - (5 Seater)

Our flagship Hydrozone offers benefits of separate therapy/relaxation and swim zones. This gives you the ability to run the exercise zone and hydrotherapy zone at different temperatures.

Specifications:

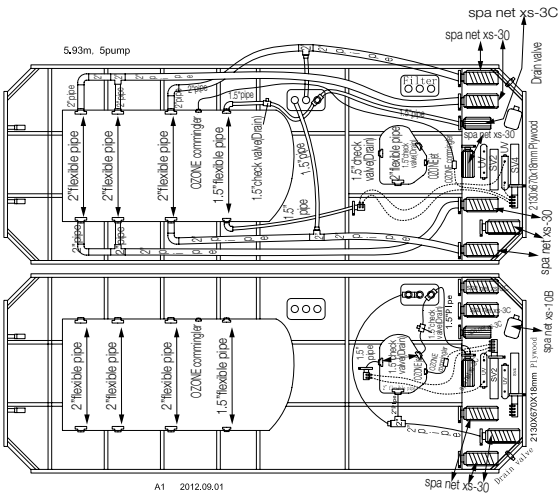

Size	590 x 230 x 130 cm
Dry Weight	1382kg
Filled Weight	9902kg
Water Capacity	Spa 1530 ltr, Swim 7030 ltr
Spa Controller	SV4 + SV2
Programmable Circulation Pump	250 WX2
Jets Pump(s)	2.5 hp x 4, 2.5 hp x 1 hp
Variable Speed Air Blower	700W
Variable Output Heater	6 KW max / 3 KW max
Electrical Requirements	Max 60 amps

Features

- Extreme Heat Lock Insulation
  - Set & Forget Control System
  - Multi Layer Shell Construction
  - Reinforced Foot Wall
  - Noiseguard Sound Dampening
  - Purezone Filtration
  - Programmable Circulation Pump
  - Programmable Multicolor Spa Light
  - 2.5hp (5.2bhp) Jet Pump
- Hydrotherapy Recliner
  - Water Spout
  - Dual Controllers
  - Up to 4 Swim Jets
  - Moulded Headrests
  - Backlit Water Cascade
  - Adjustable Aromatherapy
  - Lockable Hardcover
  - UV

Water Cascade Jets	2
Swim Jets	4
Laminar Jets	6
<b>Total</b>	<b>76</b>

Specifications:

Size	234 x 234 x 92 cm
Dry Weight	330kg
Filled Weight	1980kg
Water Capacity	1650 litres
Intuitive Spa Controller	SV2
Programmable Circulation Pump	350W
Jet Pump(s)	2.5x1 hp
Variable Speed Air Blower	1000W
Variable Output Heater	3kW max
Electrical Requirements	Max 15 amps

## Features

- Extreme Heat Lock Insulation
- Set & Forget Control System
- Multi Layer Shell Construction
- Reinforced Foot Well
- Noiseguard Sound Dampening
- Purezone Filtration
- Programmable Circulation Pump
- 2.5hp (5.2bhp) Jet Pump
- Twin Recliners
- Kiddie Seats
- Foot Jets
- Programmable Multi-Colour Spa Light
- Moulded Headrests
- Backlit Water Cascade
- Wine Cooler
- Adjustable Aromatherapy
- Lockable Hard Cover
- Illuminated Topside Controls
- Spa Status Indicator Light
- UV

Gemini

210X110X74 - (2 Seater)

The Gemini is our compact 2 person luxury spa. Despite it's smaller size, it features stainless steel jets, water features and a fantastic lighting package. It uses the same big pump as our larger spas meaning the jet pressure and therefore hydrotherapy is tremendous. Gemini uses a 2 speed pump and Gecko control system. The pump operates on low speed when in heating and filtering modes and switches to high speed when in massage mode.

