

The beauty of precision.

Marmite works with cast marble, one of the most outstanding materials to create beautiful, high quality washbasins, bathtubs, shower trays.

About the material

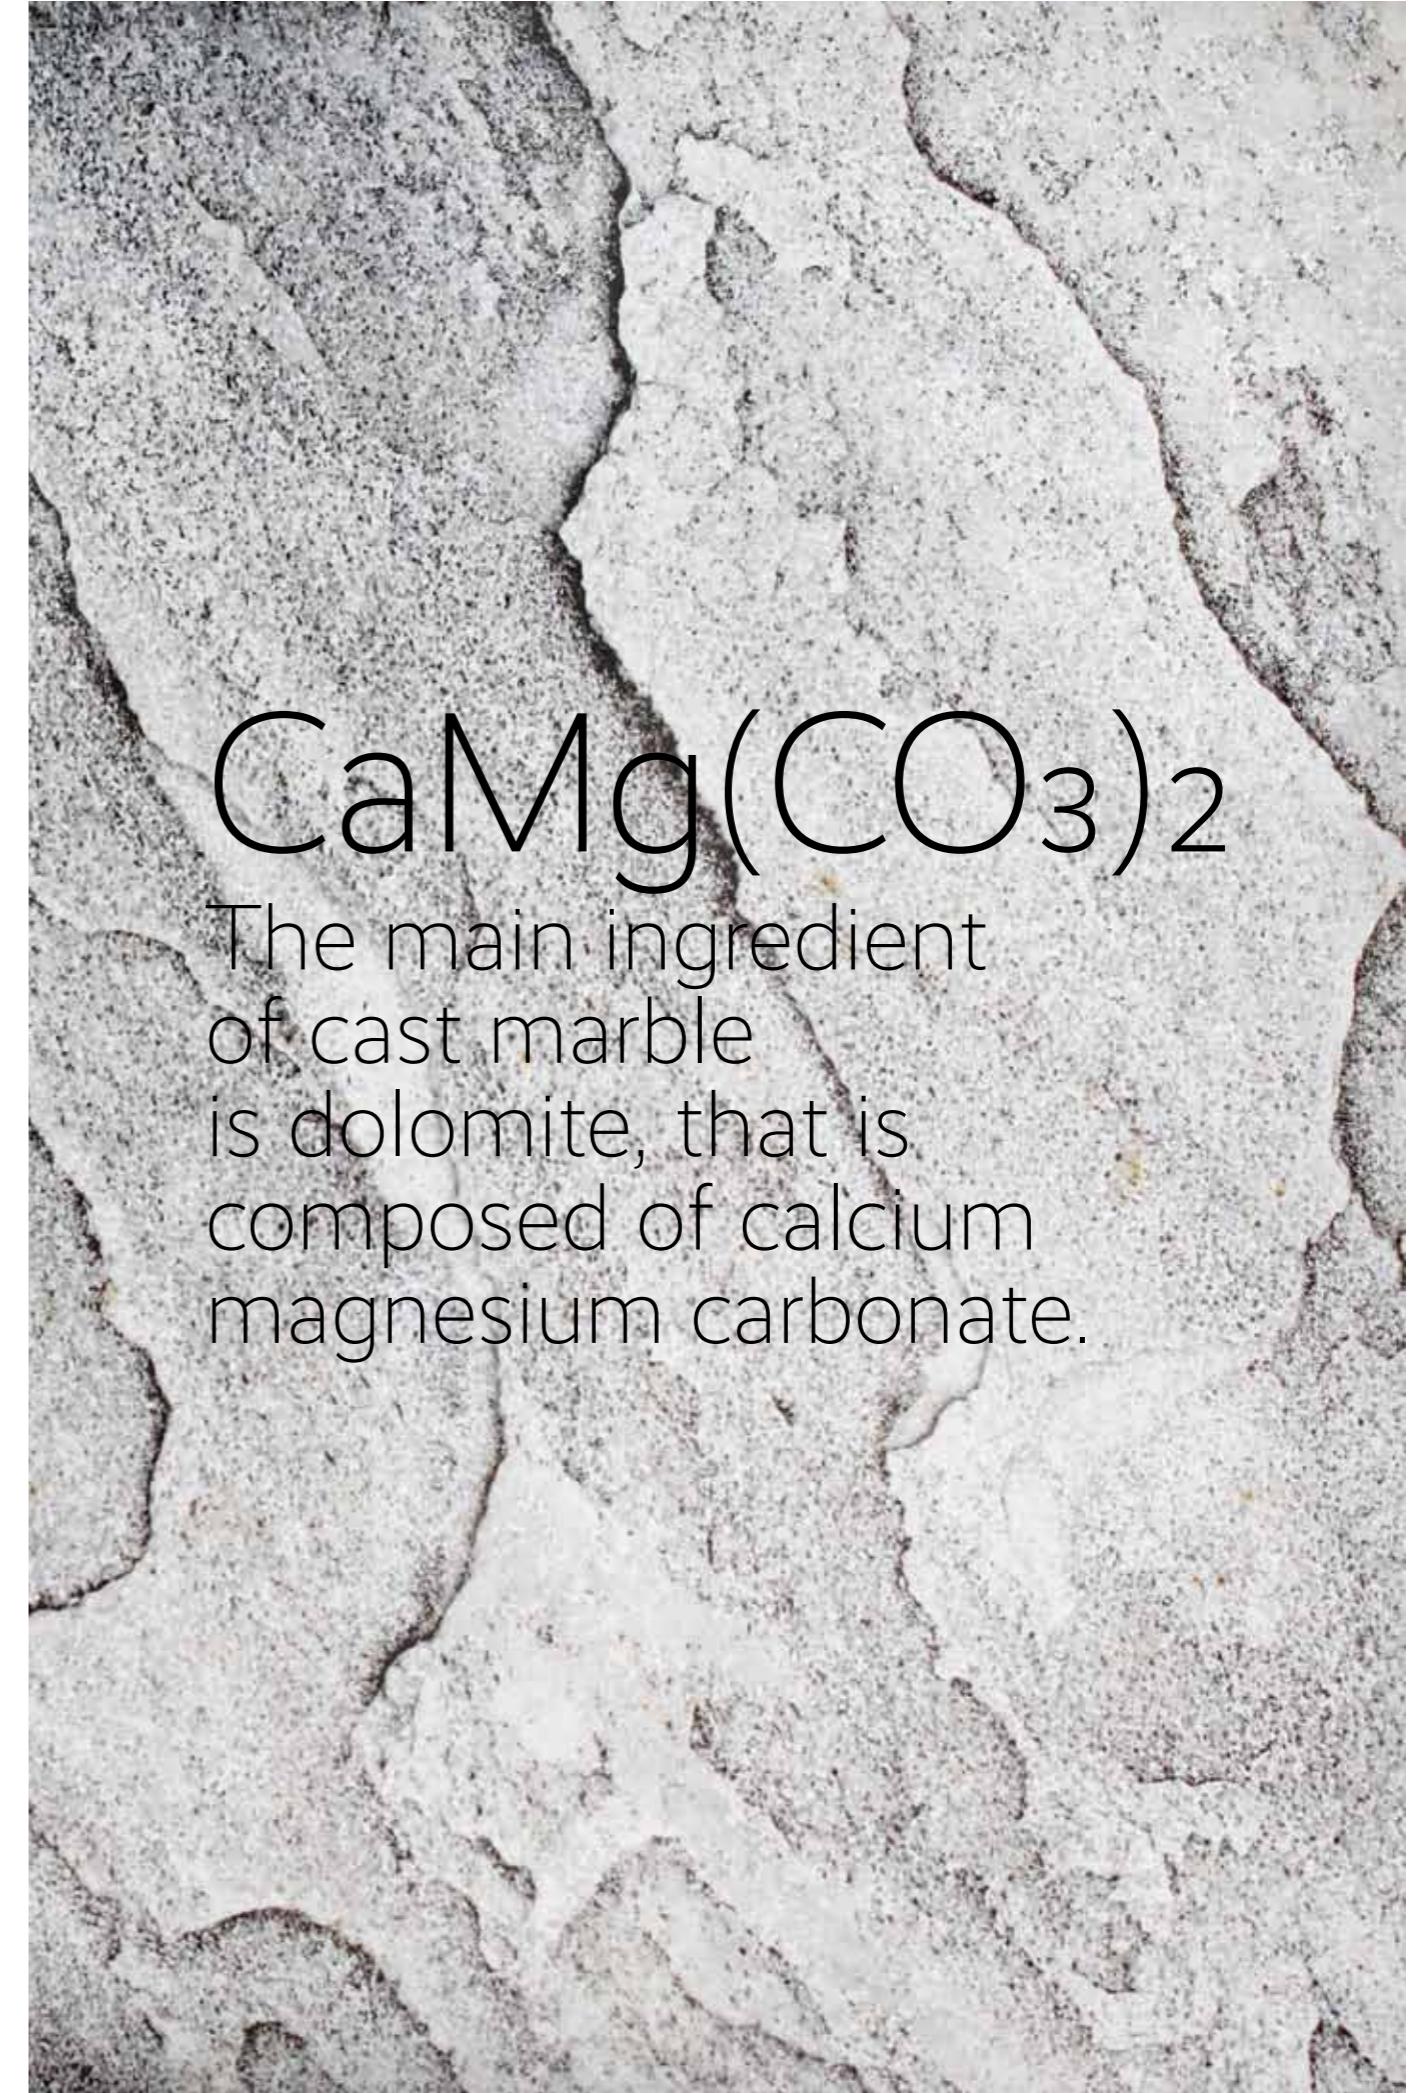

Cast marble
comes from
nature.

Dolomite marble was formed over 250 million years ago, when the Earth witnessed increased volcanic activity.

Dolomite sedimentary rocks were covered by layers of magma. High temperatures and enormous pressures recrystallized the original minerals. Due to metamorphic processes, the dolomite marble gained a beautiful look and hardness.

Today raw materials are sourced from carefully selected certified mines located in the EU.

“The final material is a composite that merges all the favorable technological features of its ingredients.”

Jarosław Antkowiak
Line Manager

During the manufacturing process dolomite powder is mix with polymer resin, which gives the final flexibility and strength.

The outer layer of the product is made of gelcoat which consist of hardened resin with pigment and quartz particles. It determines the final gloss and smoothness of the surface apart from this, the technology also provides the possibility of a matte finished products.

