

HiJet WC

HiJet WC

HiJet is a new type of WC having highest-performance flushes with volumes of 4.5 and 6 litres. This unique model unites all worldwide standards. Maximum performance tests have shown that this powerful WC is prepared to meet future standards. It does already achieve outstanding flushing results with 2–3 litres, if the downstream drainage systems are designed for this purpose. LAUFEN has lodged a patent for this new flushing system.