Specifications:

Size	210 x 110 x 74 cm
Dry Weight	160kg
Filled Weight	860kg
Water Capacity	700 litres
Spa Controller	Gecko
Jet Pump(s)	2.5x1 hp
Heater	1.3kW
Electrical Requirements	Max 15 amps

Features

- Perimeter Insulation
  - Thermobond 4 Layer Shell Construction
  - Duraflex Plumbing
  - Thermoplastic Frame
  - Fibreglass Base
- Underwater Flood Light
  - Backlit Drink Holders
  - Chromo Cascade Grab Bar
  - Thermoclad Cabinet
  - Lockable Hardcover
  - UV

## Saunas

A Sauna is a bathhouse or room, usually made of wood, which uses dry heat to induce perspiration, with steam being produced by pouring water on heated stones. Perspiration or sweating is one of the main ways our bodies get rid of the traces of hundreds of toxins that accumulate inside us from pesticides, drugs and manmade chemicals. 15 minutes in a Jaquar Sauna can help us sweat as much as we might otherwise do over an entire day or more. And the benefits of this are many – ranging from relieving common cold symptoms to aiding in medical conditions like chronic fatigue, rheumatoid arthritis, musculoskeletal pain, and even cardiovascular and skin conditions. Sauna sessions can also improve performance in endurance sport and help recuperation after childbirth.

#### **Advantages:**

##### ■ **Detoxification**

Saunas stimulate the body to release fat-soluble toxins, heavy metals, and other toxic chemicals in sweat via pores more effectively than any other forms of heat therapy or exercise. Reports have been made that it can relieve the symptoms of drug-induced lupus. The list of chemicals claimed to be removed from the body includes: mercury, lead, copper, cadmium, manganese, sodium, chloride, arsenic, nickel, benzenes, street drugs, prescription drugs, anaesthetics, cholesterol, urea, nicotine, sulfuric acid.

##### ■ **Immune System Enhancement**

A typical sauna session will cause a brief 1 to 3 degree F increase in body temperature. Fever is the body's defence against bacteria, microbes and consequent infection. The production of white blood cells by the bone marrow and killer T cells by the thymus- results in boosting immunity, overall.

##### ■ **Stress**

Continuous strain on the autonomic nervous system leads to a high level of stress, one of the elusive causes of many chronic diseases.

##### ■ **Weight Control**

A 15 minute sauna session is as effective for weight loss as rowing or jogging for 30 minutes. The improved blood flow to organs and endocrine glands speeds up their metabolic process, increasing caloric burn. Because fat becomes water soluble at 110 degrees F, subcutaneous fat can be released along with the sweat and toxins.

##### ■ **Cardiovascular Conditioning**

The human body will naturally try and cool itself as temperature increases. It does this by diverting blood from the internal organs to the extremities and skin by vasodilation. This increases heart rate, cardiac output and metabolic rate.

##### ■ **Cellulite**

Cellulite is a gel-like substance made up of fat, water and wastes, which are trapped in pockets below the skin. Profuse sweating is purported to clear this form of unwanted debris. A Sauna is effective in cellulite removal when used in conjunction within a program that includes diet and massage.

##### ■ **Pain Relief and Control**

Saunas help to eliminate or reduce the pain of arthritis, muscle spasms, shoulder pain, neck and back pain, sprains of any area, and reduce scar tissue and adhesions. Will rapidly increase the healing process in any non-acute injury.

##### ■ **Skin Cleaning and Rejuvenation**

Saunas open clogged pores allowing for removal of dirt, oil, and makeup. In addition, there are improvements in skin problems such as acne, rashes, burns, eczema and psoriasis. Scars, even keloids, may be gradually softened.

## Steam Cabins

For those seeking wellness in the comfort of their homes, a Jaquar Steam Cabin is a great way to enjoy the benefits of humidifying water vapour from a high-quality steam generator.

**Advantages:**

■ **Clearer skin:**

Steam showers have the ability to unclog pores and remove deeply trapped congestion from under the surface of the skin

■ **Infection treatment:**

A major benefit of regular steam showers is relief from respiratory infections

■ **Increased circulation:**

Steam showers are an excellent way to naturally boost circulation throughout the body. Increased circulation brings more oxygen to cells and decreases the risk of hypertension, hardened arteries and muscle function

■ **Stress relief:**

One of the most powerful benefits of steam showers is their ability to reduce both physical and mental stress

■ **Metabolism and weight loss:**

Hot steam increases blood flow by stimulating the lymphatic system which, in turn, helps to speed up the metabolism

**Features:**

**Absolute Quality of Materials**

Jaquar Hydromassage showers are made of co-extruded acrylic, which does not discolour and has a long life. This hygienic material, together with the smooth surfaces and tempered glass shower enclosures, makes cleaning an easy part of the product experience.