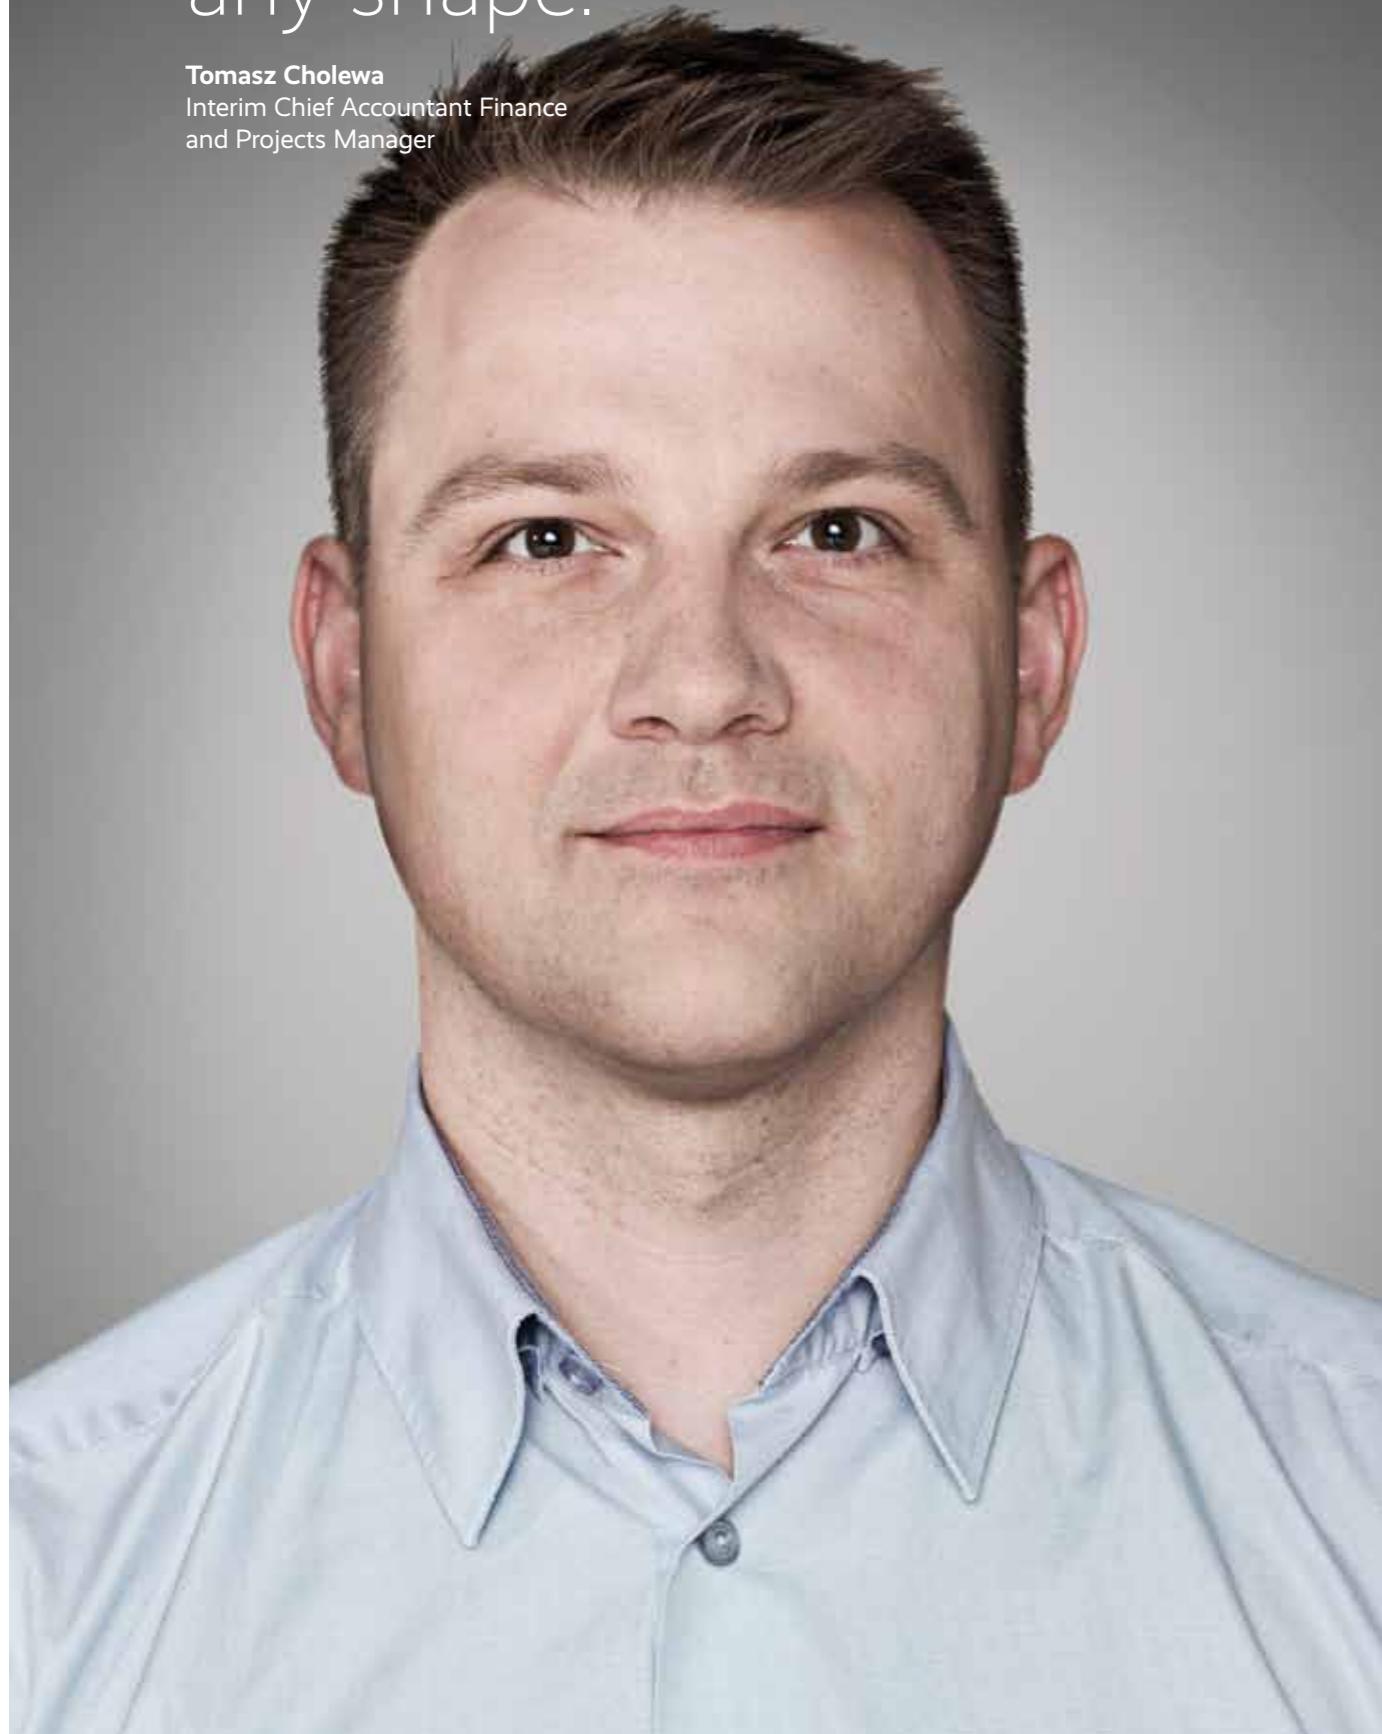

Benefits of the material

Manual polishing procedure,
provides the material
with high quality and
an exquisite look.

“Marmite cast marble
can be formed into
any shape.”

Tomasz Cholewa
Interim Chief Accountant Finance
and Projects Manager

The material offers precision
on every edge providing size
tolerances from 0 to 3 mm
and a minimum 2 mm radius.

