

Limelight[®] Collection

Every Day Made Better™

A Hot Spring® spa is your personal retreat. It is a well of inspiration from which you can draw at any time – helping you be at your best. Set aside time each day to refocus, refresh and connect with what matters most.

Better Self

Warm water, buoyancy, and massaging jets can provide a unique sense of personal well-being. It is a special place for you, where the rigours of everyday life are on pause. It prepares you for the day ahead and helps you unwind and sleep better at night. Here, you discover your best self.

Better Relationships

Spa time with others helps you discover deeper connections and have more meaningful conversations. This is where you can open up and strengthen your bonds. The benefits flow well beyond just your time in the water, it fills your life with moments that fuel your best relationships.

Better World

In your Hot Spring spa, you slow down to enjoy the natural world sometimes missed in the day-to-day rush. Rediscover a starry summer night, a harvest moon, or falling autumn leaves. Time spent outside, immersed in the warm water of your Hot Spring spa, changes your view of the world. You reconnect with what is important and rediscover how much beauty was in front of you all along.

What Makes a Hot Spring Spa Better?

Over four decades, Hot Spring Spas earned its reputation as a leading brand and has sold well over one million hot tubs. We believe our products can enhance your life. Making that true is what defines Hot Spring Spas. Our mission is to provide you with *The Absolute Best Hot Tub Ownership Experience™* with unparalleled massage, innovations that take the worry out of water care, and energy-saving features that keep operating costs low. With a Hot Spring spa, you can relax and see your days, your nights and yourself in a whole new light.

Wellness Awaits You

With a Hot Spring spa at home, the restorative benefits of hydrotherapy are yours whenever you desire. As a daily ritual, your hot tub can become the foundation of a wellness lifestyle, helping you feel better—physically, mentally and emotionally.

The Limelight Collection

You want the very best for yourself and your family. You spend your money wisely and make the most of every minute. Your hot tub should live up to your high standards. But with so many choices out there, how do you find your perfect hot tub?

The Fountain of You

Meet the Limelight® Collection from Hot Spring®. These vibrant, inspiring spas are the ultimate wellness retreat you can enjoy every day and any time, with the added confidence of exceptional quality and industry-leading customer care.

What is more, powerful jets deliver an unparalleled and customisable massage experience. Innovative design makes these spas stand out from the crowd and they are easy to use and maintain.

Backed by the quality, reliability and reputation of the number one brand in hot tubs, it is easy to see why a Limelight Collection spa is the best premium spa for quality and value.

 HotSpring

Step Into the Limelight

Whether you prefer to soak at the break of dawn or under a star-filled sky, time spent in a Hot Spring® spa will help enrich your life. With more visual appeal, design innovation and interior room than ever, our Limelight® Collection spas are ideal for starting or ending your day refreshed and renewed.

The crisp, clean design opens to a spacious interior where each seat is shaped to follow the body's natural contours for added comfort and support. A variety of massage jets are carefully placed to provide full-body therapy. And its innovative, multi-point lighting

system and full-length corner sconces create a truly special ambiance, whether you are soaking inside the spa or entertaining friends on the patio.

These hot tubs are built for years of enjoyment with premium materials, legendary Hot Spring attention to detail, quality construction, and backed by a comprehensive warranty. With best-in-class service and support, a Limelight Collection spa is everything you are looking for in a hot tub, from the leader in the industry.

The geometric lines of the Limelight Collection compliment a range of home styles, from contemporary to traditional. Inspired by outdoor design trends, the horizontal siding is modern yet timeless, and offered in a range of colours.

1. Worry-free Water Care

FreshWater® Salt System ready means less time maintaining your spa and more time enjoying it.

2. Sleek design inside and out

Crisp lines and subtle contours offer a fresh approach to spa design and a look that reflects Hot Spring quality and innovation.

3. Roomy, comfortable seating

Sculpted acrylic seats position your body to relieve stress and keep you in place while providing more interior space.

4. Durable cabinet

Long horizontal panels with a subtle wood grain effect give the spa siding a warm, contemporary look and timeless beauty. Built to endure the elements, the cabinet is backed by a five-year warranty.

5. Ready indicator light

One glance and you will know the spa is ready. It also provides service and maintenance diagnostics.

6. Accent lighting

Points of light in three sizes and full-length corner scence lights illuminate the spa inside and out. Six colours, adjustable for brightness, create a calm to vibrant visual effect.

