- 3 LB3 floor even shower tray
- 4 ILBAGNOALESSI One freestanding bathtub

Because of their manifold qualities, bathtubs and shower trays made of sanitary acrylic have a decade-long tradition in the bathroom. All over the world, the material is highly appreciated for being smooth and comfortable to the skin. It's always a pleasure to take a bath or a shower and feel the warm touch of the material, which has excellent insulating properties too. Since the surface is very smooth, particles of dirt cannot get a grip or can be easily rinsed off – so well-being already starts when cleaning.

As contemporary bathrooms have to reflect the individuality and personality of their users, the sanitary acrylic bathtubs and shower trays from LAUFEN are available in many different shapes and sizes. They are made to fit into every bathroom scenario and ambience. Each and every one is a masterpiece of design and quality and can be equipped with panels for easier adjustment and maintenance.

Thanks to the shiny surface and the slenderness of the material the bathtubs and shower trays look quite elegant – even more, when the sanitary acrylic is integrally coloured and creates a harmonious ensemble with the colours of the ceramic objects in the bathroom. The necessary stability is provided by an optional aluminium frame accompanied by reinforcements of wood below the bottom and rim and a durable fibreglass lamination.