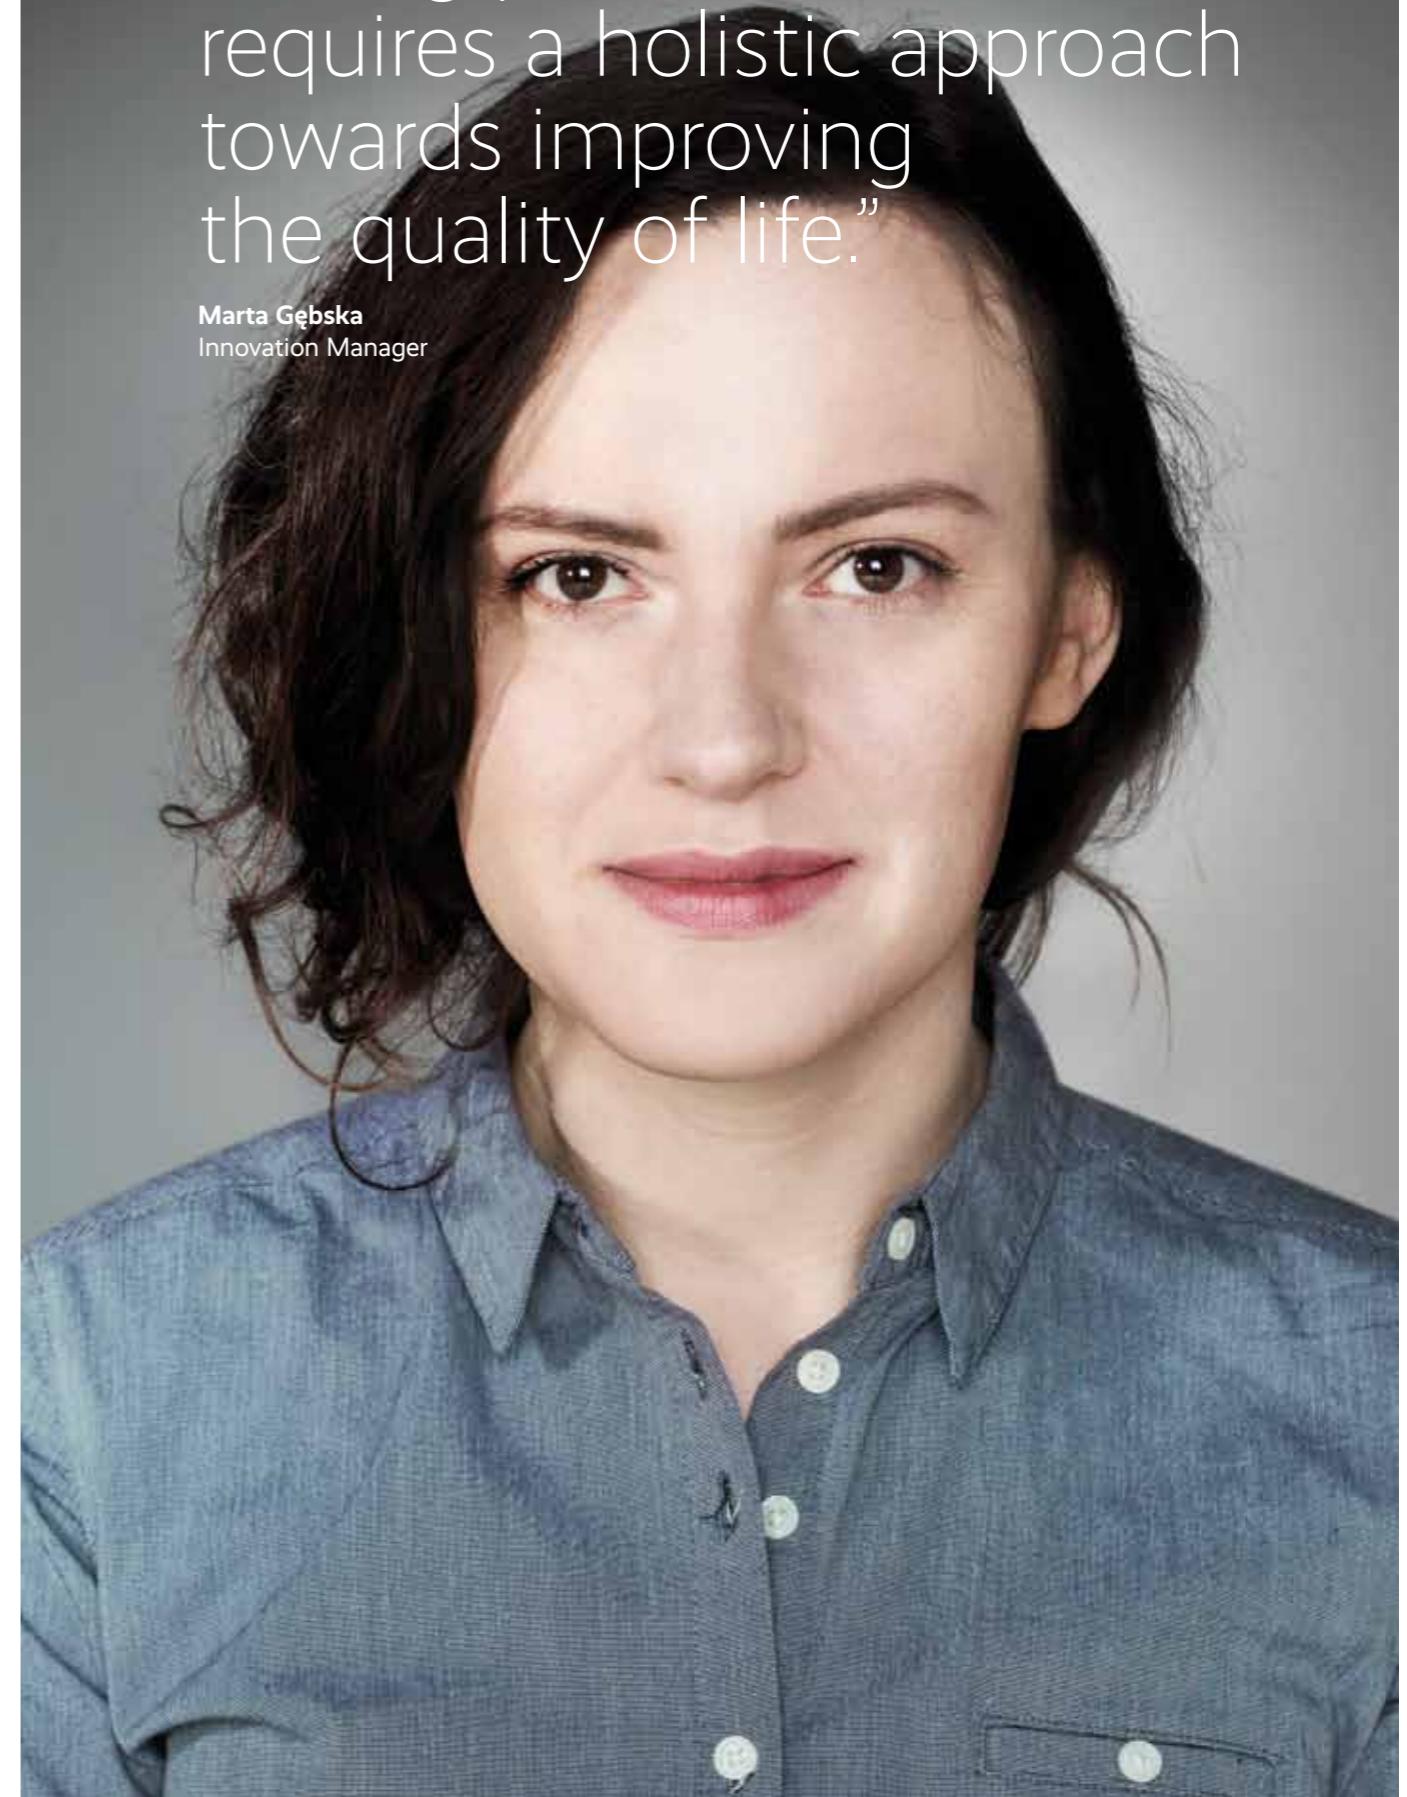

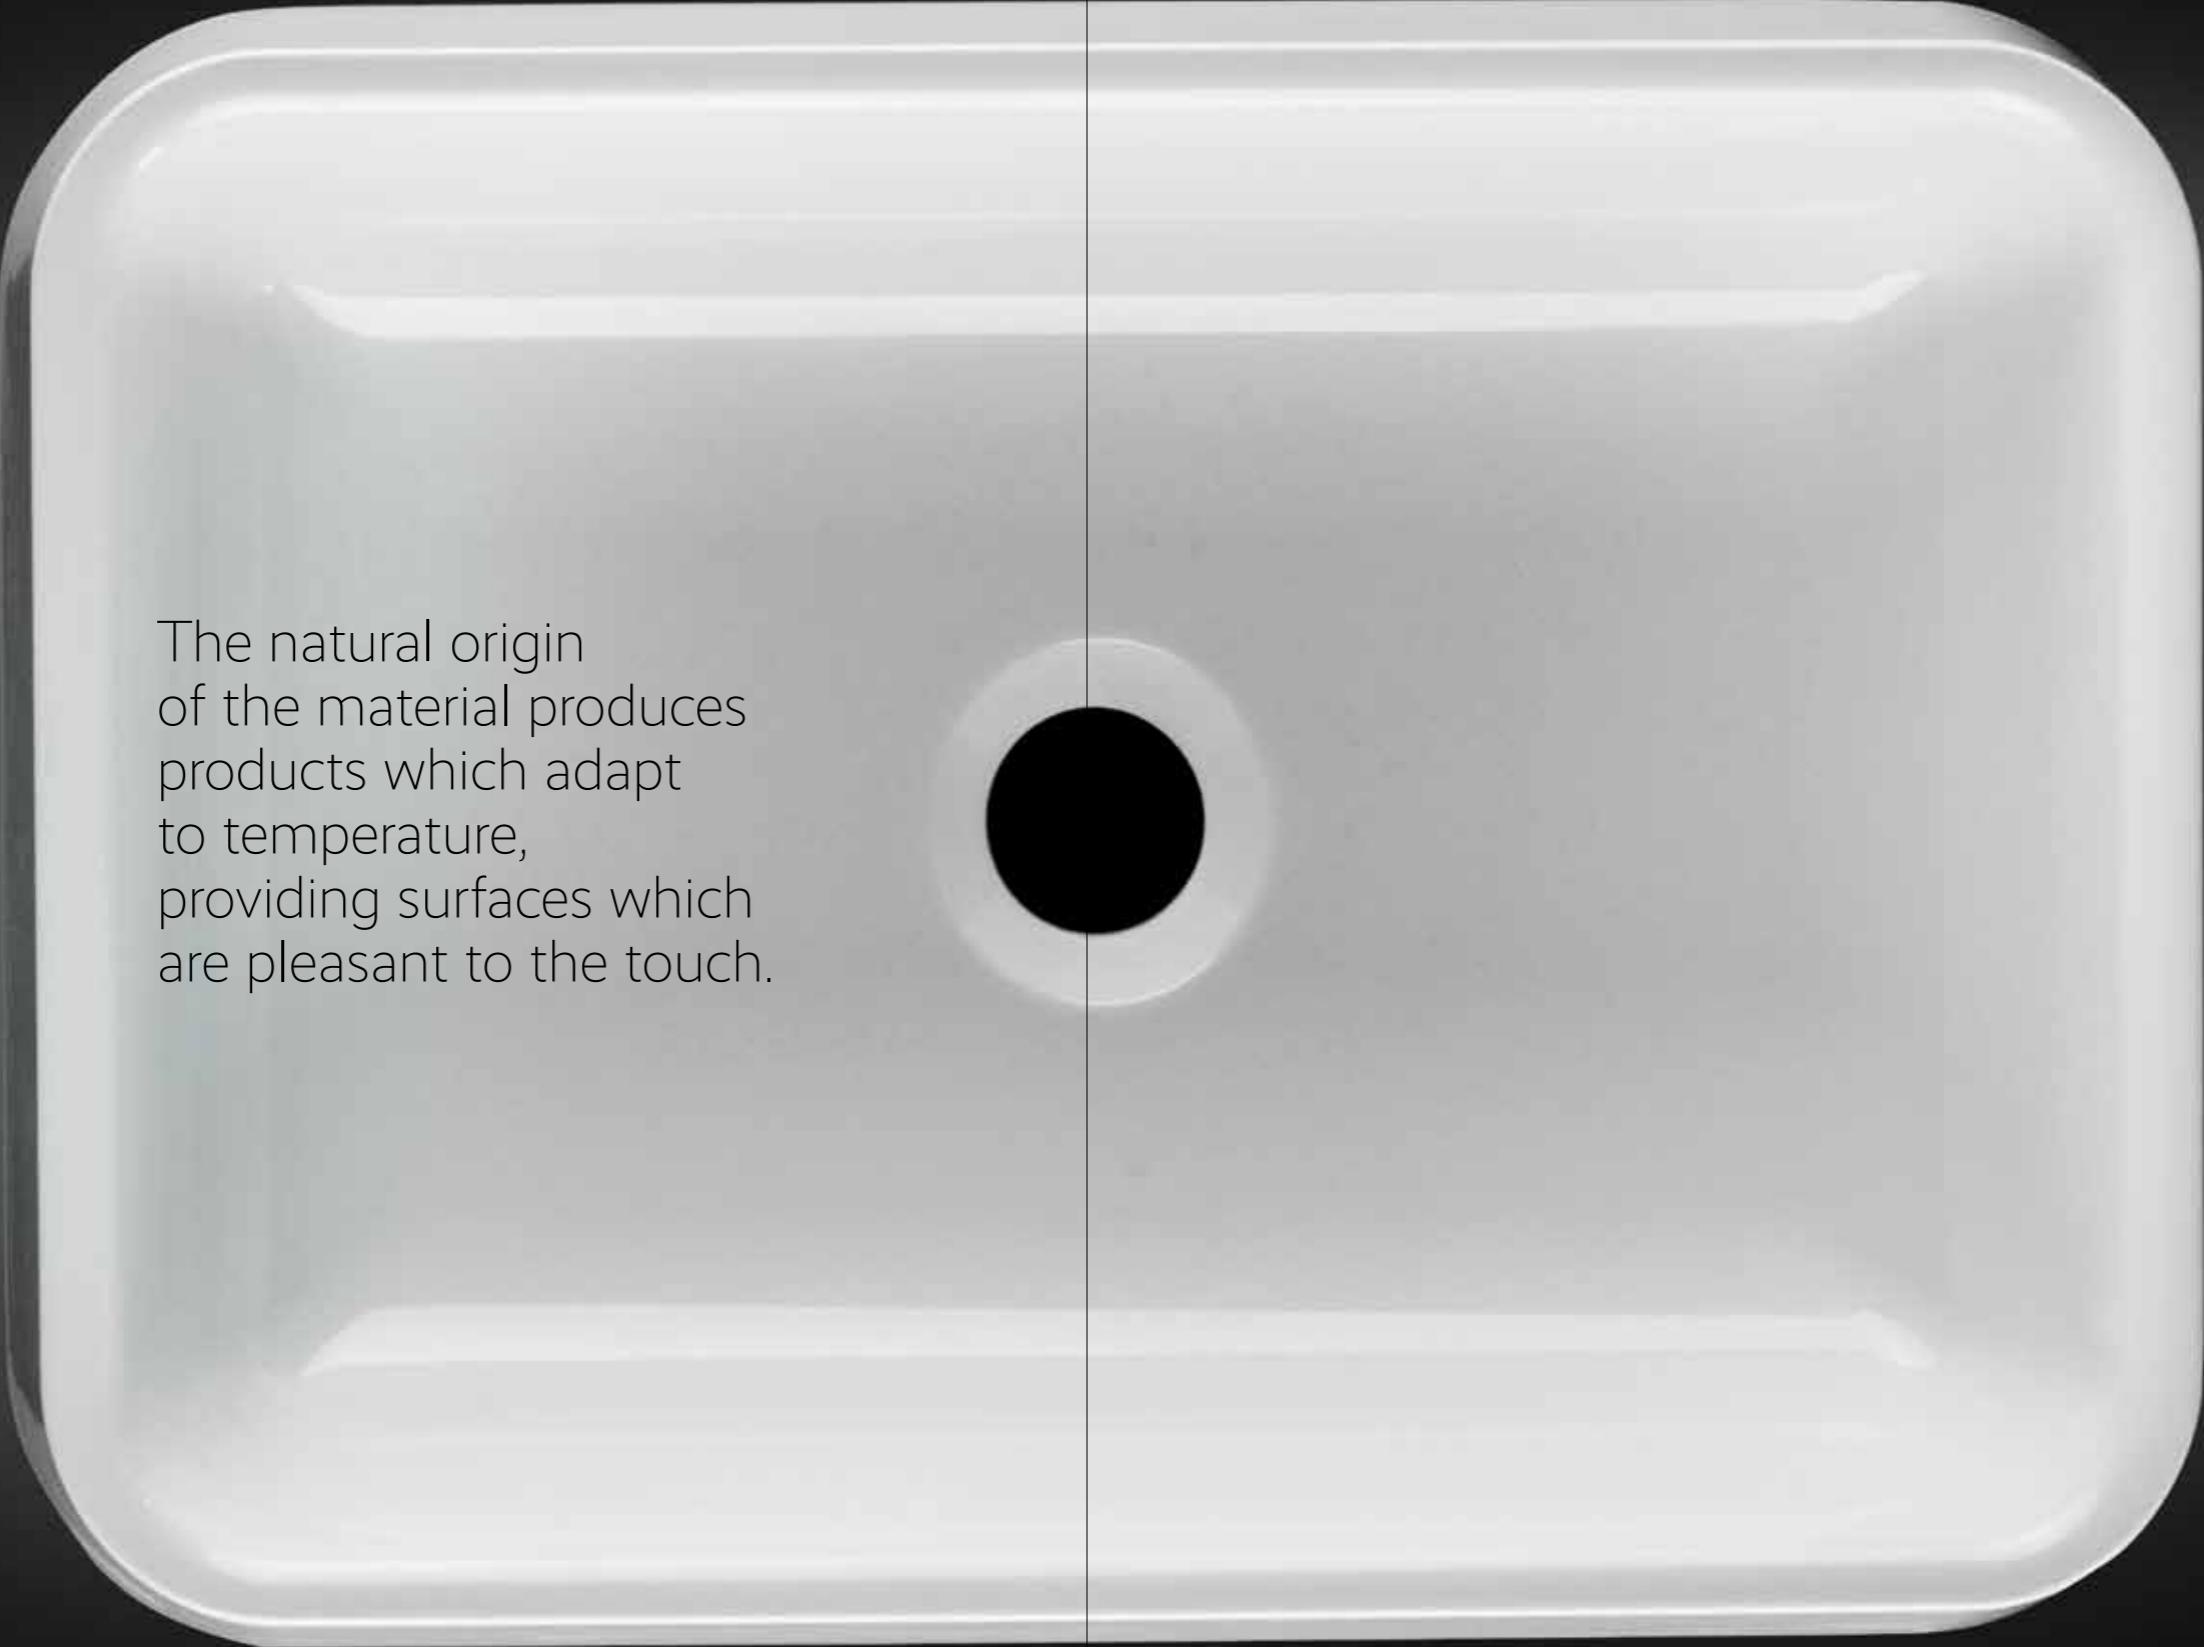

Washbasins

The material retains an enormous elegance of the surface.

“Designing is a problem solving process which requires a holistic approach towards improving the quality of life.”

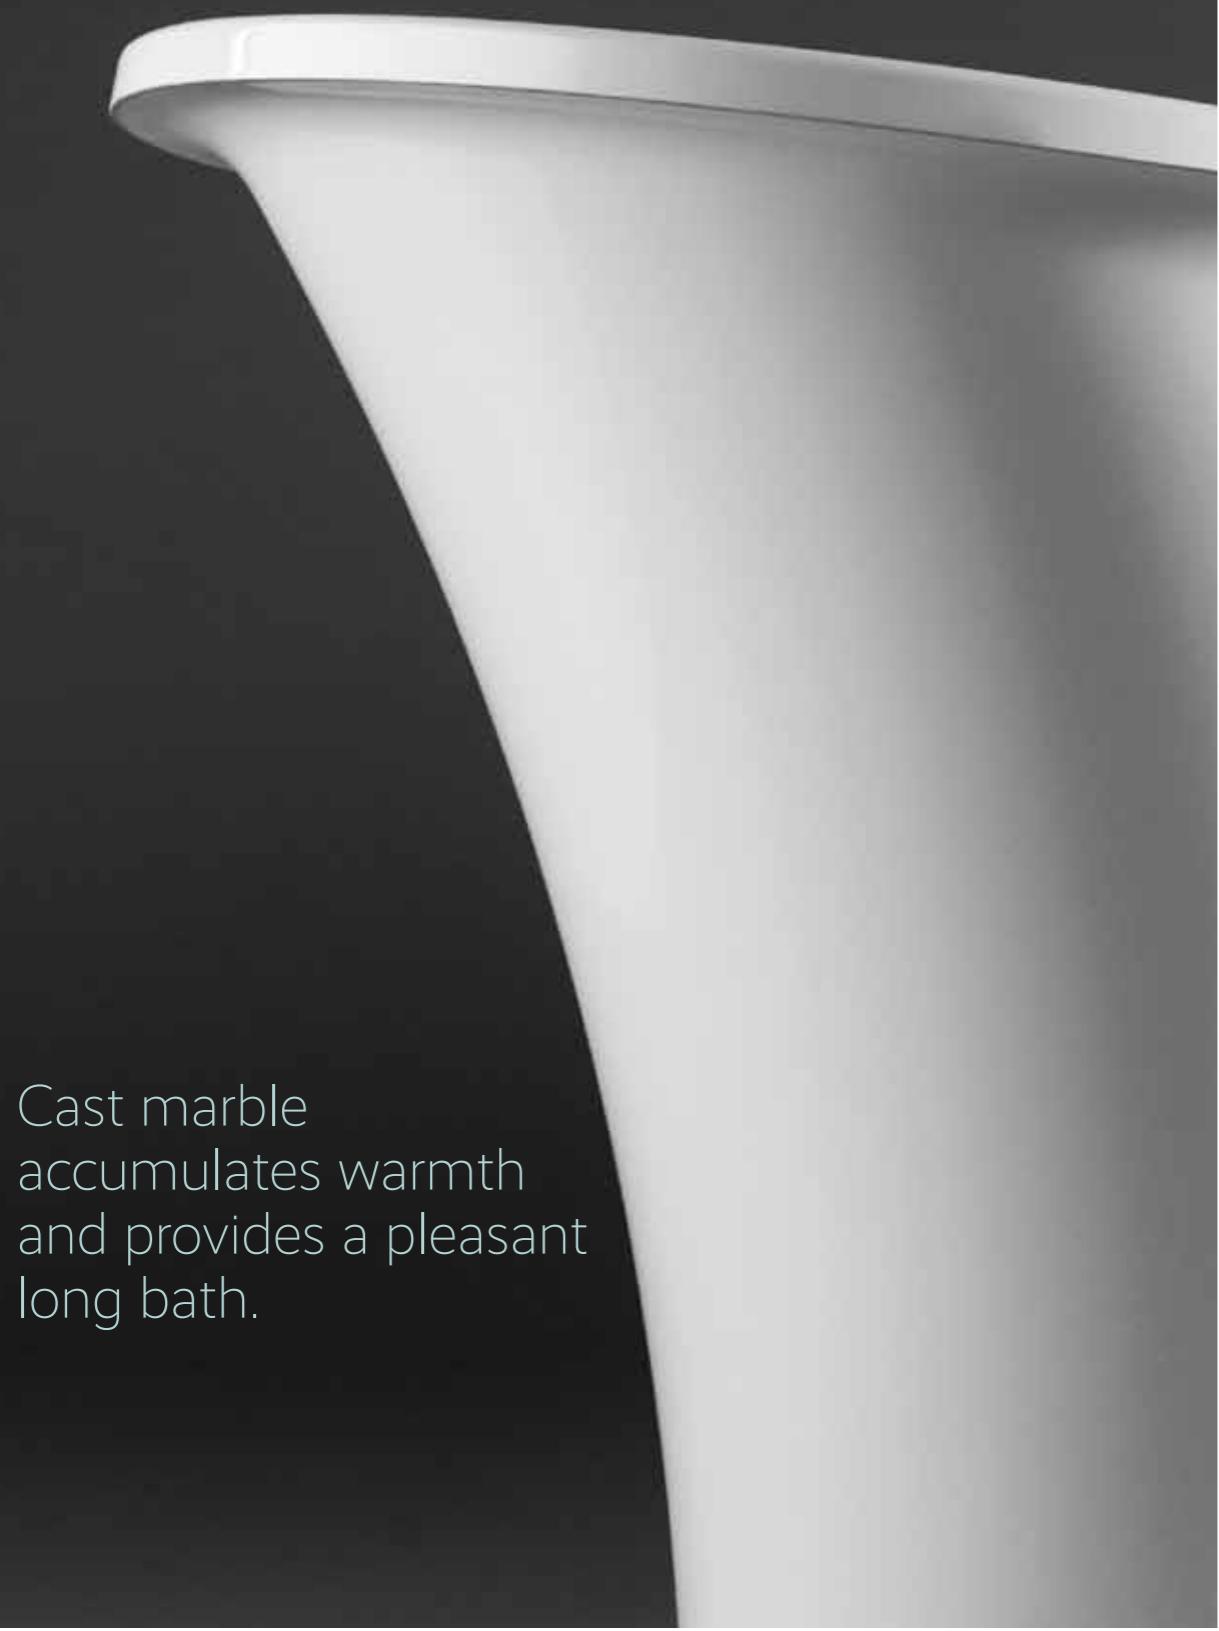

Marta Gębska
Innovation Manager

The natural origin
of the material produces
products which adapt
to temperature,
providing surfaces which
are pleasant to the touch.