Better Massage

After 40 years and more than a million hot tubs, we have perfected the process for creating a unique warm water massage experience. Lots of powerful jets mean nothing if they do not hit the right spot, with the right amount of therapeutic massage.

Hot Spring® spas are designed with seating and jets that work together, giving you a better massage experience that is precise and personalised to your preference.

Customisable massage

You have different needs on different days. Only Hot Spring has the Comfort Control™ system, which allows you to dial in the ideal amount of air and

SmartJet lets you control the jet flow on and off to customise your experience.

water for powerful hydromassage or just a soft touch—simply turn the jet face. An easy-to-reach diverter lets you control jet flow for a truly personalised experience with the SmartJet™ system.

Head to toe

Carefully placed jets target specific muscle groups, from your neck to your shoulders, back, calves, wrists and even your feet. Choose your ideal seat. In a Limelight® Collection spa you have a variety of choices for a complete, full-body massage.

Comfort that fits you

A better massage starts with comfortable seats shaped to fit the body's natural contours. Combined with a spacious foot well and integrated pillows, Limelight Collection seats are positioned to relieve pressure and stress. With multi-level seating, there is a comfortable spot for everyone, and a just-right place for any body's specific need.

Water Care Like No Other

Your time is too valuable to spend it fussing with hot tub chemicals. The FreshWater® Salt System is a breakthrough innovation that takes the guesswork out of keeping water clean, so you can spend more time enjoying your spa.

Simple and Intuitive

Water is sanitised with a titanium cartridge that automatically generates chlorine from salt. Simply set the chlorine output level with the touch of a button.

The system operates through the hot tub's main control panel. Easy-to-read, on-screen messages take out the guesswork by showing you how everything is working and what adjustments might be needed.

Natural-Feeling, Longer-Lasting Water

Forget about harsh odours, itchy skin and irritated eyes because chemical usage is reduced. Water is softer and feels natural.

It conserves water, too. When properly maintained, water life is extended, reducing the need to drain and refill your spa for up to 12 months – that is up to three times longer than other systems.*

Easy Spa Ownership

The titanium cartridge lasts up to four months and requires no maintenance. When it is time to replace it, you can do it in seconds without tools and without draining the water.

The FreshWater Salt System will change the way you use your hot tub by taking the worry out of water care. With water that is always hot and ready to use, you will spend less time maintaining your spa and more time using it.

The maintenance-free cartridge can be replaced in seconds, without tools.

One 3-pack of cartridges provides a year's worth of water care.*

**Many factors affect the life of spa water, such as bather load and water chemistry. When spa water is properly maintained considering these factors, a 3-pack of cartridges will keep water clean and clear for up to a full year.*

Salt System

*Simpler,
Cleaner
& Better*

Dual-action filtration

Limelight® Collection spas feature a unique two-filter design for more effective, constant filtration. One filter is dedicated for 24-hour filtration with the SilentFlo 5000™ circulation pump that is quiet and continuous. The other filter is dedicated to the jet pumps to clean water when you need it most. Two filters provide more total effective area to keep water cleaner with less maintenance. The simple, top-loading design allows for easy filter cleaning.

Better Energy Efficiency

Hot Spring® leads the industry in engineering and manufacturing energy-efficient hot tubs. You will not have to worry about high energy bills because our spas feature a comprehensive EnergySmart™ system, which keeps the water at your desired temperature while keeping energy costs to a minimum.

☞ Dedicated WaveMaster™ pumps power your jets and are only activated when you need them.

☞ The SmartJet™ system lets you direct water to the specific group of jets you choose. This saves horsepower and energy for when and where you need it.

☞ We design our No-Fault™ heater to maximise the transfer of heat to the water for ultimate efficiency.

☞ All models feature dimmer-controlled LED lighting that uses minimal energy.

Limelight® Collection spas feature innovative FiberCor® insulation, which fills the cabinet completely to a density four times greater than the 8 kg/m³ foam used in most spas.

☞ We manufacture our spa covers to ensure a custom fit and tight seal. Dense foam insulation creates a high R-value core and a special insulating seal prevents heat from escaping at the seam, keeping energy bills low.

☞ Our SilentFlo 5000™ low-energy circulation pump continuously moves spa water, while using less energy to operate than a 40-watt light bulb.

We set the standard

However you enjoy your Hot Spring spa, you can be sure it is designed to keep operating costs low. All models meet stringent California Energy Commission (CEC) standards as well as the US energy efficiency standard for portable spas, APSP 14.