**Stability and Mechanical Resistance**

Jaquar shower boxes are characterised by stability and solidity, thanks to the zinc-plated steel frame that ensures maximum rigidity of all the components. Stability and mechanical resistance are also the attributes of the shower tray reinforcement.

**Easy Installation**

The installation of the shower boxes is as easy as it can be: the metal frame carries the elements and is simply put together.

**Safety**

The range of hydromassage showers meets all the relevant safety standards which are currently in effect. Extra safety that goes beyond any norms is part of the product values that any demanding customer can expect from a leading product. For example, the shower tray surface is ribbed, providing for an excellent anti-slip feature. The steam generator will turn itself off automatically after the preset timeout, avoiding wasting energy and the risk of overdoing a steam bath.

**Digital Control**

It allows you to manage all manual control functions including sequential back rain jets, back jets, waterfall cervical massage, duration of vertical hydromassage, steam bath function, light, radio and white LED lighting.

**Control Units**

All the hydromassage shower functions can be simply adjusted through easy-to-use control units.

**Manual Control**

It allows you to manage showerhead and vertical jets as well as activate the steam-bath function.

## Steam Cabins

### Archimede

GSB-WHT-UM000B1H5TX

Specifications:

Size: 1000 x 1000 x 2100 mm

#### Features:

- Corner Version - Shower, steam • Self standing box (Corner /Wall)
- Shower tray and roof with Integrated Showerhead 300 MM
- White painted aluminum shower column with 2 Integrated round jets
- Shower rail • Thermostatic mixer with diverter
- Hand shower and shelf • Chromotherapy • Speakers
- Sliding door shower enclosure • 5 mm tempered glass.
- Steam Function- 2.7 KW with Aroma Dispenser

## Steam Cabins

### Archimede

GSB-WHT-TU000B1H5TX

Size: 100 x 100 x 210

#### Features:

- Square Version - Shower, steam • Self standing box (Corner /Wall)
- Shower tray and roof with Integrated Showerhead 300 MM
- White painted aluminum shower column with 2 Integrated round jets
- Shower rail • Thermostatic mixer with diverter
- Hand shower and shelf • Chromotherapy • Speakers
- Sliding door shower enclosure • 5 mm tempered glass.
- Steam Function- 2.7 KW with Aroma Dispenser

## Steam Cabins

### Noor Steam Module

NSC-CHR-MU000BW000X

#### Specifications:

- Material - stainless steel
- Finish - brilliant
- Installation - wall mounted & built in position as desired in the shower area

#### Features:

- Steam function - 2.7 K.W. generator with on/off touch
- Aroma dispenser with extractable drawer • Max Temperature of 45 Degree C
- IPX4 Rating • Self Flushing enabling no calcium deposits - Auto clean
- Safety cutoff

### Noor Steam Module

NSC-CHR-TZ000BW400X

#### Specifications:

- Material - stainless steel
- Finish - brilliant
- Installation - wall mounted & built in position as desired in the shower area

#### Features:

- Steam function - 6 K.W. generator with on/off touch
- Aroma dispenser with extractable drawer • Max Temperature of 45 Degree C
- IPX4 Rating • Self Flushing enabling no calcium deposits - Auto clean
- Safety cutoff

### Noor Steam Module

NSC-CHR-TZ000BW400X

#### Specifications:

- Material - stainless steel
- Finish - brilliant
- Installation - wall mounted & built in position as desired in the shower area

#### Features:

- Steam function - 2.7 K.W. generator with on/off touch
- Aroma dispenser with extractable drawer • Max Temperature of 45 Degree C
- IPX4 Rating • Self Flushing enabling no calcium deposits - Auto clean
- Safety cutoff • Also available in 6 KW

### Noor Steam Panel

NSC-CHR-C015000000X

#### Specifications:

- Stainless steel column
- Built-in or wall-mounted and positionable as desired in the shower area
- With 3 adjustable vertical (square) with anti-limescale nozzles
- Thermostatic mixer and diverter with handshower
- Cromotherapy
- Steam function with manual control and aroma dispenser with extractable drawer
- 2.7 kw. steam generator

## Water Heater

Every bathroom needs a different size of water heater depending on the climate of the place, the kind of fittings used and the number of people who use it. Rain showers, bathtubs and whirlpools need larger water heaters, while kitchens require smaller sized ones.