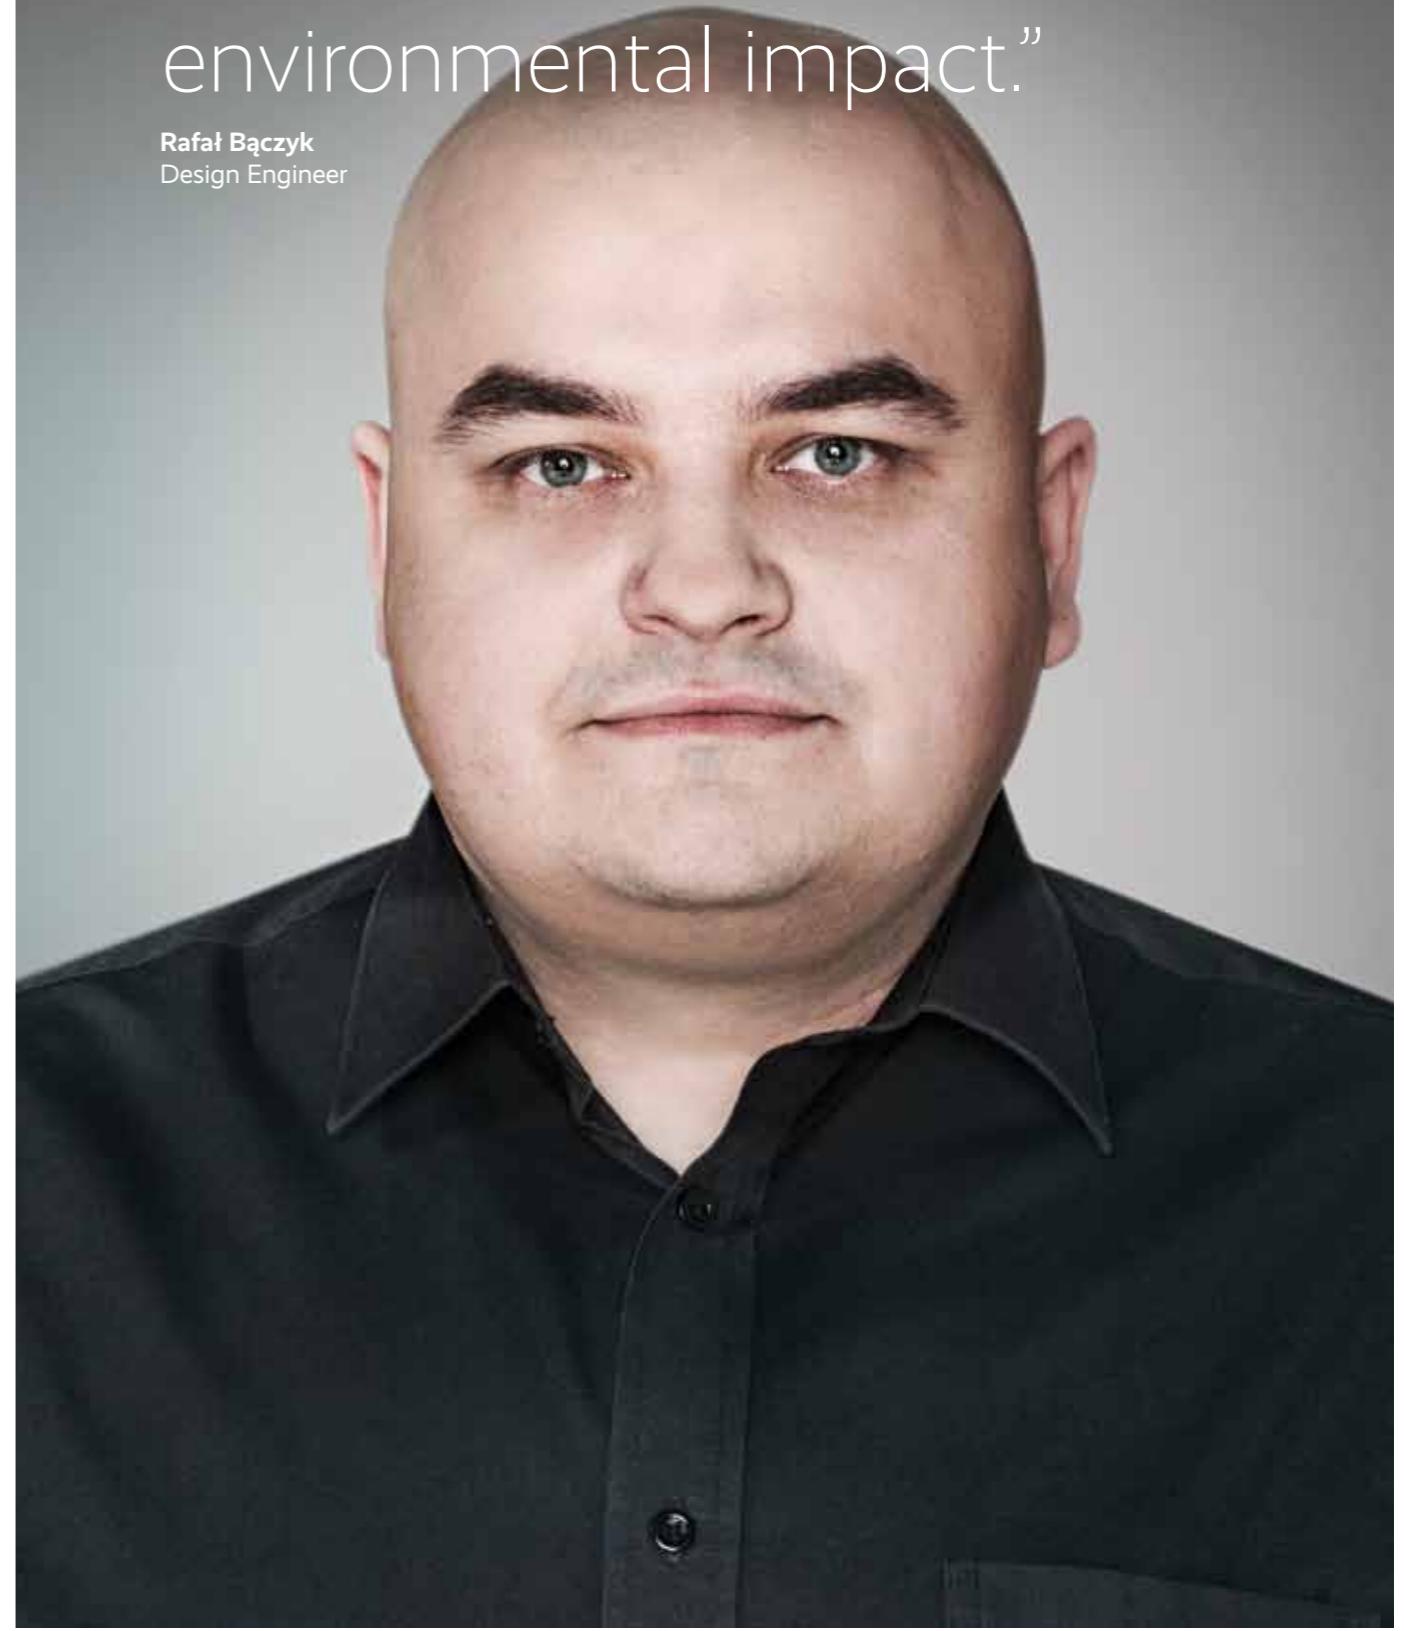

Bathtubs

Cast marble
accumulates warmth
and provides a pleasant
long bath.

“Our product designs provide maximum ergonomics and quality with minimal environmental impact.”

Rafał Bączyk
Design Engineer

The thin-walled bathtub,
with integrated overflow.

The material provides superior value by being easy repairable.

Minor defects such as cuts or scratches can be removed by individual users.

All products
are manufactured
using eco-friendly
production processes.
Suitable and high quality
accessories are available
to compliment
the product range.

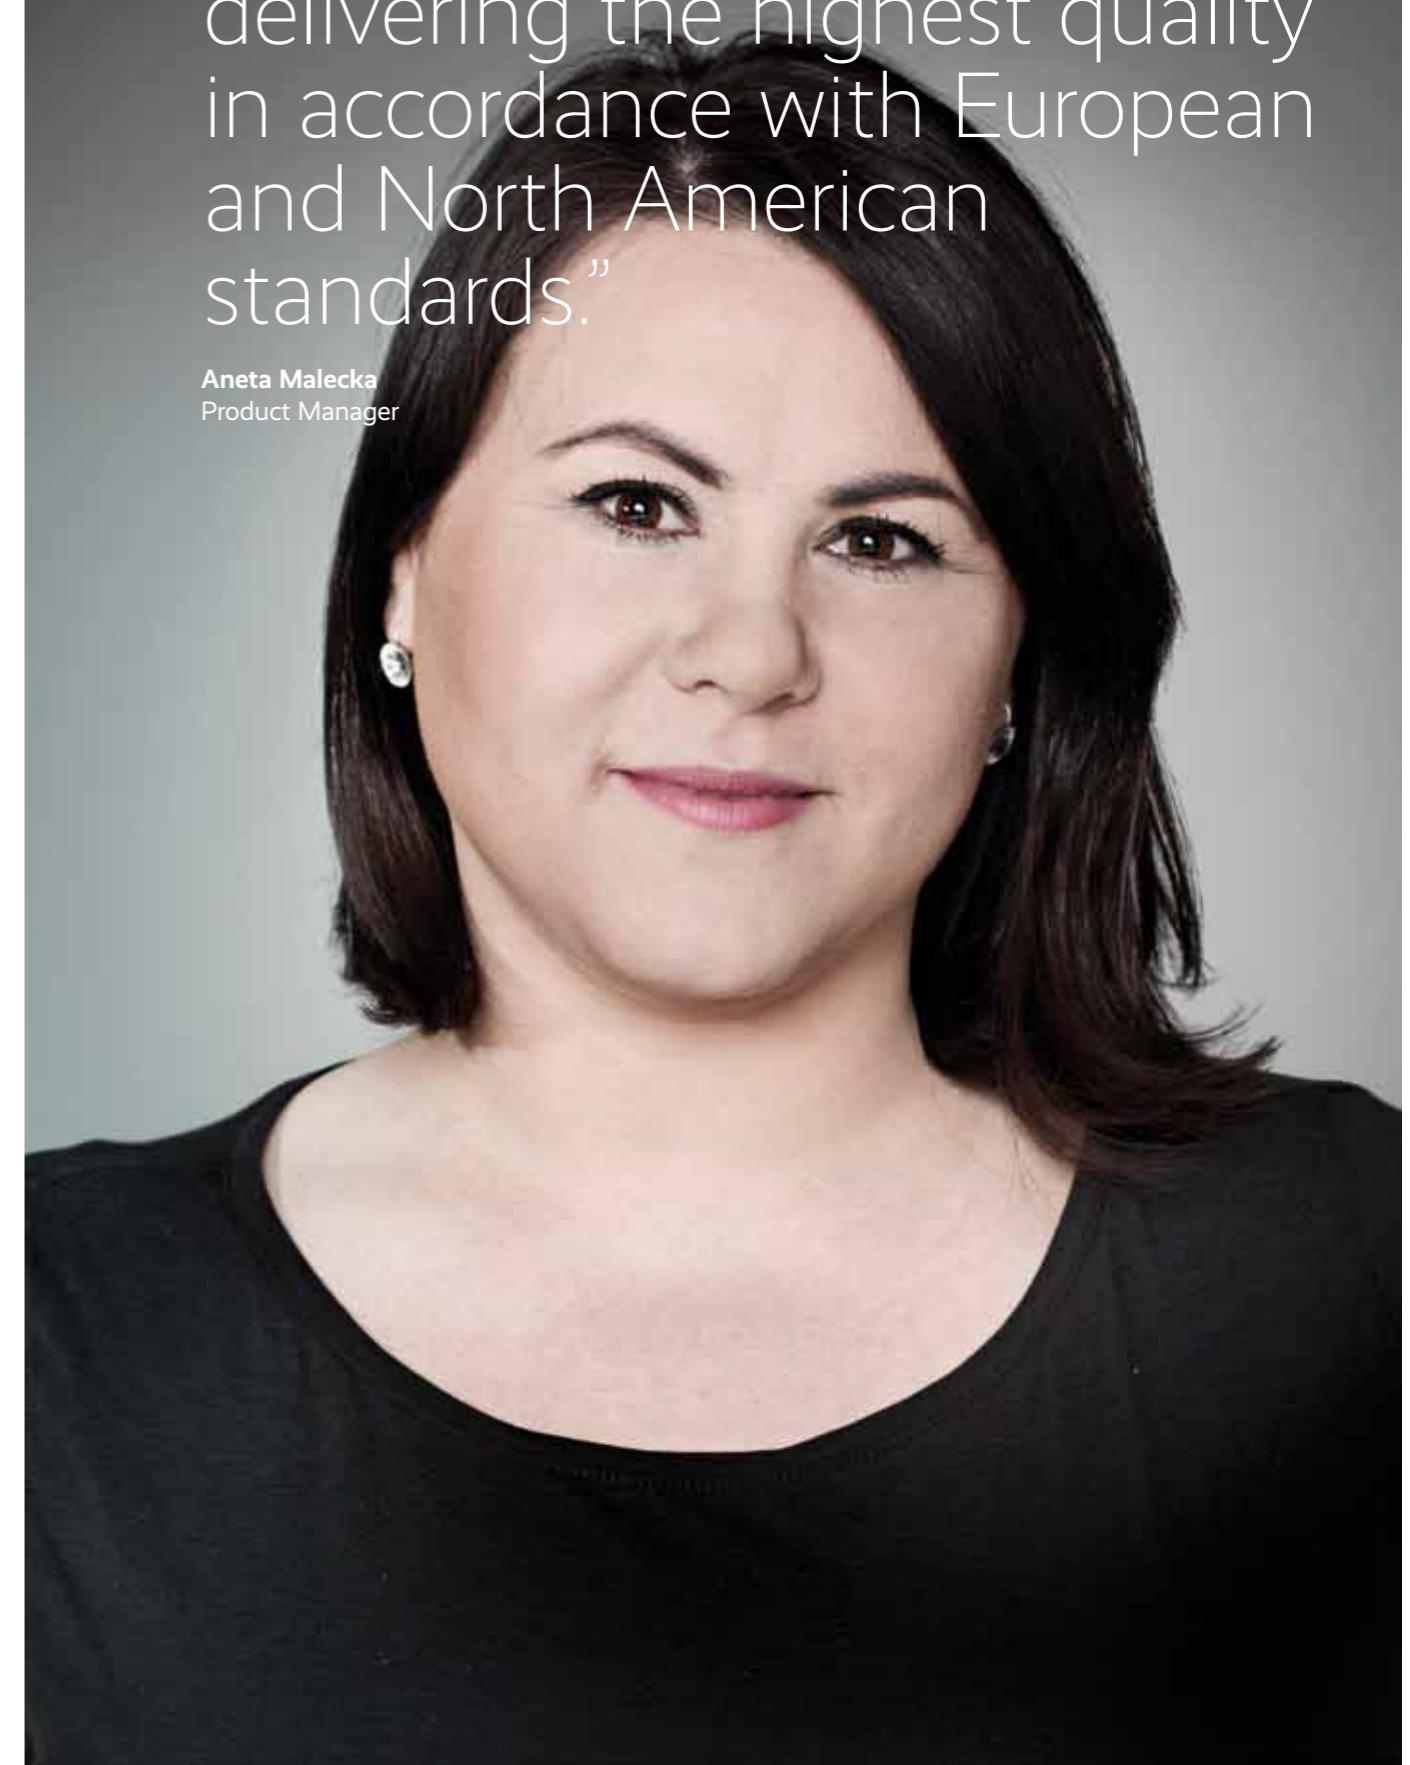

Shower Trays

Marmite creates surfaces inspired by nature.

“We test our products’ durability and safety always delivering the highest quality in accordance with European and North American standards.”

