MILLENIUM

60X60 / 30X60 · 24"X24" / 12"X24"

Like the semiprecious gem that only exists in the Yuruty mine, in Bolivia, and whose shades are due to the radiation of the area, rich in aluminum, Millenium is a porcelain that emerges with a vocation of timelessness. Softness and neutrality define this cement in silvery tones and with a novel polished- matt finish.

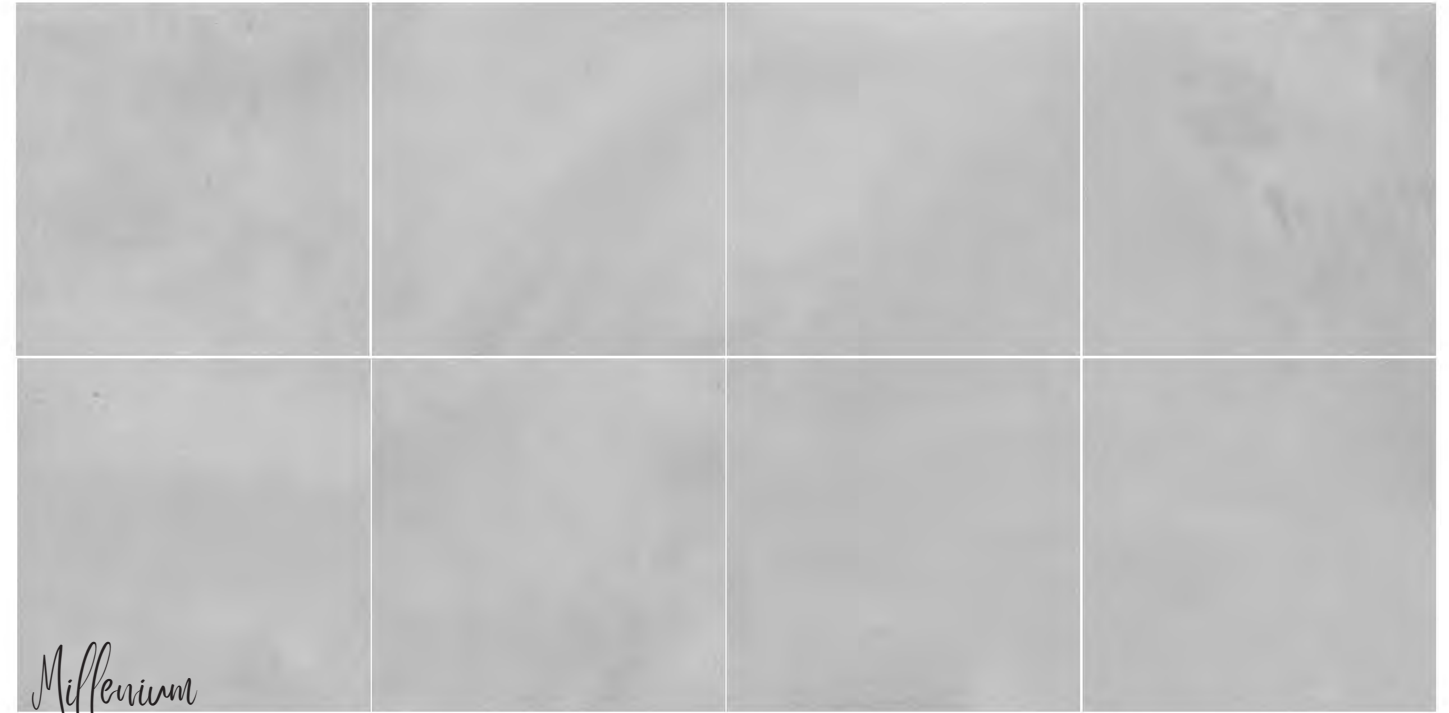

Como la gema semipreciosa que solo existe en la mina Yuruty, en Bolivia, y cuyas tonalidades se deben a la radiación de la zona, rica en aluminio, Millenium es un porcelánico que surge con vocación de atemporalidad. Suavidad y neutralidad definen este cemento en tonos plateados y con un novedoso acabado pulido-mate.