See Things in a Whole New Light

Interior lighting

The sights and sounds of moving water can be exceptionally calming and peaceful. Illuminated water arcing into the spa adds beauty and ambiance to your experience.

Match your mood

The interior lighting system features multiple points of light in a mix of three lens sizes placed to accent the contours of the spa shell. Match the colour to your mood by selecting the hue and brightness of your choice, or cycle through all six vibrant colours.

Exterior lighting

There is nothing like exterior lighting to set the scene, and the customisable LED lights on Limelight® Collection spas are best appreciated in person to experience their full dramatic impact. Two exterior lights integrate with the front corners of the spa from top to bottom, creating an illuminated and elegant look that is unlike any other. With adjustable brightness and six colour options, the multi-colour LED lighting can be set to automatically turn on for four hours each evening.

Select from six jewel-tone colours: royal, teal, emerald, gold, plum or ruby.

At Your Command

Smart, simple operation

Adjust the jets, lighting, wireless entertainment and more with the IQ 2020™ spa control system – no programming required. Access the main control panel from inside or outside the spa. Choose your ideal water temperature, then “set it and forget it.” Even after a power outage, your spa automatically resumes normal operation to your preferred settings.

Advanced control panel

It is easy to access the spa lock function, a convenient 10-minute clean-up cycle and other features from the main control panel. Dedicated buttons for jets and lighting let you quickly adjust the features you use most.

Ready when you are

You will always know when your spa is ready—even from a distance and when the cover is on. The proprietary software works as an advanced diagnostic system. Its easy-to-see, colour-coded lighting shows at a glance when your spa is at set temperature. The logo light will indicate if it needs maintenance, a filter change or service—something you will only find in a Hot Spring® spa. It is a real advantage, especially in winter.

Green – The spa is ready to use.

Yellow – The spa is safe to use. However, an installed optional feature may need attention.

Red – Contact your dealer. Share the information on the control panel, if available, with the dealer to determine what may be needed.

Entertainment & Innovations

Wireless connectivity

There are so many ways to enjoy entertainment in your Limelight® Collection spa. An optional wireless entertainment system with extended Bluetooth® technology allows you to stream music live or from your playlist, or listen to a podcast or audio book. The system connects devices from up to 45 metres, and song titles display on the easy-to-read control panel. Order your spa with four speakers placed for optimal sound quality.

Picture perfect

Add the optional all-weather 55 cm HD Wireless Monitor to enjoy live TV, stream video and more while inside your spa or entertaining in your garden. The 1080p screen resolution delivers exceptional picture quality with anti-reflective, anti-glare coating. A monitor stand slides under the base of the spa for easy and secure installation. Add a streaming stick or connect to any in-home video source with HDMI convenience. A sturdy frame and tempered glass make this LCD monitor ideal for outdoor use. A heavy-grade vinyl monitor cover offers additional protection in a range of colours to match your spa cover.

Just chillin'

With the optional CoolZone™ System, you can easily heat or cool the water—that is not possible with most spas. Enjoy a cool dip during the day, a warm soak later that night or cold-water therapy any time. The CoolZone System works with your spa heater to efficiently raise or lower the temperature in just a few hours*.

Accessories

You will enjoy your spa more often with the added convenience provided by these Hot Spring® Accessories™. They are specifically designed for your Limelight® Collection hot tub so you can get the most out of your experience. Do not compromise your warranty or your investment by choosing other brands. Insist on genuine Hot Spring Accessories.

Convenient cover lifters

Our proprietary cover removal systems, specifically designed to work with your Hot Spring cover, make using your spa easy. These patented designs eliminate the need to drag the spa cover on and off with each use and help to extend the life of the cover.

CoverCradle

These premium cover removal systems feature a low-profile design and pneumatic gas shocks for ultra-smooth gliding that makes removal a breeze. CoverCradle™ uses dual pneumatic shocks. The CoverCradle™ II uses one gas shock. Both require 61 cm minimum clearance (actual clearance may vary depending on spa model and location).

Lift'n Glide™

It is as simple as it sounds—lift the cover, then glide it back and open for quick, convenient access to your Hot Spring spa. Requires 36 cm minimum clearance (actual clearance may vary depending on spa model and location).

UpRite

Limited clearance on your deck or in your gazebo or small patio? The UpRite™ cover lifter is ideal and provides added privacy when the hot tub is in use. Requires 18 cm minimum clearance (actual clearance may vary depending on spa model and location).