Aneta Malecka
Product Manager

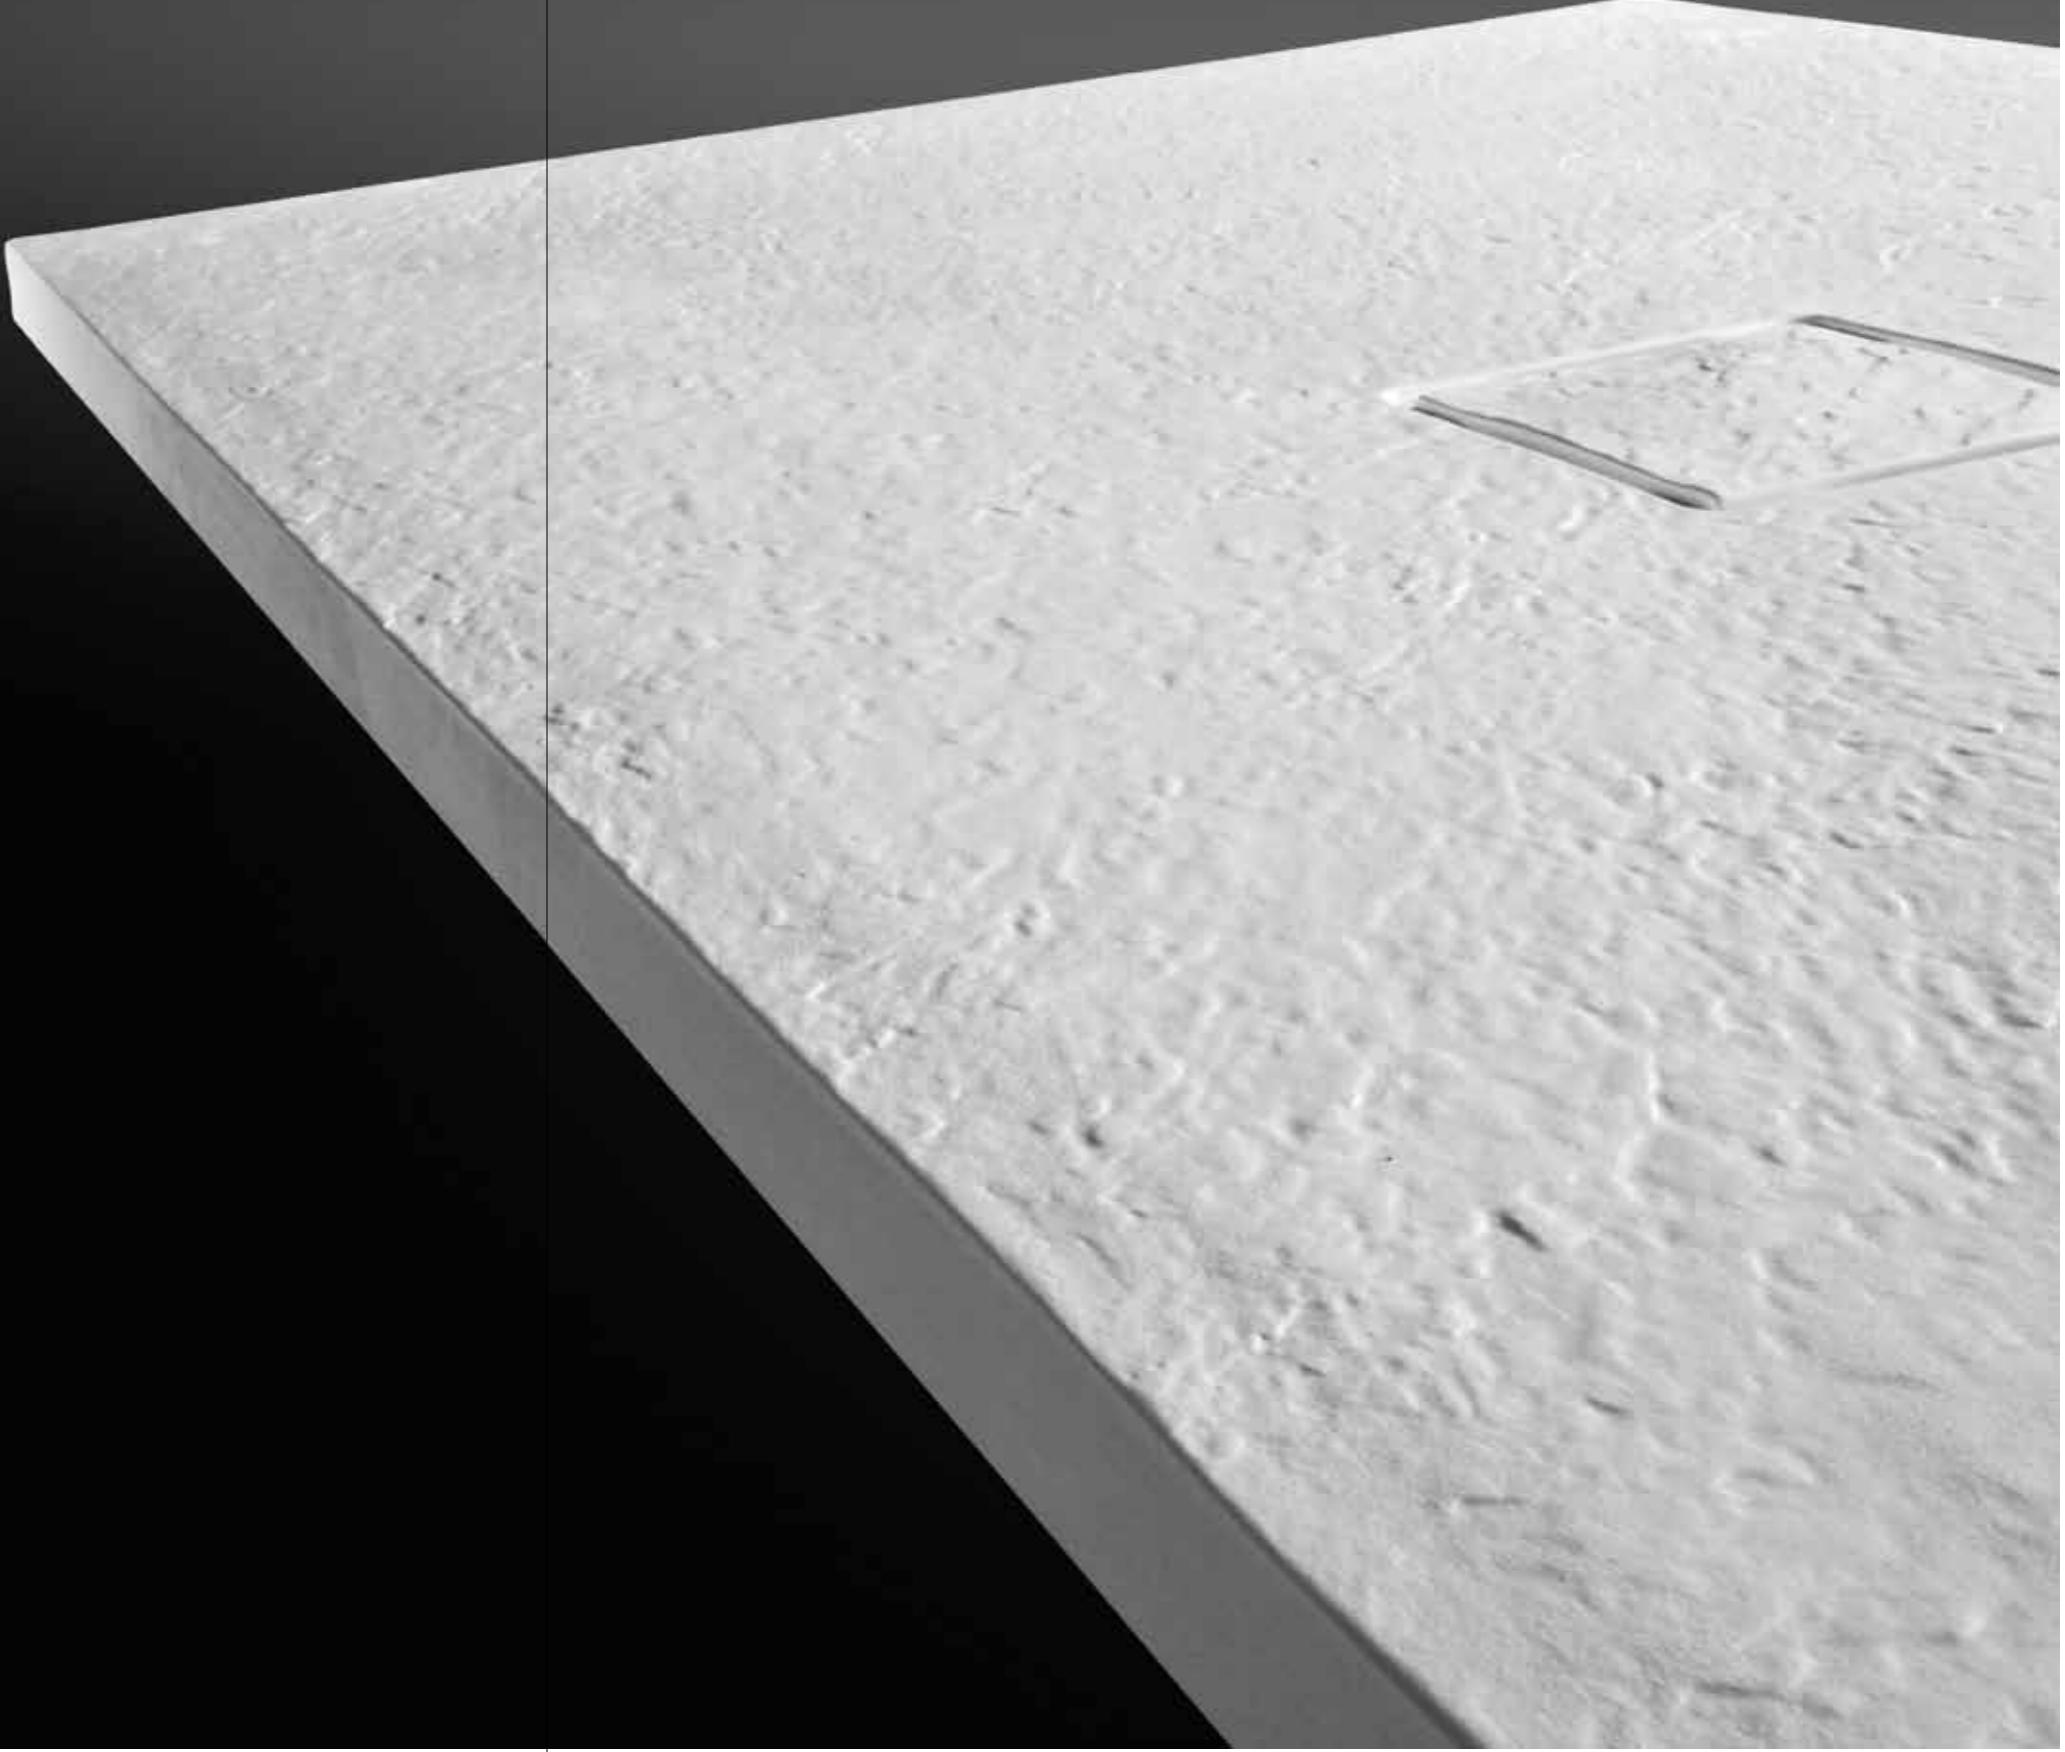

The material offers possibilities of designing ultra slim 30 mm shower trays.

The stability of cast marble products provides a sense of safety in the usage. Our technology enables us to provide a modern look with anti-slip properties.

Marmite marble shower
trays delivers excellent
acoustic insulation.

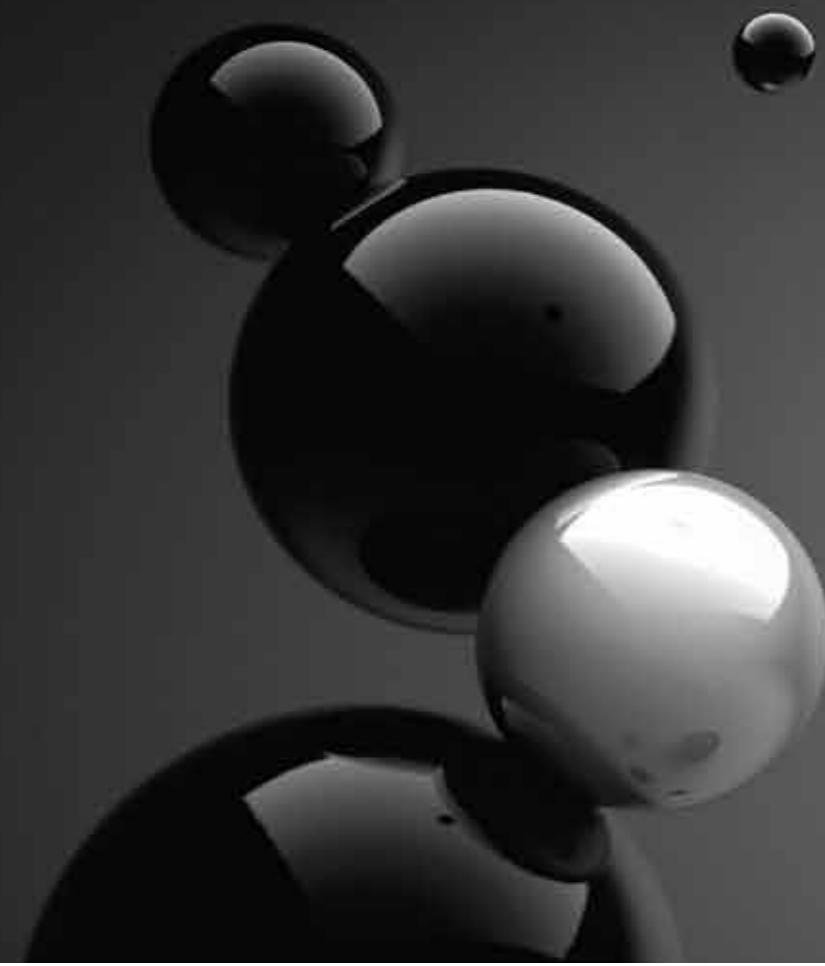

Cast marble
can be manufactured
in almost any colour.

Evermite is an innovative material that uniquely combines design flexibility with durability.

Its formula is based on a modified polymer base. The material is distinctly more durable and resistant to the typical everyday wear, scratches and lustre fading. It is also resistant to stains and does not discolour when exposed to cleaners. Evermite's unique structure makes it surprisingly easy to clean.

40%

more resistant
to abrasion

20%

more resistant
to scratches

50%

more resistant to
lustre fading after
multiple cleaning

10 years

warranty for
products made
of Evermite.

The surface of the product is perfectly smooth, which prevents stains from becoming ingrained and makes maintenance easier. Evermite is highly resistant to tobacco stains.

About us

Marmite is the leading European manufacturer of cast marble washbasins, shower trays, and bathtubs made of cast marble.

The company brings together natural mineral materials, sophisticated technology and develops high efficient innovations.

Our facts

 **40** years
of experience

 **1** single
industrial plant

 **7** fully organised
production
lines

 **35 000** m²
production area

 **700** employees

 **2 000** products on
permanent
offer

 **1 400 000** capacity
piece per year

 **50** EUR million
in turnover

Our history

The history of the company started over 40 years ago in Sweden.