Jaquar has introduced a full range of modern water heaters ranging from 1 litre for your kitchen, to 425 litres for large homes.

Jaquar's range of water heaters have been developed to work in tough Indian conditions, with features that offer more safety, more savings and more life built-in.

Ask your Jaquar bath expert to recommend the right one for your needs.

## Bathroom Experience on the Move

United Kingdom is one of the most evolved markets in the world, which demands things that are out of the ordinary. Being in the process of establishing our innovative bathing solutions in the UK, we understand this too well. Which is also why we came up with a unique idea to help more consumers see, feel and experience what Jaquar has to offer: A complete showroom on the move. Aesthetically designed and beautifully set up with the wide range of Jaquar bathing solutions, it ceases to be a mere vehicle and transforms into a full-fledged showroom the moment one steps inside and even turns into an experience zone.

## Jaquar at ISH

# ISH

Being at the forefront of creating innovative bathing solutions that offer unmatched experiences, with products superior in aesthetics and quality standards, Jaquar has always been well received by discerning consumers across the world. The global trade and industry too, comes looking for Jaquar in most of the leading international exhibitions and events on bathing solutions.

Jaquar's participation in ISH - the world's biggest trade fair for the latest in bathroom concepts and products, and one of the most prestigious exhibitions at Frankfurt, Germany - was a big success. Focusing on sustainable sanitation solutions and innovative bathroom designs, Jaquar showcased its impressive conceptual and design skills as well as its high quality manufacturing capabilities.

With over 2,400 exhibitors participating, including many market leaders from across the world, in the 5-day event, Jaquar made its presence felt with its special emphasis on aspects such as design, health, wellness, comfort, and conservation of natural resources.

Jaquar World – Complete bathroom destination store

**Jaquar**  
WORLD

Jaquar World is a global destination where a customer could walk in, conceptualize one's own bathroom concept; get professional inputs in design & technical issues that help turn one's concepts into reality; get first-hand experience of what one is about to make; find all the relevant products and services; and an unmatched customer support that goes beyond the on-line or over-the-phone service to ensure one enjoys uninterrupted bathing pleasure.

Focusing on complete bathroom solutions, Jaquar World would offer everything one could dream of in the bathroom space through two of its most respected global brands-Jaquar and Artize – which conform to the highest quality standards and have been awarded several global design and excellence awards. The range includes sanitaryware, faucets, showers, bathtubs, wellness, shower enclosures, water heater, bathroom accessories... what have you!

Committed to help customers turn their customized bathroom concepts into reality, Jaquar World has kept a team of well-trained design consultants, sales and customer service professionals ready. Anticipating the needs of discerning customers, these professionals would offer design inputs and expert advice in selection of the right products and services that would meet their expectations. Besides, taking care of all the facets of installation, service and maintenance - offering customers total peace of mind.

# Glossary

**Adjustable Exposed Shower Pipe:** An attachment to the exposed shower mixer which allows the shower head to be adjusted to different heights.

**Aerator:** A device located in the faucet spout that mixes air with water. It is made by using a restrictor that limits the flow of water while increasing water pressure.

**Angle Stop:** The shutoff valve between the water pipes and the faucet. The inlet connects to the water supply pipe in the wall and it angles up 90 degrees to the faucet.

**Anti-Scald:** A valve which monitors the temperature of water coming out to minimize the risk of scalding.

**Basin Mixer:** A basin tap that will mix hot and cold water and deliver it through a single spout.

**Bath Filler:** Like a basin mixer, a bath filler will mix hot and cold water and deliver it through a single spout.

**Bath Shower Mixer:** A bath tap fixture which incorporates a shower attachment.

**Bath Tub Spout:** An output device through which water flows to fill a tub. A valve controls the flow.

**Bib Tap:** A tap with a nozzle that is bent downward and supplied with water through a horizontal inlet.

**Bidet:** A low height washbasin, specially designed for washing certain parts of the body for personal hygiene.

**Body Shower:** A mini-showerhead that delivers water from a vertical position in the shower. It often targets specific areas of the body and offers a precise therapeutic and invigorating massage.