Easy access steps

Complement your Limelight Collection spa and allow for safe entry and exit.

Everwood

The Everwood™ steps are made from the same rigid polymers as your Limelight Collection spa cabinet and are available in matching Coastal Grey, Espresso or Sable cabinet colours.

Polymer

Made from durable, lightweight polymer, it is recyclable at the end of its life. Also available in matching Coastal Grey, Espresso or Sable cabinet colours.

Umbrella

Shade your spa with the 360° rotating spa side umbrella. Powder-coated aluminium and zinc-plated steel make it rust-resistant. A base plate under the spa cabinet provides stability. Available in Crème or Navy with 3 metres canopy diameter.

Towel tree

Keep your towel within reach with this easy-to-assemble towel tree. Bronze powder-coated aluminium, it makes a stylish and convenient addition to your spa.

Handrail

The handrail base plate slips securely under the spa cabinet for stability. The handrail swings in and out of your spa, so it is easy to reach upon entering or exiting. A battery-powered LED light adds convenience and safety at night.

The Absolute Best Hot Tub Ownership Experience™

We are passionate about making the world's best hot tubs and delivering an unparalleled ownership experience. Our hot tubs are consistently recognised for outstanding quality and value. Hot Spring® spas are made by Watkins Wellness®, an experienced team with an average employee tenure of more than a decade. This dedication and experience means unsurpassed quality, confidence and reliability for you and your family, and many years of enjoyment in your Hot Spring hot tub.

Your hot tub connection

We are the only hot tub brand to sell more than one million spas—that means there are more Hot Spring spas in gardens than any other brand. In fact, some families are second- and third-generation owners! We are the brand of choice, sold in all 50 states, Canada and over 70 other countries.

Watkins Wellness®

Feel good. Live well.™

Watkins Wellness, the leader in hot tub and aquatic fitness products, is part of MASCO Corporation, a Fortune 500 company whose family of quality home products include:

We have earned SpaSearch Certification for providing a superior ownership experience every year since the award's inception in 2005.

The best hot tub retailers

When you choose a Hot Spring spa, you choose leading-edge innovation in spa features and design, as well as trained professionals. Our skilled local retailers deliver unmatched customer care before, during and long after your purchase. We have the most extensive network of genuine, passionate and helpful retailers in the industry.

A brand you can trust

For over 40 years, we have built our reputation on quality, but you do not have to take our word for it. Hear from real Hot Spring owners, people just like you at HotSpring.co.uk/Reviews.

The Limelight® Collection

Contemporary Style with Exceptional Performance

The Limelight® Collection delivers exceptional quality, beauty and performance. The spacious interiors, geometric design and multi-colour points of light accenting the sculpted shells give the spas a modern flair. You can sit back and relax in the spacious seats knowing you have chosen the best – a Hot Spring® spa built for a great massage, low operating costs, and easy maintenance. It is what we call *The Absolute Best Hot Tub Ownership Experience™*.

Relax with the People who Matter Most.

Stay connected with family and friends in the Pulse™, a spacious spa that seats up to seven adults. Open and comfortable, it is an ideal conversation hub that features powerful hydromassage, with directional Precision™ jets in the foot pod, accessible from every seat.

See detailed specifications for the Pulse on page 32.

Pulse shell shown in Alpine White.

Surround Yourself with Soothing Jets and Style.

With seating for six that includes a row of open contoured seating and a generous lounge, this popular-sized spa offers great versatility. The Flair™ features ample space and rejuvenating massage jets carefully placed to treat tension areas throughout the body. With its range of therapy options, this promises to be your go-to place for relaxing in style.

See detailed specifications for the Flair on page 32.

A True Crowd Pleaser.

With seating for seven adults and an ample interior, this spa shines as a favourite place for the family. The contemporary geometry is showcased by open seating, and octagonal foot well, and contoured lines accented by multi-colour points of light.

The Flash™ offers a spacious interior with a popular 213 x 213 cm footprint. A pod in the foot well has four directional Precision™ jets for a foot massage from each angled seat.

See detailed specifications for the Flash on page 32.

Flash shell shown in Alpine White.

Small Stature. Big Possibilities.

The Beam™ is a smaller spa, perfect for two yet roomy enough to comfortably fit up to four adults. It is an intimate space where you can immerse in a therapeutic massage and take in the beauty that surrounds you.

Each corner seat features a different hydrotherapy option and the large foot well is an added bonus in this spa's generous interior.

See detailed specifications for the Beam on page 32.