Our Swedish heritage contributes to the beautiful design, ethical and ecological awareness, and high product quality.

Simplicity is the key element of our success.

“Despite our growth,
we have managed to
remain as fast acting
and flexible as were
years ago.”

Ewelina Gnatkowska
Customer Service Manager

1973

Roger Johansson starts production of reinforced plastic and polyurethane elements.

1978

Roger experiments with cast marble technology and builds the first mixing machine which later becomes the key to the success of Marmite.

1979

Production of first washbasin made of cast marble.

1987

Marmite begins producing shower trays and bathtubs.

1989

Eightieth employee joins Marmite team.

1990

Marmite relocates production to a greenfield site in Zakrzewo, Poland.

1994

Further growth. Marmite expands to western and eastern European markets.

1998

Development of spray technology that allows products to be offered in the colors of graphite.

2000

Installation of filters, incorporating activated carbon and catalytic converters enable the reduction of all emissions by 98%.

2005

The annual production capacity exceeds 400 000 units.

2007

The plant in Sweden closes. Dynamic growth of Polish factory.

2008

Achievement of 13 mm thickness of products gives a possibility to design light line products.

2011

Implementation of double mold technology for shower trays.

2012

evermite[®]
Marmite introduces Evermite, new innovative material.

2013

Company hires 500 employees.

2014

MARMITE

Launch of a new corporate identity supporting strategy of being first choice B2B brand in bathroom industry.

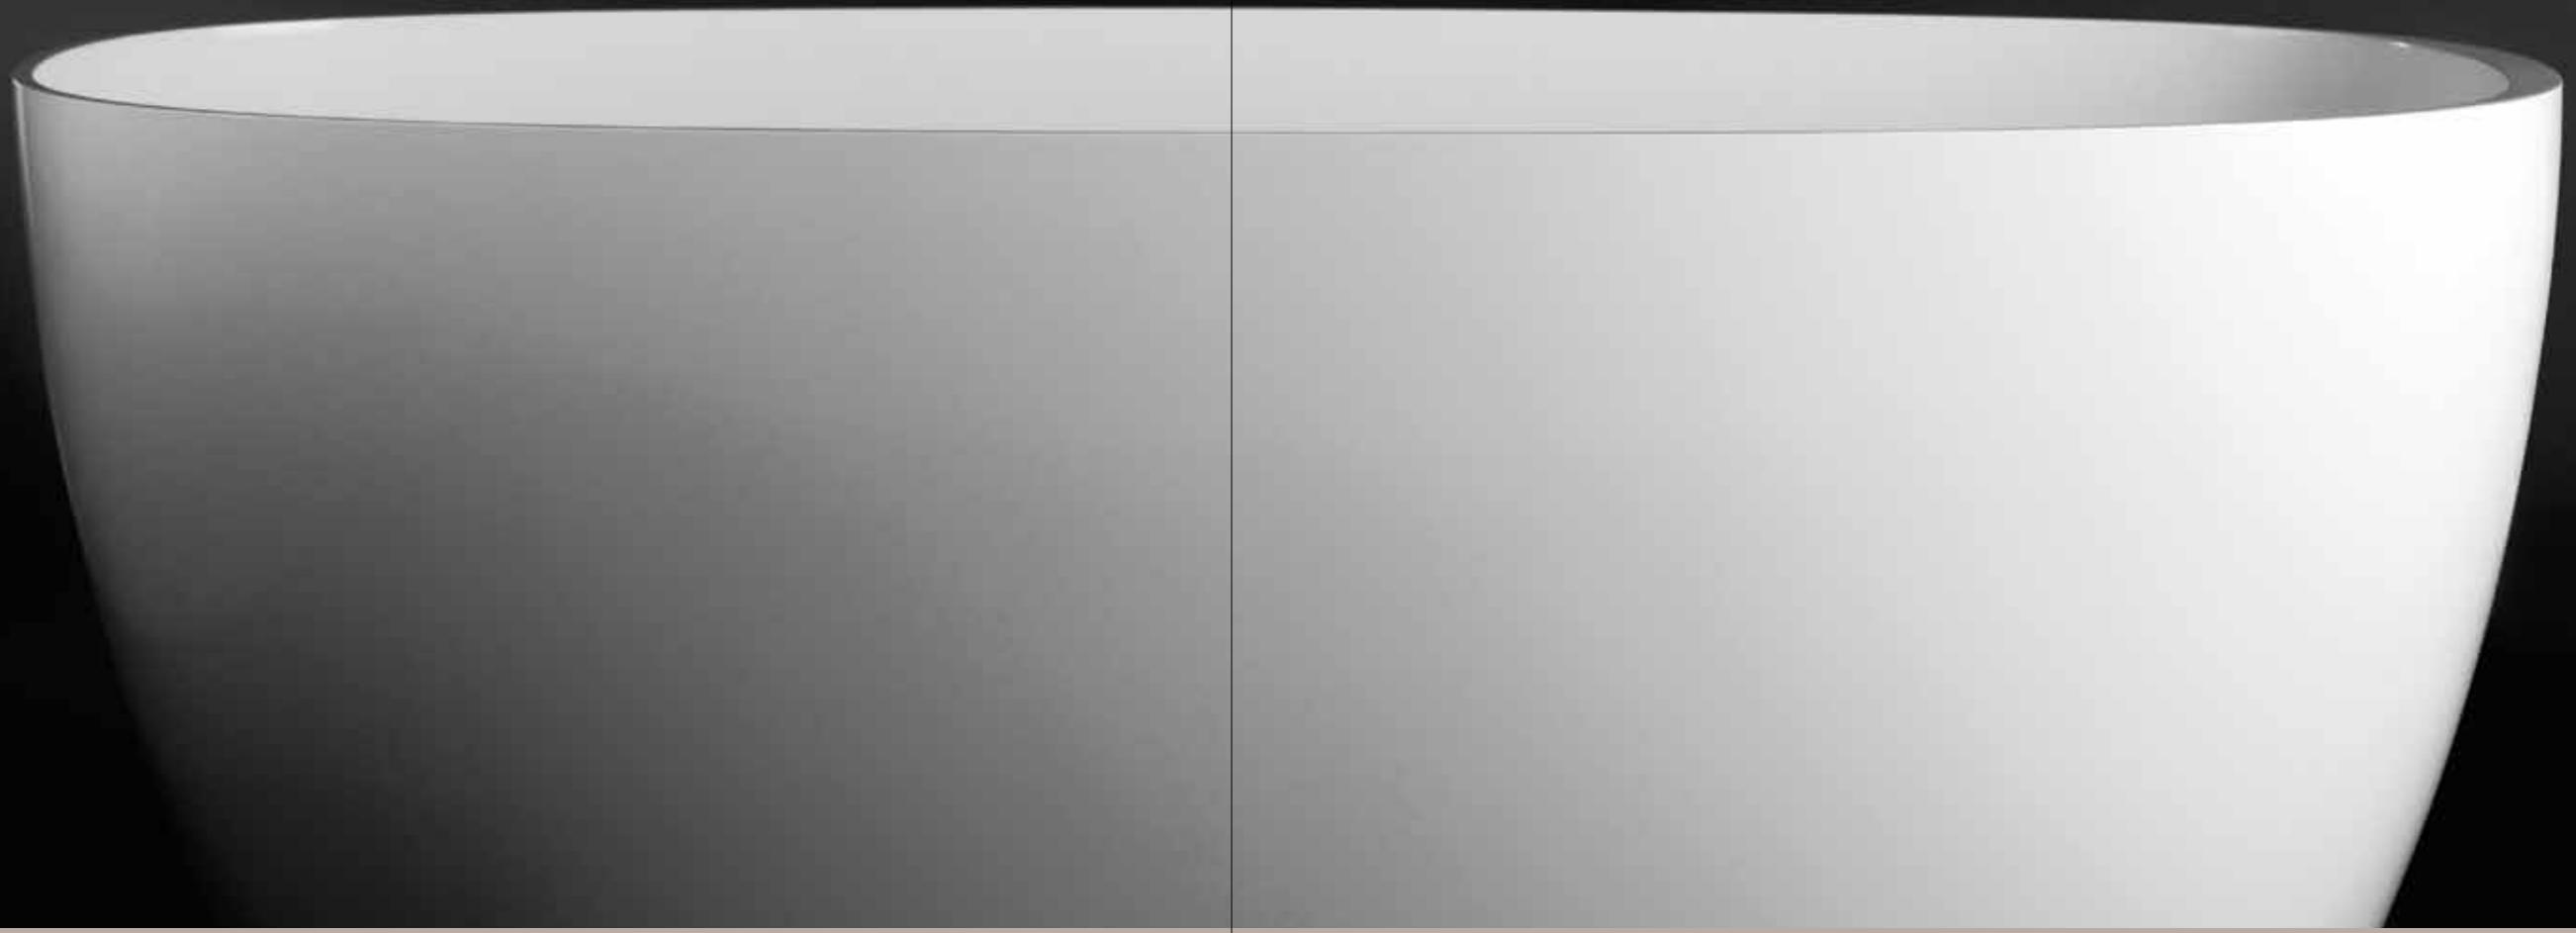

2014

New on demand packaging system produces a shipping carton in the size needed, exactly at the point where the products are packed for shipment.

2014

The first bathtub with integrated overflow.

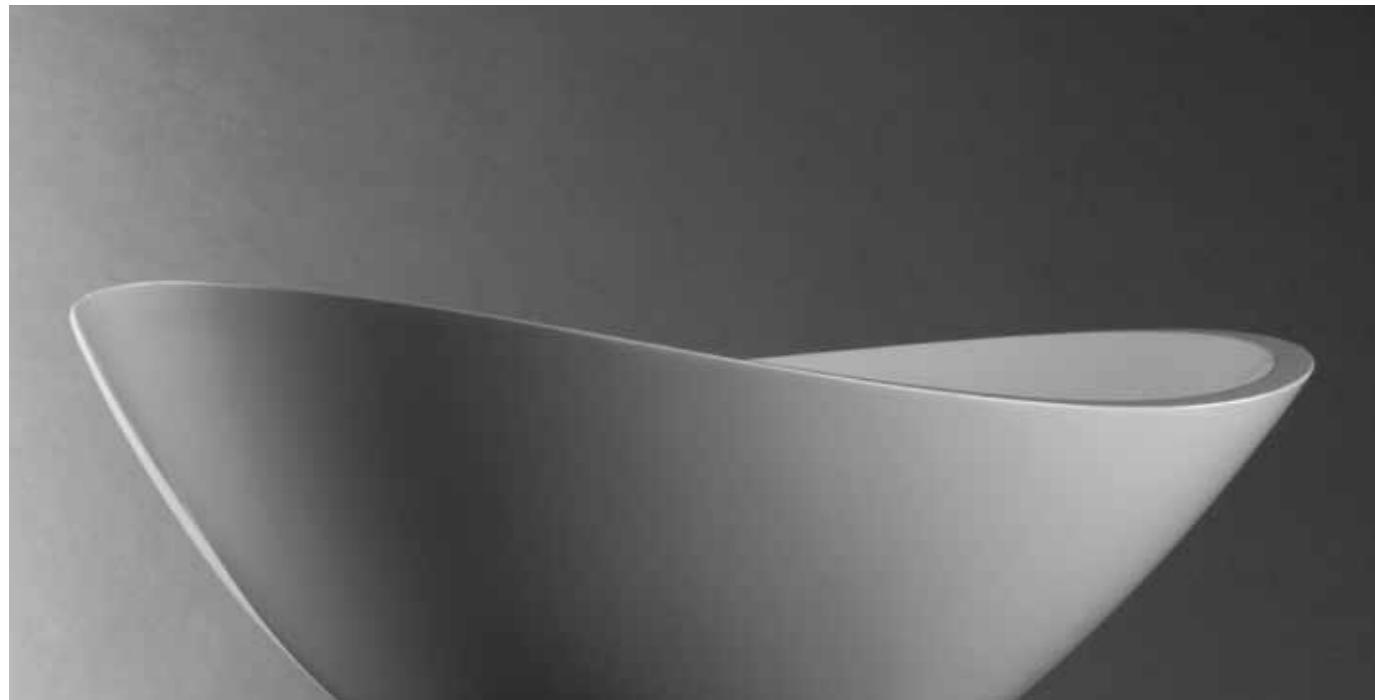

Cooperation

Marmite is present
in 35 countries.

The company takes care
of customers to create
a high quality of service
and customer experience,
based on long-term
relationships and trust.

