

Ceramic shower trays

There are many good reasons to choose a shower tray made of sanitary ceramics: They are characterized by their long life and tangible quality. They are very hygienic and resistant against fungi and bacteria due to their glazing. And the material they are made of is 100 percent natural and completely recyclable.

The ceramic shower trays of LAUFEN are available in square, rectangular and corner versions and in different sizes. They fit harmoniously into your bathroom and give it a quite natural and human touch. Each and every one is a masterpiece of its own, thanks to the immense know-how and intense passion that are handed down from generation to generation at LAUFEN.

Our attractive shower trays offer a conveniently low step-in height and can be supplied with an anti-slip coating, if desired. The anti-slip coating has been tested according to the German industrial standard DIN 51097 and offers a higher than average anti-slip performance. Because it is applied prior to glazing and firing, it integrates durably into the ceramic structure. This refined surface offers a perfectly secure grip and is easy to clean, resistant to acids and scratch-resistant.