**Cartridge:** A part of the valve that controls the On/Off function and allows water to flow.

**Central Hole Basin Mixer:** A one-piece fitting with two handles. Hot and cold water are mixed and delivered through a single spout.

**Ceramic Disc:** Two pieces of ceramic within the valve that open and close to allow control over flow volume.

**Chromotherapy:** A system of directing light sequences on or around the body to promote relaxation.

**Cistern:** The ceramic or plastic vessel that stores the water necessary for flushing a toilet.

**Click-Clack Waste:** A fitted alternative to a plug that you touch and click to drain the water

**In-wall Cistern:** A cistern that is hidden from view behind a false wall.

**In-wall Shower Mixer:** A shower control hidden within a finished wall, with only the operating lever and wall flange visible.

**Couple Closet:** A style of toilet where the cistern attaches directly to the pan.

**Deck / Table Mounted Tap:** A tap that sits on the rim of a washbasin or bath (as opposed to being wall mounted).

**Diverter Valve:** A valve designed to direct, or redirect, mixed water to a specific location.

**Diverter:** A shower control that will 'divert' the water flow to an additional hand shower or to an overhead shower from a bath and shower mixer/diverter.

**3-Inlet Diverter:** Used where a customer has 3 pipelines installed in the bathroom Hot (Geyser), Cold (Overhead Tank) and Fresh (direct from Municipal corporation / submersible)

**Dual-Flush:** A cistern that offers two flushing strengths - a full-volume flush or a half-volume flush to save water.

**Electronic Flush:** A hands-free, hygienic and water saving flush that's perfect for both public and private installations. It uses a beam of infra red light to switch on and switch off the water flow.

**Face/ Spray Plate:** A plate with holes or slots through which water passes to form a spray of water with separate, definable jets or water droplets.

**Fixed Head Shower:** A shower head that is fixed to the wall with In-wall pipe work.

**Fixture:** Anything that accepts or discharges water or wastewater: faucets, sinks, toilets, tubs.

**Flange:** Non-threaded piece that goes over the pipe coming out of the wall and covers the hole in the wall.

**Flow Rate:** Measurement of water flow through a plumbing system in gallons per minutes (GPM) or gallons per hour (GPH).

**Flush Valve:** The valve located at the bottom of a gravity-operated toilet flush tank that opens when the trip lever is actuated and closes when the tank has drained to the desired level. It usually contains an overflow tube as well.

**Gasket:** A flat piece of fiber or rubber used to provide a watertight seal between metal joints.

**Gray Water:** Waste water from fixtures other than toilets.

**Hand Shower:** A detachable shower head with an integral handle and a flexible hose that allows the water spray to be directed onto any part of the body by hand.

**Handle:** The trim piece on the faucet that turns the stem on the cartridge.

**Hi-flow Diverter:** It delivers a high-flow rate to quickly fill your bath. Ideal for use on the top floor of buildings where there's less water pressure.

**Hard Water:** Natural water containing impurities in various proportions. Traditional hardness is a measure of calcium, minerals or dissolved solids in a solution, measured in parts per million. Hard water generally ranges from 100 to 250 ppm.

**Mono Block:** A toilet in which the tank and bowl are manufactured as a single vitreous china fixture. Typically, Mono Block toilets have a lower profile than Couple Closet toilets.

**O-Ring:** A rubber washer that is round instead of flat. Used in valve stems to create a watertight seal.

**Overhead Shower:** Shower outlets which direct water onto the user from above the head

**Pillar Tap:** A tap which does not allow for temperature regulation by the user. Pillar taps are supplied with water through a vertical inlet.

**Pop-Up Waste:** An alternative to traditional plugs, a pop-up waste comprises of a stopper connected by levers to a control knob on the tap. When the knob is pushed down the stopper is lifted to allow water to drain away. When the knob is pulled up the stopper seals the plug hole.