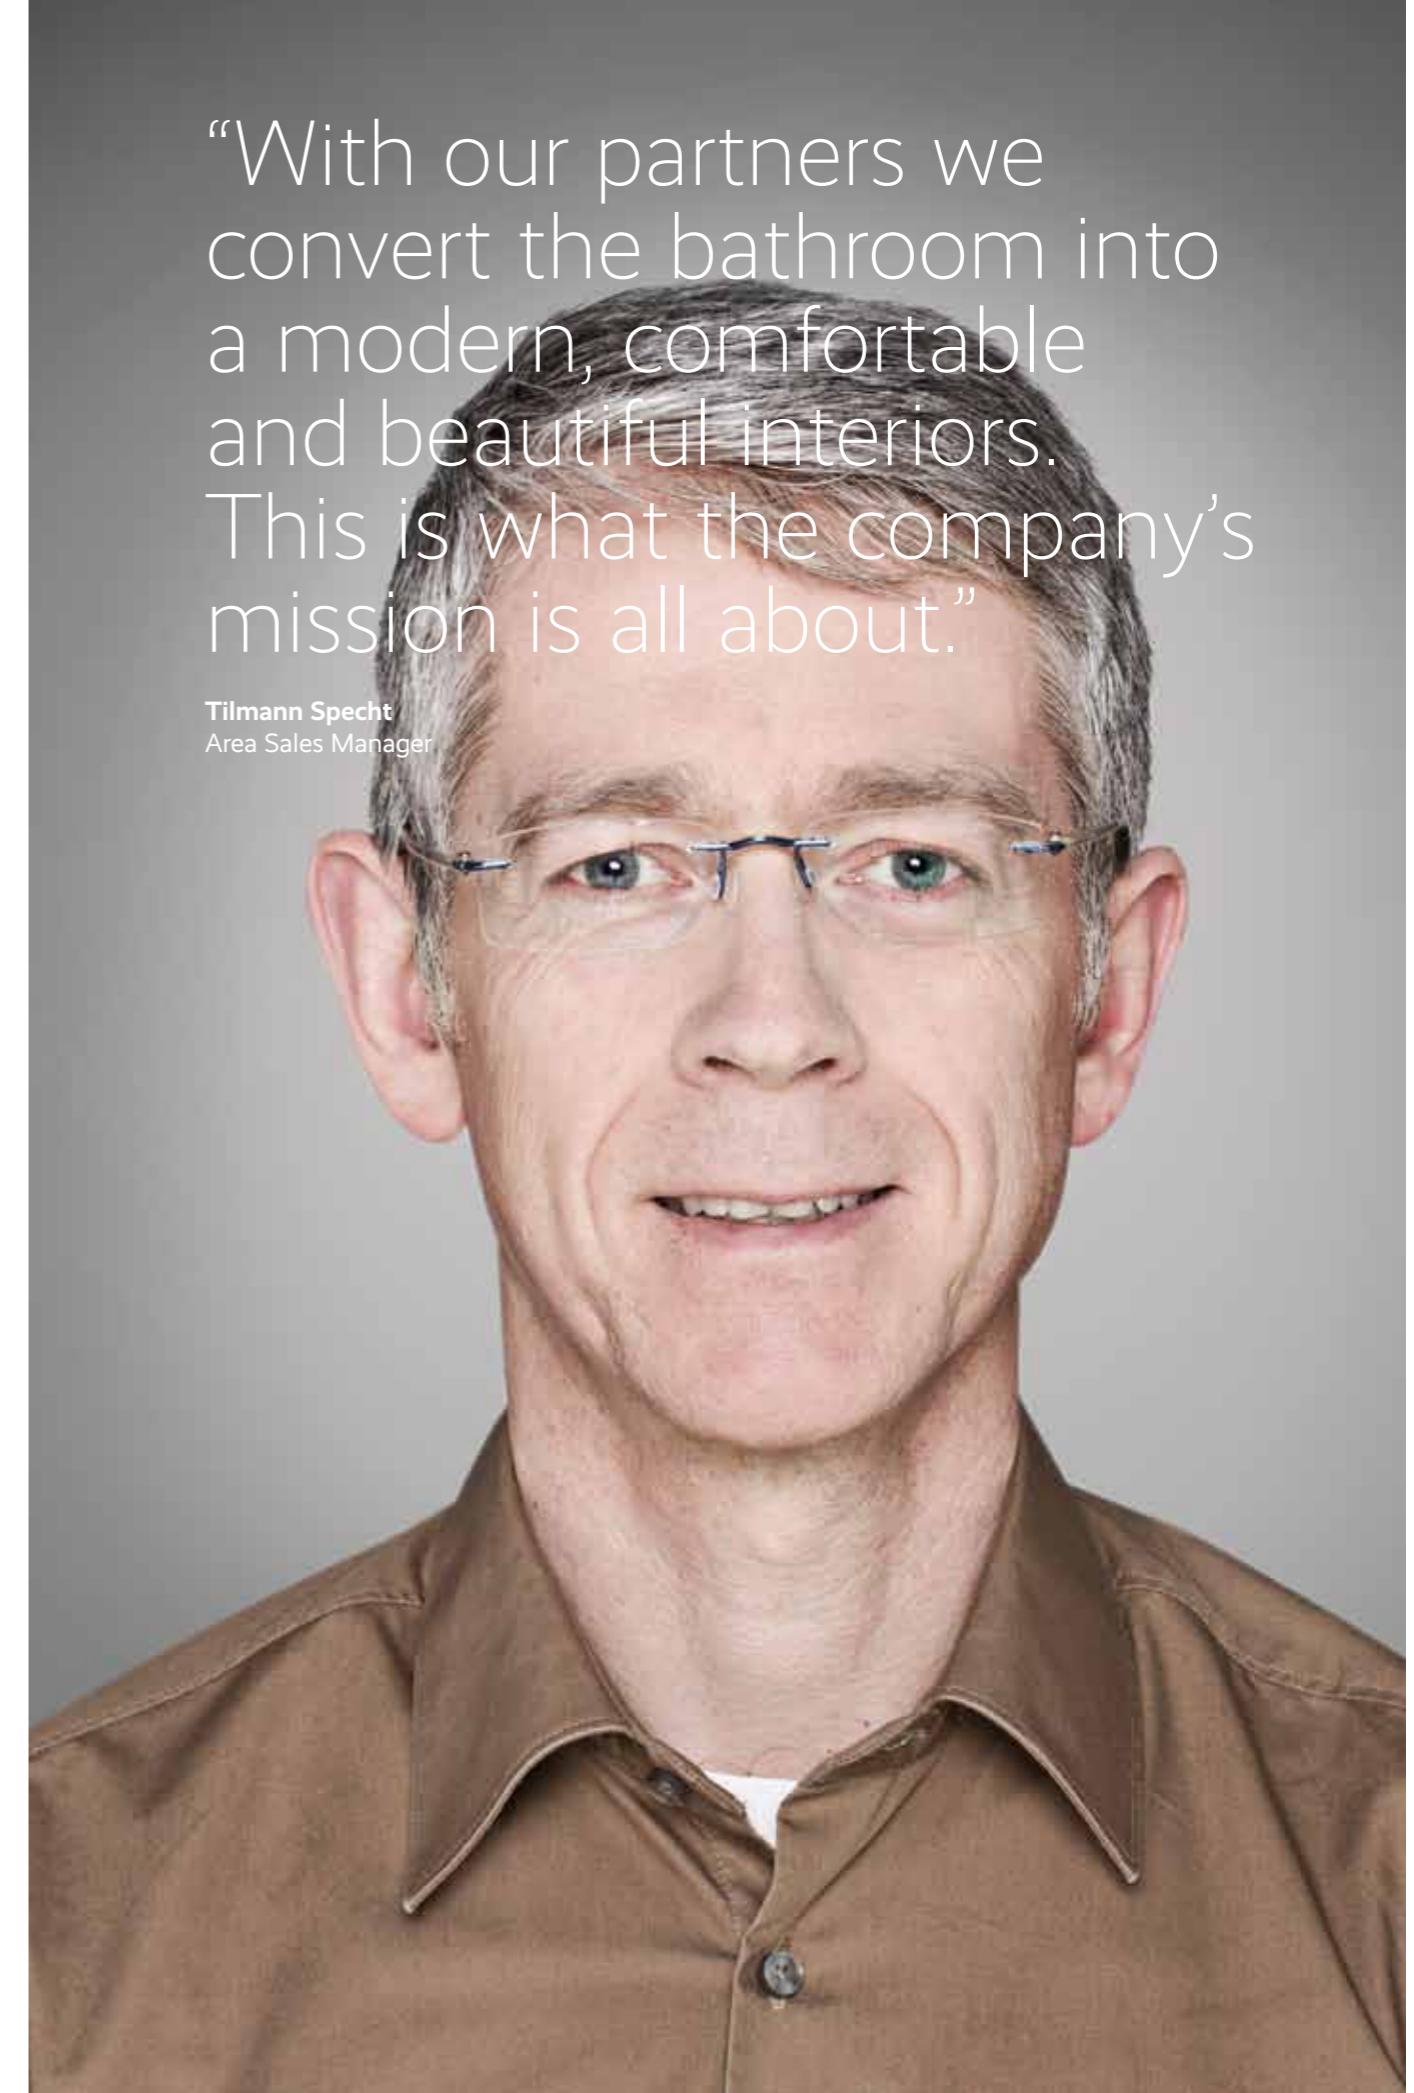

We popularise mainstream technology through the design, quality, short term deliveries, innovations and responsibility for the environment.

Marmite has unique experience due to long lasting cooperation with key companies in the global bathroom industry.

“With our partners we convert the bathroom into a modern, comfortable and beautiful interiors. This is what the company's mission is all about.”

Tilmann Specht
Area Sales Manager

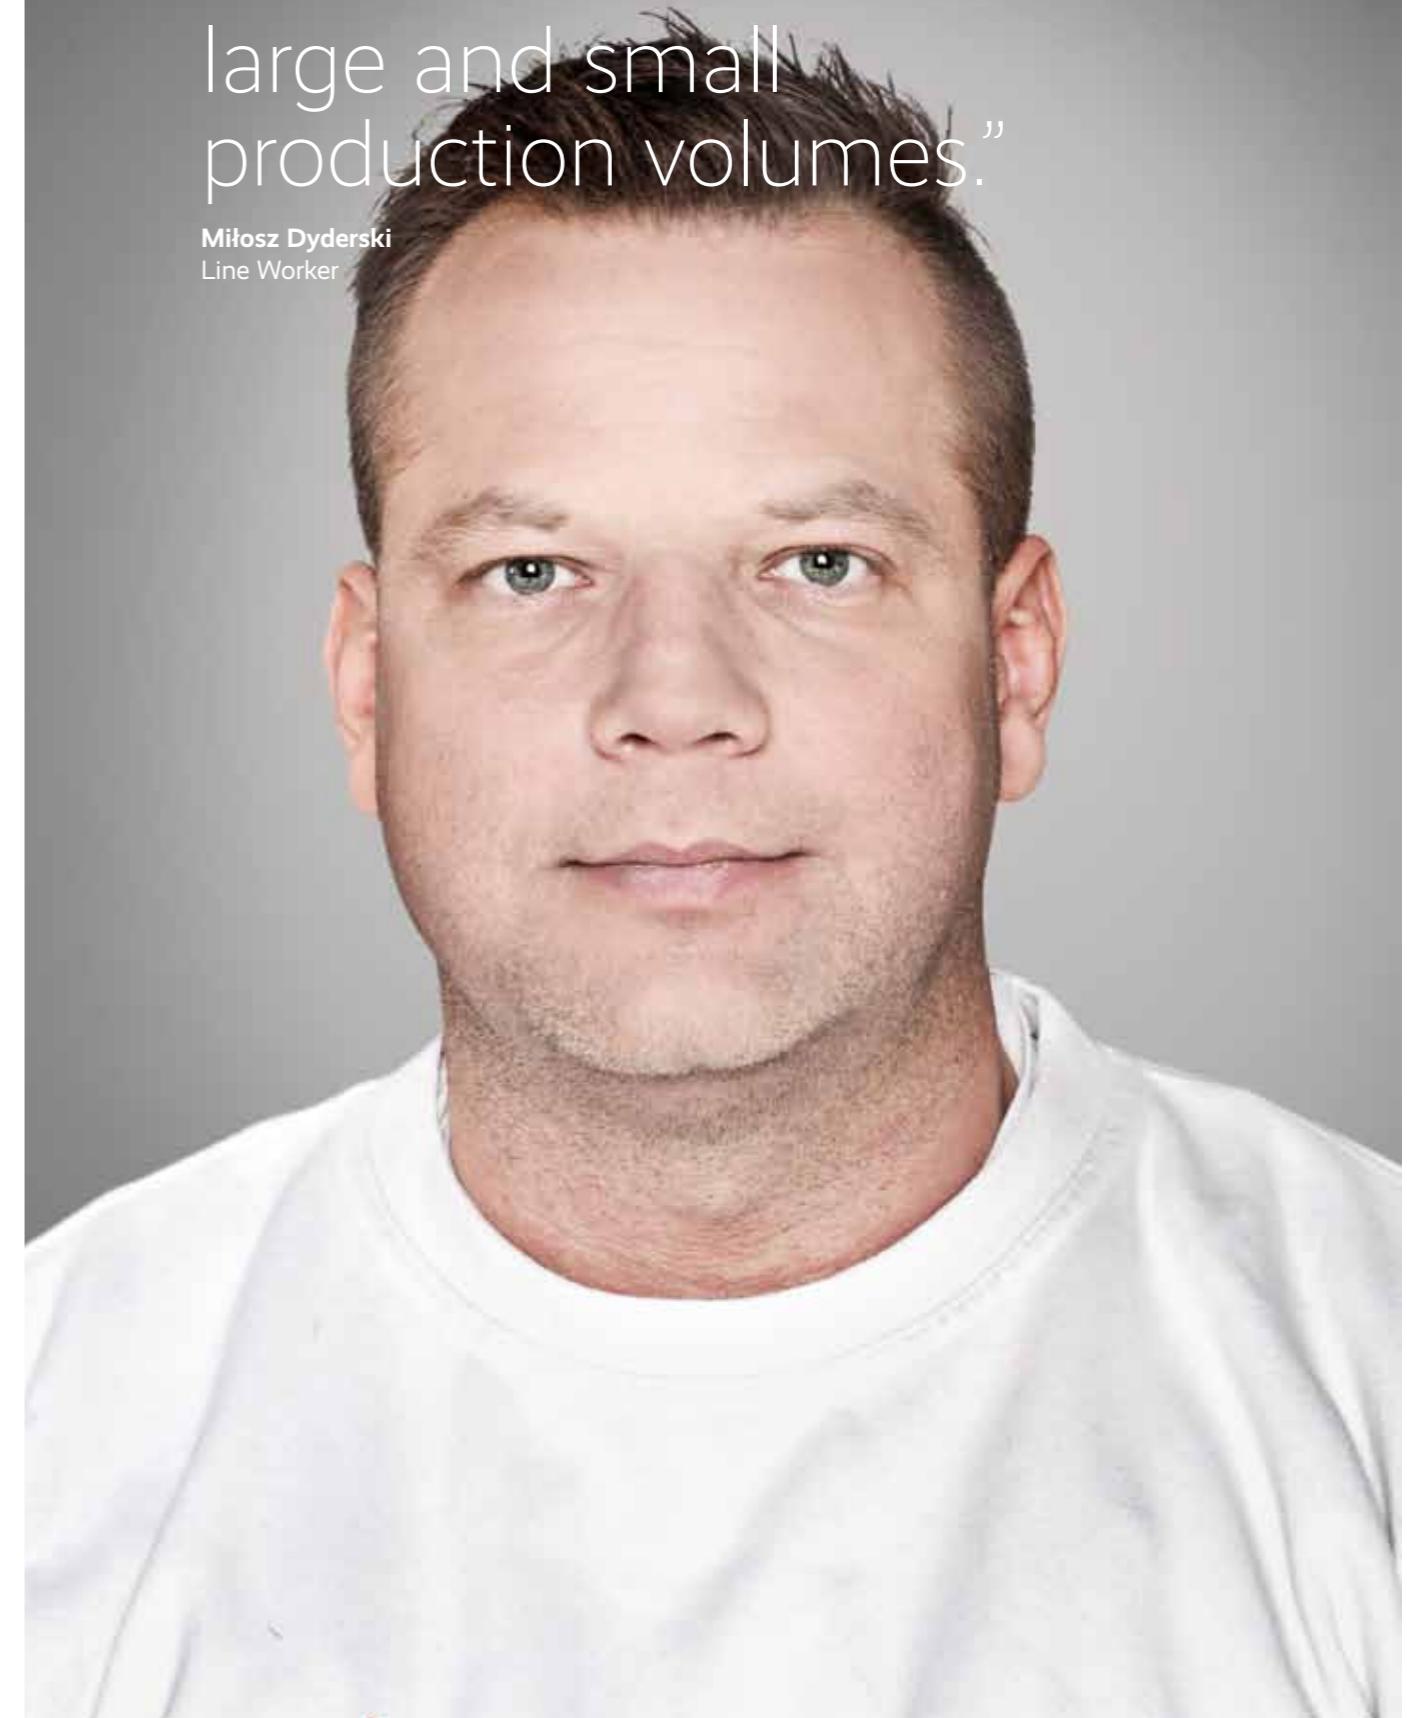

The company's capabilities allows it to introduce new individual designs created exclusively for the customer.

