

# Luci collection

Luci è caratterizzata dall'alternanza di effetti lucidi e brillanti, ottenuti attraverso sfumature di colore che emergono dal vetro. La particolarità di queste superfici, risultato di numerose applicazioni di smalto alternate a lavorazioni specifiche, dà vita ad un sistema di formati e colori che consentono un originale utilizzo. Anche queste superfici sono da "toccare" con mani e occhi per stimolare un programma di grande suggestione. Casualità e caos, terra e fuoco: la collezione concretizza il fermento della natura e degli eventi.

*Luci collection is characterized by the alternation of bright and shiny effects coming from the colored shades of glass. This is the result of multiple coverings of enamels fixed by specific techniques, which create a multiple formats and colors collection full of original combinations. Surfaces that immediately attract curious hands and interested eyes. Casualty and chaos, ground and fire: this collection expresses the never-ending movement of nature and events.*

## Voci di Capitolato

*Technical Specifications*

Piastrelle terzo fuoco realizzate su biscotto pasta rossa, successivamente smaltato con numerose applicazioni a produrre effetti materici discontinui, ricotto in forno continuo quindi oggetto di ulteriore stesura di consistenti quantità di graniglia di vetro a produrre effetti lucidi e brillanti prima della cottura finale nel forno medesimo.

*Triple-fired red body tiles, glazed by a variety of applications to perform different material effects then subsequently annealed in continuous kiln, further covered by glass grits, to perform bright and shiny effects before the final annealing in the same kiln.*