**PVC:** Acronym for Polyvinyl-Chloride. Usually refers to a rigid white plastic pipe made of this material, used for bathroom drain, waste and vent pipes.

**Quarter Turn Taps:** Taps which can be turned fully on or off by turning the handle through just 90 degrees. Ceramic discs inside the tap allow extreme controllability of water flow rate, provide a smooth, quiet action and great resistance to wear.

**Reducer:** A fitting that allows pipes of different sizes to be joined together.

**Relief Valve:** A valve that opens to relieve excess temperature and/or pressure in the system.

**Scale:** A thin coating or layer, usually of calcium, on the bottom of a tank or interior parts that may prevent heat transfer.

**Sediment:** The substance that settles at the bottom of a water tank.

**Shower Arm:** A component which supports a shower head and connects it to the water supply.

**Shower Hose:** A flexible pipe that connects the shower head and the shower control.

**Shower Mixer:** A shower that mixes hot and cold water supplies together to achieve the required temperature.

**Shower Outlet:** A fixture which allows water to be emitted in the form of jets or water droplets.

**Single Lever:** Taps which incorporate the opening, closing and mixing of hot and cold water with one lever. Move the

lever up to open the tap and down to close. To alter the water temperature, the lever is moved from left to right or vice versa.

**Slide Rail:** A vertical rail to allow height adjustment of a shower head. **Soft Water:** Water that has been treated so that it has low mineral content.

**Stop Cock:** A simple, hand operated tap that turns the water flow off and on.

**Tap:** Tap is synonymous with faucet. Tap also refers to the divergence of water from one fitting to another.

**Tall Boy:** A single lever basin mixer with a higher spout. Used for countertop basins where the faucet is not installed directly on the ceramics, but on the vanity (or a separate shelf). The shaft must be longer for the water to flow into the basin at a comfortable distance, and it is significantly higher than the rim of the basin.

**Thermostatic:** Mixer taps that automatically maintain a constant temperature irrespective of the variations in the water pressure and the temperature of the hot and cold water supply. They have a cartridge or thermostatic element, a control for selecting the temperature and feature a safety stop that prevents scalding.

**Thermostatic Bath & Shower Mixer:** Gives precise and regulated control of the water temperature as well as flow. Sudden temperature changes are prevented, making the bath and shower experience consistent and enjoyable at all times.

**Three Hole Mixer Tap:** A faucet fixture with separate hot and cold water handles to blend water through a third central spout.

**Three-Handle:** Three-handle faucets also use separate handles for hot and cold water, but have an additional handle to divert the water from bath spout to shower head.

**Trap:** A curved section of drain that traps a small portion of water to prevent sewer gases from escaping into the bathroom. "P" traps and "S" traps are the types of traps most commonly found in bathrooms.

**Two-Handle:** Two-handle faucets feature separate handles to control hot and cold water temperature.

**Urinal:** A plumbing fixture only for receiving liquid body waste (urine) which is then conveyed through a trap seal into a gravity drainage system.

**Vacuum Breaker:** A device that prevents the backward flow of contaminated water into clean water supply.

**Valve:** A device that regulates the flow, water temperature and/or volume of water.

**Wall Bracket! Handset Holder:** A device for holding a shower handset at a fixed height position such that the hands of the user are free. It also allows angular movement which enables the water spray trajectory to be adjusted.

**Wall Hung:** The toilet cistern is In-wall behind a wall or inside bathroom furniture and the pan protrudes from the wall, above the floor. Basins and bidets can also be wall hung. The height can be fixed to suit the comfort of users.

**Wall Mount Tap:** Used with washbasins or baths which have no tap holes. The handle and spout protrude from the wall above the basin or bath and the pipework is hidden behind the wall.

**Wall Mixture:** Exposed wall mounted mixer that can divert water to either the spout or the shower head.

**Wall Mixture Non-Telephonic:** Exposed wall mounted mixer that can deliver water through spout only.

**Wall Mixture 3-in-1:** Exposed wall mounted mixer that can divert water to three different outputs- spout, overhead shower and hand shower.

**Water Closet:** A plumbing fixture that has a receptacle with water to receive liquid and solid body waste. Upon actuation (flushing), it discharges the waste through a trapway into a gravity drainage system.