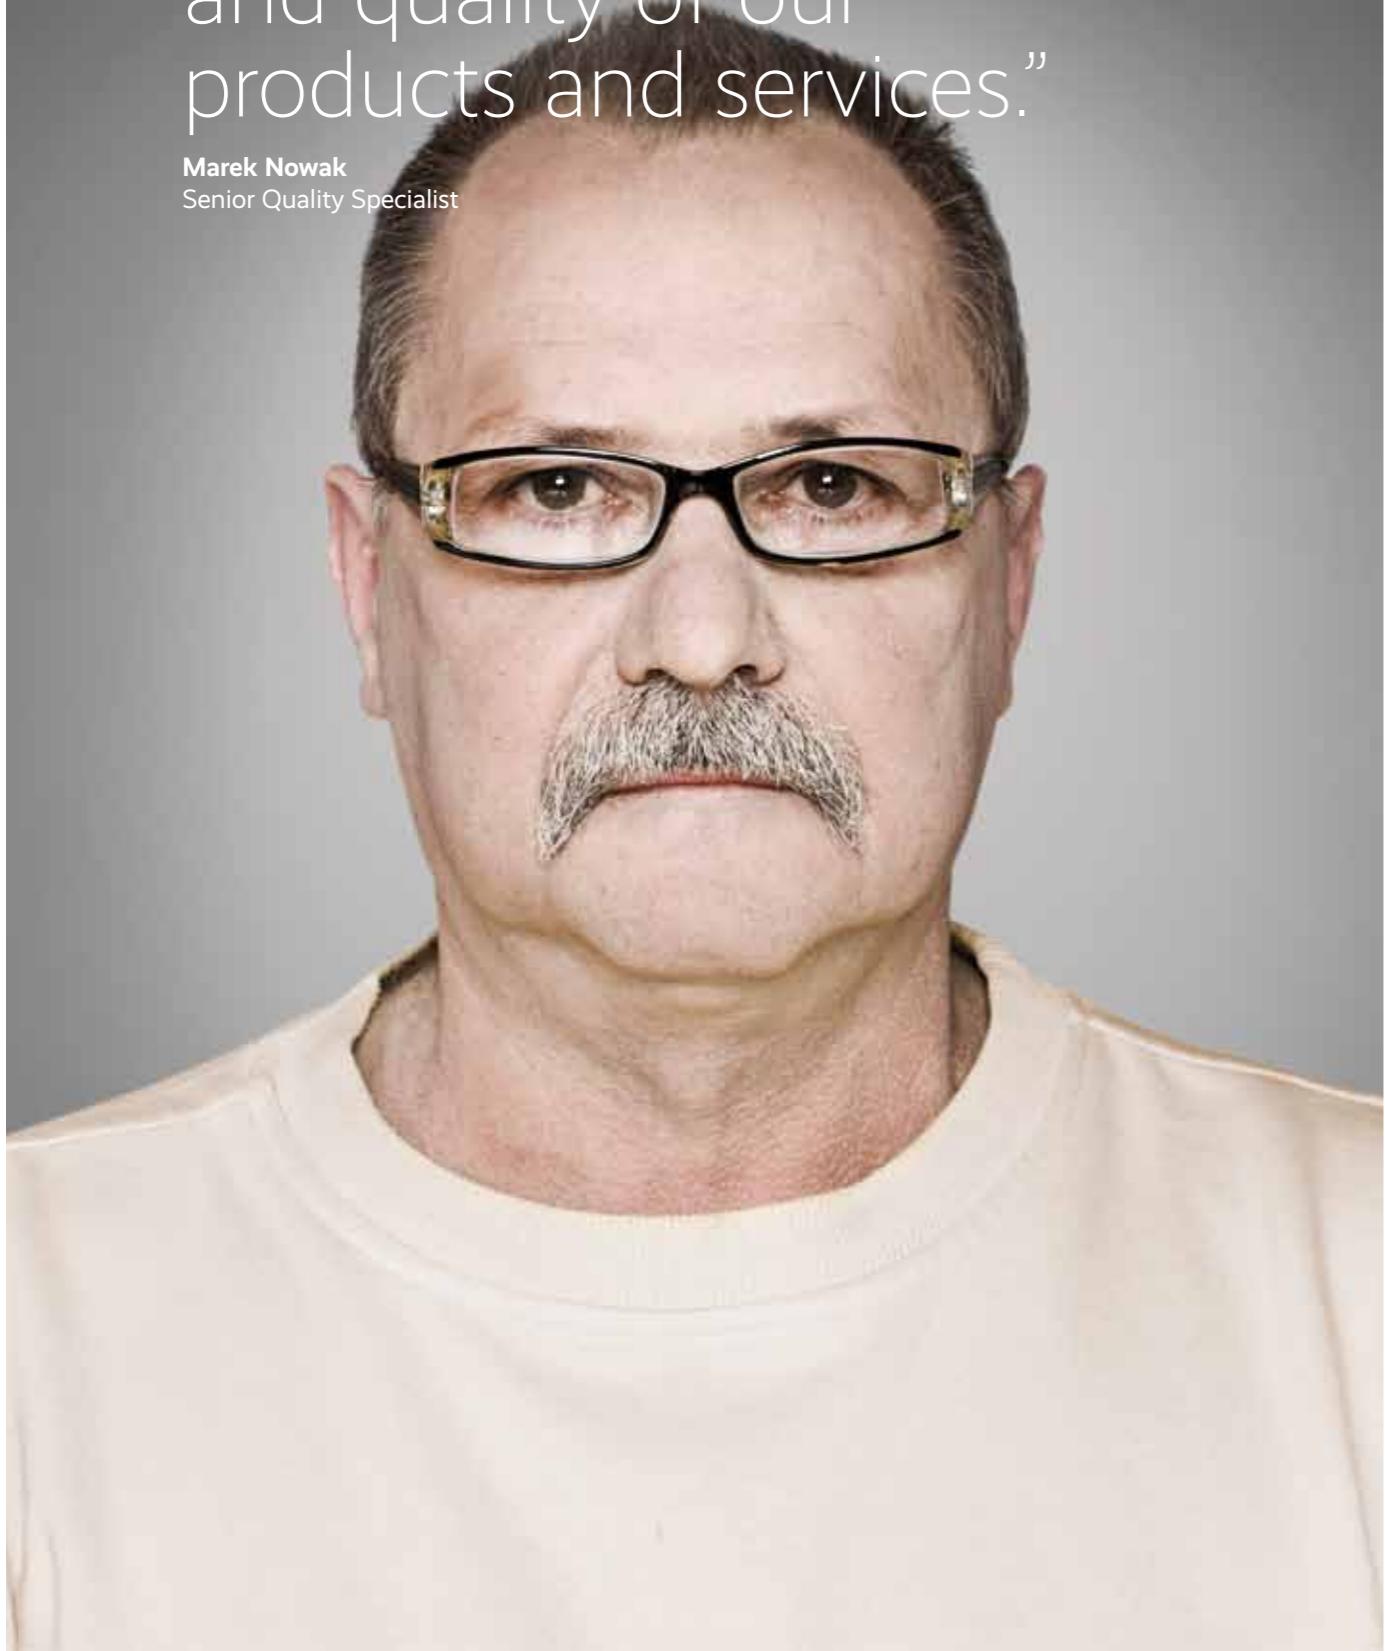

“The Marmite technology is perfectly fitted for both large and small production volumes.”

Miłosz Dyderski
Line Worker

“Our commitment
is to never compromise
on the safety, compliance
and quality of our
products and services.”

Marek Nowak
Senior Quality Specialist

The production volume
is set at between 500
and 20,000 pieces
annually for new designs.

The 3 shifts flexible work
organisation and efficient
production planning provide
nonstop deliveries to customers
and quick reactions to new
challenges appearing on the
market.

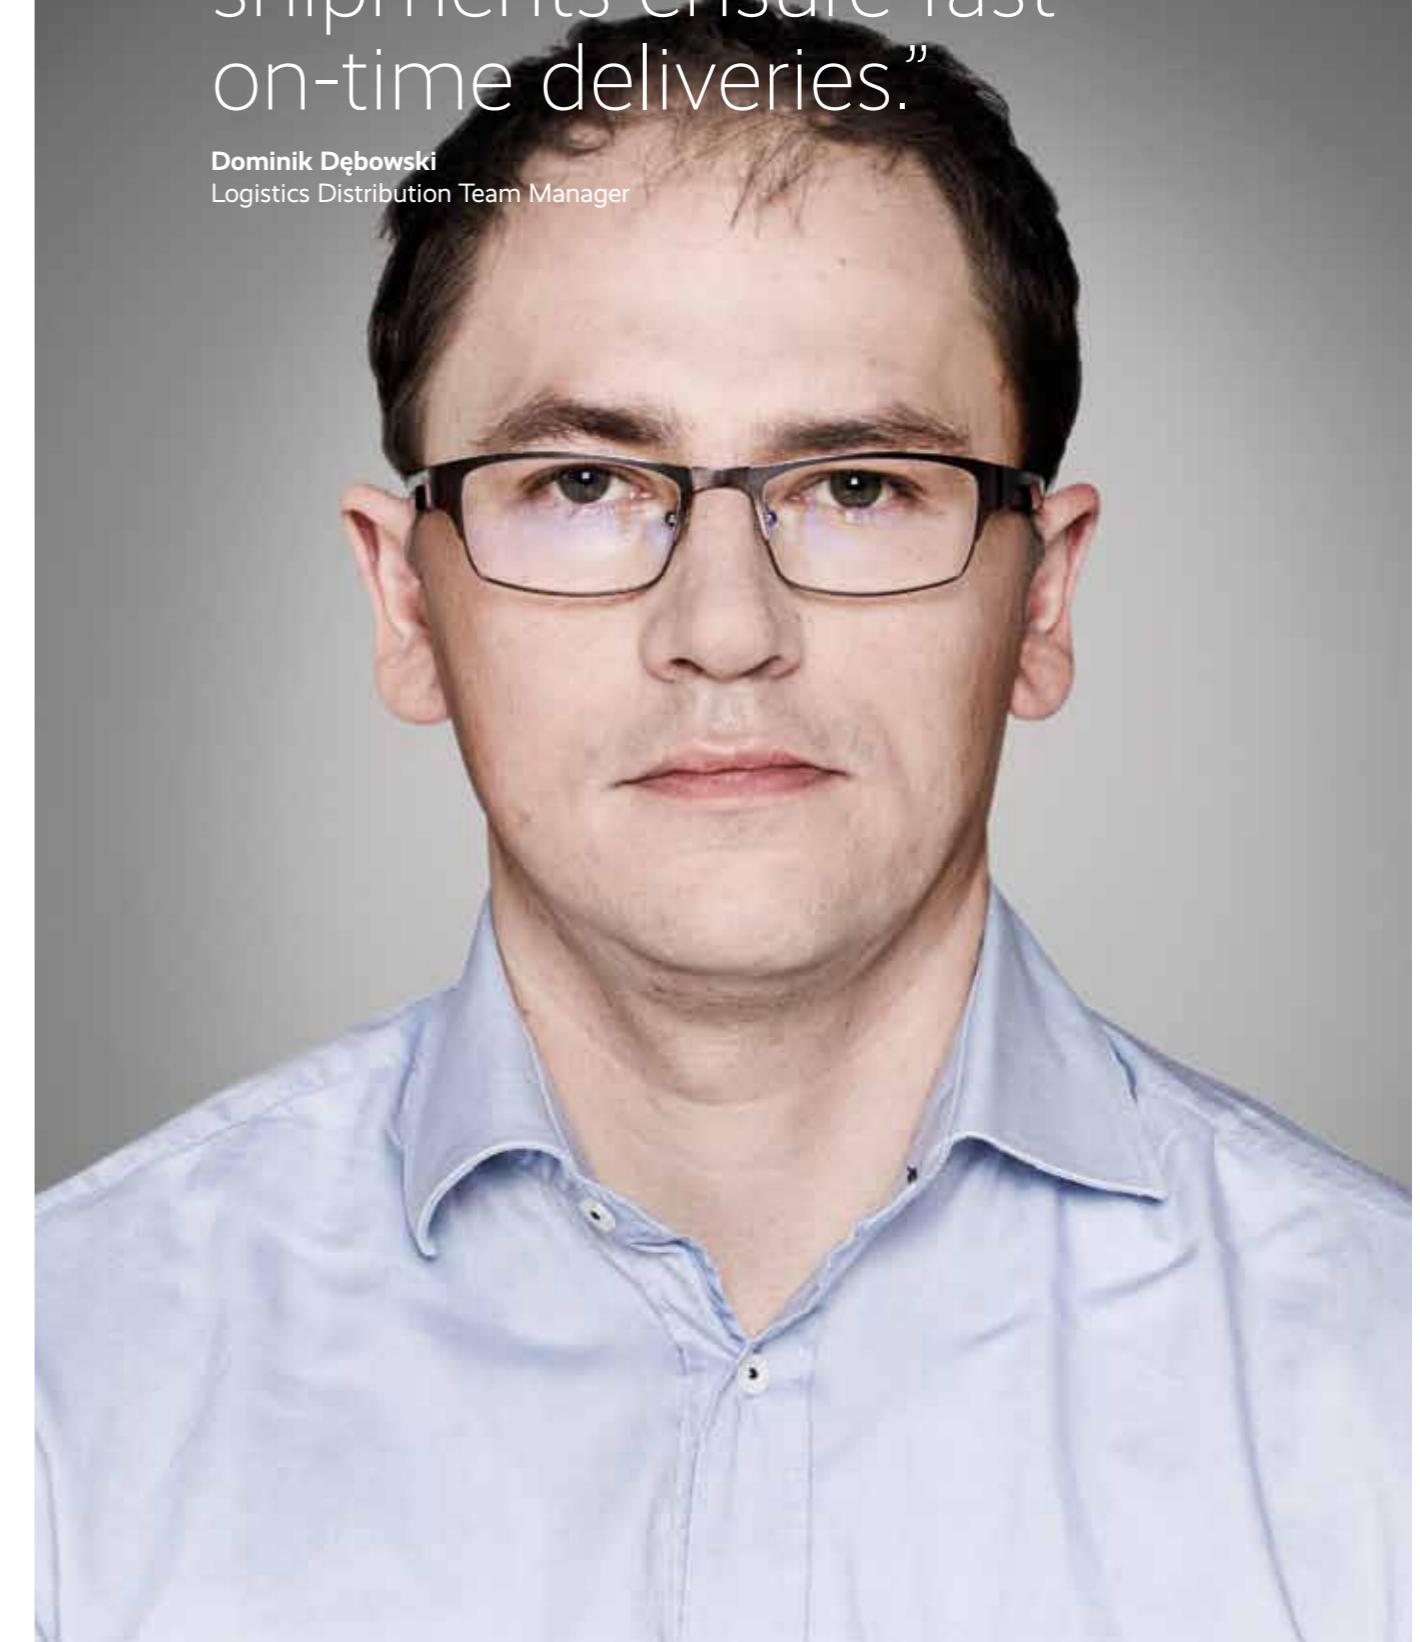

The company uses the on demand packaging technology, a system that produces a shipping carton of the exact dimensions required for the product in question.

30-40% of the package dimensions are reportedly saved in this way, thereby saving space in shipping and warehousing as well.

“The factory’s location in Europe and six-day-a-week shipments ensure fast on-time deliveries.”

Dominik Dębowksi
Logistics Distribution Team Manager

Design

The Design Department supports customers, preparing custom projects to ensure that their specific needs are met.
